*Deceased

FOREWORD

KENNETH F. POWNALL, D.D.S.
REGISTRAR-SECRETARY-TREASURER

As Registrar of the R.C.D.S. I thought it my duty to draw to your attention a few of the major discussions held and decisions made during the last year.

Since the next few years will undoubtedly prove extremely important to all of the health professions in this province, it is imperative that each and every dentist keep abreast of the changes made both in method of practice and in the regulations governing practice. I am hopeful that the new format of the Proceedings will encourage you to read and digest the contents.

If you *are* concerned about *your* future and the future of the dental profession in Ontario, you will find the following items of particular interest

R.C.D.S. Reply to the Recommendations of the Committee on the Healing ArtsPage 37

Dental Hygiene Courses in Colleges of Applied Arts and TechnologyPage 21

Compulsory Continuing EducationPage 21

Establishment of "Special Register"Page 34

In addition to these items, the Board of Directors, during its discussions, made the following decisions which do not appear in the body of the reports contained in this issue of the Proceedings

In considering the suitability of the use of Chargex for the payment of dental services, the Board addressed itself to three major areas:

- (a) The relationship of the dentist to his patient without the intervention of a third party. The Board has reasonably assured itself that this could be resolved in an ethical fashion;
- (b) As presently constituted, the professional agreement as signed by the dentist in regard to promotion is not acceptable to this Board, and
- (c) The Board is concerned that the use of Chargex for the payment of dental services would likely have the effect of increasing the cost of dental care to the public.

In view of these factors the Board re-affirmed its decision to disapprove the use of Chargex credit card systems for payment of dental services.

The following resolution, regarding the National Dental Examining Board was approved by the R.C.D.S. Due to its complexity it is quoted verbatim:

"Whereas the National Dental Examining Board of Canada unanimously adopted the following motion at its meeting held in Ottawa, Ontario, on May 4 and 5, 1970 —

"That because of direct representation on the Policy on Accreditation of the Council on Dental Education of the C.D.A., and because of the participation of an N.D.E.B. appointee to all survey teams, and because of voting membership on the Council on Dental Education, the N.D.E.B. is satisfied that a meaningful voice in the accreditation process exists. The Board therefore suggests that the N.D.E.B. certificate be offered to graduates of approved Canadian dental schools, as of classes graduating in the spring of 1971 and thereafter, providing the above conditions are continued. These certificates are to be granted without examination." and

Whereas the Board of Directors of the Royal College of Dental Surgeons of Ontario believing that it is essential there exist a National Dental Examining Board of Canada to —

- (a) participate in a meaningful way on behalf of provincial dental licensing authorities in the accreditation of Canadian dental schools;
- (b) provide an examination facility for candidates from other than approved Canadian dental schools; and
- (c) issue a certificate to eligible recipients which assures that high profession-established minimum standards of competence to practise dentistry have been met;

Therefore be it resolved —

1. That the Board of Directors of the Royal College of Dental Surgeons of Ontario give notice of its intent, providing that the conditions outlined in resolving clauses 3 and 4 below are met, to require the possession of the certificate of the National

Dental Examining Board of Canada by every applicant for registration in the Royal College of Dental Surgeons of Ontario; and

2. That the Board of Directors will make an annual grant to the National Dental Examining Board of Canada based on Four Dollars (\$4.00) per licensed dentist in Ontario; and
3. That the Board of Directors is not prepared to support an N.D.E.B. certificate fee greater than \$50.00 for graduates of Ontario dental schools; and
4. That the regulations of the National Dental Examining Board of Canada should make possible the acquisition of its certificate by an eligible recipient at any time up to a maximum of three years from his graduation from an accredited Canadian dental school; and
5. That this resolution be transmitted to the National Dental Examining Board of Canada, to each of the provincial dental licensing authorities, and to each of the Canadian dental schools."

Since some confusion has been caused because of the term "Dental Surgeon" after a dentist's name in the list of dentists in the yellow pages of the telephone directories, the Board adopted a resolution which stated "... a listing of the names of dentists appearing in the yellow pages of the telephone directory under the heading "Dentists" no additional designation be employed except such designations as apply to certified specialists."

Special appreciation was expressed to Dr. J.D. Purves and his team for the excellent services rendered by them in the identification of victims of the air crash near Toronto on July 5, 1970. Air Canada had also expressed sincere appreciation to those dentists involved in this difficult task.

The Board expressed the hope that the recently established Canadian Society of Forensic Odontology, of which Dr. J.D. Purves is President, would acquire many new members and be supported by the profession.

PRESIDENT'S REPORTS

HARRY M. JOLLEY, D.D.S.

PRESIDENT'S REMARKS delivered at the NOVEMBER 1970 BOARD OF DIRECTORS MEETING

This is the last regular meeting of the Board, and I want to take this opportunity to express my appreciation of your efforts, your dedication and your devotion in the discharge of your responsibilities. While there may be some question as to your perspicacity in your choice of President, I have no hesitation in expressing my judgment on your activities, and I say without equivocation that you have served at least as capably as any of the other Boards of which I have been a member.

As well, I want to acknowledge our indebtedness to the staff that has been assembled to carry out our policies as well as the many routine duties which they must discharge. I, personally, have sensed an air of cheerful, co-operative efficiency which speaks well of the environment in which they operate. I am sure anything I might say about Ken Pownall would be superfluous. You

have all had individual opportunities to experience his helpfulness, his knowledgeability and his untiring readiness to participate and contribute. Mr. Jackson has kept us solvent and businesslike in our operations. I would like, if she will forgive me, to direct special attention to Mrs. Shand, who has been a source of strength to Ken and a ready fountain of information on many occasions. I am sure you share with me my enthusiasm for her method of recording the happenings at our meetings. On your behalf, I thank her.

Finally, my thanks to you for having done me the honour of electing me to serve as the President of this Board. Equally, I appreciate the manner in which you have gone about your duties and the unhesitating and dedicated manner in which you have carried out your assignments. Thank you very much.

APRIL 1970 BOARD MEETING

I Since the last Board meeting, as reported to the Board, the Registrar, the Executive Director of the C.D.A. and the President of this Board met with officials of the Canada Immigration Division of the Department of Manpower and Immigration at Ottawa to discuss some of the problems associated with the immigration of foreign dentists to Canada. The officials it should be reported, were

sympathetic, co-operative and eager to be of assistance. Three points were discussed on which some agreement or understanding was reached.

1. It must be impressed on all foreign dentists who make enquiries about immigration that they cannot practise in Ontario until they are properly licensed. In the course of the discussion, it was pointed out that these

same conditions prevailed whether applicants were immigrants or refugees. This distinction was made when the officials were laudatory in their remarks concerning this Board's involvement with the refugee Czech dentists.

2. All would-be candidates must be made aware that in Ontario we conduct our examinations in English and that they must be prepared to be able to take the examinations — written and oral — in English. This ability to converse in English was also desirable for communication with patients.
3. All would-be candidates should be informed that insofar as Ontario is concerned there are, for practical purposes, no facilities available for re-training. The dental schools would admit to advanced standing an insignificant number and these are admitted only after a competitive examination to qualify for the very few spaces available.

Candidates for advanced standing are admitted to the University of Western Ontario only if they have a graduate degree or its equivalent, and wish to be teachers or research workers in clinical diagnosis. First priority in the schools is obviously given to Canadians. The special circumstances of the Czech dentists could not be expected to be repeated since it was only by a series of fortuitous circumstances that space and instructors were available.

Based on these points certain practical suggestions were made and agreed upon. It is to be hoped that all these significant measures will be implemented promptly with resultant benefit to all the individuals and organizations involved.

The President and Registrar attended the 1970 Workshop of Dental Examiners and Dental Educators of the A.D.A. in Chicago on February 13-14. Several thought-provoking suggestions in regard to expansion of duties of Dental Auxiliaries and continuing education of dentists emerged from the discussions and papers presented. The experience of the state of California

with regard to licensure of foreign dentists should be of interest to this Board.

III

Recently a meeting was held with Dr. Aldis, Medical Director of OHSIP to make known to him some of the dentists' misgivings and problems with regard to the limited dental benefits available under this Insurance Plan. Our reception was friendly and helpful and some practical suggestions emerged. A meeting of Dr. Aldis and a representative of the O.H.S.C. with the Hospital Services Committee of the O.D.A. was arranged and the Registrar and President attended that as well. A special ad hoc committee of the O.D.A. has been appointed to deal with all aspects of this matter.

Auxiliary Services

Here is a need for positive action on the part of this Board to permit the expansion of the duties of auxiliaries legally and to make provision for their training to assume these additional duties. There exists ample evidence adduced by controlled research of the years to indicate clearly the directions and areas that may be encompassed without detriment to the quality of dental health services provided to the public. Projects designed to explore optimum utilization of properly trained members of the dental health team are essential and should be initiated promptly. We must at all be wary to guard against the common danger of confusing discussion and intention for action and implementation. We must also be prepared to differentiate between prejudice and conviction in objectively analyzing substantiated evidence.

It is suggested that three measures are required and it is hoped that considerable progress toward their achievement can be accomplished.

1. There should be an adoption of the principle that the dentist is uniquely qualified to care for the dental health of persons entrusted to his care in all aspects of diagnosis and treatment. That he must be prepared to assume responsibility for all treatment and advice given under his auspices by himself or other members of his team. The resolution on auxiliaries submitted to the C.D.A., and twice rejected at that level, could be used as a source for the elaboration of this fundamental principle.
2. There should be formulated an agreement of

the nature and extent of the additional services that may be legally delegated, and the manner of their delegation and their limitations. Due regard must be given to the disciplinary problems which may result.

Existing regulations should be re-examined and reformed if necessary to guard against commercial exploitation, e.g. Section 10, By-laws (b), (d), (e). [Article XIV]

3. The Board must be prepared to give counsel and direction to all schools, colleges and universities which conduct training courses for auxiliaries. The desirability and the attendant responsibilities of permitting only legally qualified persons to perform expanded duties should be meticulously explored. Laws which cannot be equitably and practically sustained should not be enacted.

Specialists and Specialization

It is suggested that it is essential to attempt to enact regulations which can be universally applied and strictly maintained to guide administrative personnel in fulfilling the policies of this Board. One such device would be the requirement that all candidates for specialty licensure in the Province of Ontario be required to successfully pass an examination approved by the Board after completion of a designated program of training. The examination may be set by the Board itself or it may accept the results of examinations set and administered by some designated agency. The Board may properly delegate this function to others who it has satisfied itself are qualified. It cannot however, properly delegate or escape its responsibilities so long as it retains a licensing authority. It is our contention that to delegate examination responsibility without representation on the examining body is an evasion of responsibility. To be specific in the case of the R.C.D.(C) it is felt that this could be the ideal mechanism to suit our purpose in this respect providing there was direct, unequivocal membership in the area of concern to us — namely on the examination mechanism of the College. In as much as, at this juncture, we have no official involvement in the functioning of the R.C.D.(C) it would be unnecessary for any direct involvement in any other sphere of that organization's functioning.

The time is certainly due for a clear cut agreement on the primary principle — namely that an examination should (or should not) be required of all specialty licensing candidates. If the answer is in the affirmative, as we suggest, then there should be no further delay in deciding on an examination mechanism.

Property and Finances and the O.D.A.

The fees exacted for licensure should be of such dimensions as to permit the licensing body to fulfil all its necessary functions. There is no need to budget for surpluses or reserves in excess of those that ordinary prudent business practices would demand. Surpluses, reserves, other assets beyond those prescribed maxima should properly be examined for their rightful ownership. These introductory suggestions are made for your consideration so that these, and other principles, may be utilized in discussing a suggestion dealing with R.C.D.S. property and reserves which will be offered to you at this meeting. (See Section 3, Dentistry Act).

By-Laws

During the hiatus in which we find ourselves while awaiting governmental reports and actions resulting therefrom, it might be worthwhile to anticipate some of the changes we might suggest when the time for revision of the Act is at hand. Such things as —

1. the addition of lay persons to the Board,
2. the statute of limitations
3. codification of the right of privacy in disciplinary hearings
4. statutory control over non-members of the College
5. erasure from Register after a stated number of years of non-registration in the province.

Such items as these which probably require changes in the Act could be discussed in principle and some decisions made even if action must necessarily be held in abeyance. However, there are a number of items of concern in the By-laws which could properly be given consideration to help in our "housekeeping" chores.

1. There are a number of items under Article XIV which elaborate on matters which would be dealt with in a Code of Ethics. A Code of Ethics is an essential of any professional organization and this body should legally express its acceptance of such a code.
2. For many years this Board has concerned itself with the wholesale distribution of announcement cards by members of the College to the laity. The restrictions should be clearly defined and expressed in the By-laws.
3. There has been discussion and concern by Successive Board of the verbiage and interpretation of the phrase "direct control and

supervision" in Section 12, Clause (b) of the Act. Perhaps this Board can properly define this phrase and codify its interpretation in the By-laws. (See the B.C. revised Act).

4. There is no definite direction as to the practice to be followed in cases where a licence is suspended for disciplinary reasons. It would be desirable to have the procedure properly recorded.
5. Special Register has been discussed repeatedly and will be presented as a By-law Amendment at this meeting.

It is hoped that all the foregoing will not be interpreted as unjustified criticism of existing practices nor excessive zeal for change. It is perfectly ob-

vious that given a realization of social, economic, and professional changes that rules, regulations and practices must frequently be altered to cope with them. These changes may be neither desirable nor beneficial, but when they occur then it behooves responsible people to reassess the laws under which they operate. Wherever responsible, it is desirable to retain principles which were first pronounced or gradually developed with wisdom, experience and desirable motivations. Having accepted these it becomes necessary to adopt more malleable practices to accommodate to altered circumstances. Wherever possible, it probably is desirable to attempt to anticipate the effects of the varied influences to which we are subjected. It is hoped that this report will be received in that spirit — as goad and guide and not in any sense as a dictum.

JUNE 1970 BOARD MEETING

Since the last Board meeting nothing of great moment has occurred except possibly the publication and receipt of the Report of the Committee on the Healing Arts. This monumental work and its accompanying resource material is of great significance to the profession and the people of Ontario. The impact of its comments and recommendations will be felt for many years. Generally speaking in our deliberations on this material it will be possible to confine ourselves to the specifically dental sections. The report should be welcomed even if only because, perhaps for the first time, we are given an opportunity to learn how others see us after fairly exhaustive examination. There is much that is controversial, some of it is already dated, many of its suggestions and findings constructive, most of it is accurate, all of it is interesting. Is it because a sensitive dentist reads them that some of the passages seem somewhat patronizing? Do some of the comments and suggestions, particularly in the resource material, indicate a tendency to denigrate the dental contribution to general health and the preparations required therefor? The author makes haste to confess that the vantage point from which he viewed the report may not be completely neutral — perhaps even slightly on a bias.

In any event its delivery into the public domain and its receipt by the government has finally terminated the long period of our waiting and makes desirable the immediate enactment of some of the items which we have held in abeyance, as well as the most profound and careful consideration of some of the less anticipated recommendations. It is not to be expected, we hope, that agreement even in principle, let alone implementation in the

form of legislation, will be immediately forthcoming on all the recommendations. Some of the suggestions will require more investigation and study, but in general, most of the material, after only cursory examination, does not appear to be too controversial nor too far removed from some of the principles which this Board has already discussed and on which some agreement has been achieved.

- I. **Corporations** — Some years ago, the Board was asked to remove the restrictions placed on the profession with regard to professional incorporation. For a variety of reasons only preliminary steps were taken to deal with the subject. In the light of the report of the Committee on the Healing Arts and its specific recommendation, the existing economic situation, and the Federal White Paper on Taxation, this would appear to be an opportune time for the Board to come to grips with the problem and for some decisions to emerge from our deliberations.
- II. **Duties of Auxiliaries** — There is an essential urgency for this Board to state unequivocally its position translated into legislation where indicated — with regard to duties assignable to auxiliaries. It may already be too late for this step to be taken to be of practical value to persons entrusted with the responsibilities connected with curricula for various training centres. Certainly there has been ample opportunity for discussion, experimentation, argument and decision. The history of the Profession in this regard at

least indicates that where new ideas are concerned there is little danger of it contravening the dictum "Be not the first by whom the new is tried." The second part of the couplet reads "Nor yet the last to cast the old aside."

In regard to expanded duties of auxiliaries it is suggested that further study is needed as to how best to employ these expanded services. This, of course, is closely allied, in our view, to an examination of manners and methods of practice. Are there better methods of delivering dental services than the largely prevailing individual unit concept? It should be noted that we are suggesting search for "better" methods. "Better" is the comparative form of the adjective "good". We are aware that some, possibly preliminary, studies have been made along these lines. Is the time not ripe for the Board to encourage further investigations with the definite objective of producing specific recommendations which will be reflected in the near future in teaching and in practice?

In this regard perhaps consideration can simultaneously be given to dental services in under-serviced areas. The profession and this Board are frequently criticized in this regard. One defensive comment frequently offered is that while there may or may not be a shortage of dentists there definitely exists a maldistribution. One wonders why one never hears of a "*maldistribution*" of the population or a maldistribution of the demand for dental services. Certainly there can be no questioning of the affinity of these problems to the maldistribution of education and of individual economic resources that exist.

This Board, last year, undertook to make some study of the subject of overall delivery of dental services. It soon realized that the magnitude and complexity of the problem made thorough investigation beyond its resources. It then decided to restrict itself to what appeared to be the most desperately deprived areas. Some useful, although by no means exhaustive investigations were carried out by Dr. Lewis of the Faculty of Dentistry, University of Toronto. In addition, individuals — dentists and others — familiar with the area and its dental problems were consulted. From these investigations several facts emerged. One was that the dental manpower requirements could (and probably will be this year) be satisfied with the re-

sources available. Secondly, that in many instances where people demand that dental services be made readily available all they really wanted was that when emergencies occurred help would be at hand. That, in many instances, was their total concept of the need for dental services. Frequently, this was allied to general educational and economic conditions.

Thirdly, that it would be economically and practically unsound to provide all the remote areas with a constant supply of the services available in urban centres. Further, more imaginative approaches to the problem are required. Fourthly, that county boundaries are not the same as provincial or national boundaries and that manpower statistics according to counties may be misleading. Fifthly, it is necessary to maintain a record of the age (possibly state of health) of practitioners in centres served by a single dentist or a small number of dentists. Sixthly, there is urgent need to mount a comprehensive program of incremental and preventive services for all children in these areas. Could not the O.D.A. Children's Dental Health Plan be instituted immediately on a trial basis in some of these sections? It would appear to be obvious that any scheme undertaken should be approached as the beginning of a long-range program and not merely a stop-gap.

If investigation and experimentation are to be employed they should be of such a nature as to provide valid information and not merely to prove or disprove a preconceived opinion. The profession should, if it is to be true to its scientific basis, be prepared to receive the information thus adduced. It can, of course, refuse to participate in such experimentation or to accept the recommendations emanating therefrom, but its objections should be solidly based and not merely be reflections of prejudice or bias. It is probably true that the profession as a whole is opposed to entrusting the dental health of any segment of our population to the unsupervised ministrations of persons with lesser qualifications. It is anticipated that an educated public would resent such an expedient and deem it unacceptable.

III Fees — A few years ago, this Board had no Complaints Committee. Today it is one of the most active committees of this Board. Perhaps it is doing some of the work that was formerly handled by local Mediations

Committees, although these continue to function. In spite of the fact that the Registrar refers many of the matters he receives to the Committee, a great deal of his time is spent in dealing with similar matters which he judges to be within his competence. These problems are increasing in number. There are probably a number of reasons for this — not all of them bad. Many of these complaints have to do with fees. Section (ca) of Article I of the Dentistry Act reads in part "Infamous, disgraceful or improper conduct in a professional respect includes exorbitant charging of fees." Complaints in this category are infrequent, but should not this Board record what is to be its criterion for fees? There exists an O.D.A. Fee Schedule which includes a Preamble with instructions for its proper utilization. Is it fair to the public? Do we accept it as our guide? Is it the reference to which the Registrar should have recourse when the occasion demands? Additional questions, which require answers, must suggest themselves to us as we ponder the problem.

IV Examinations for Foreign Dentists — Until that millennial day arrives when all dental schools throughout the world can be properly investigated and accredited it will continue to be part of the duty of the Board to assess the qualifications of applicants for licensure in Ontario from graduates of foreign dental schools. The overtures made to the N.D.E.B. by this Board for its participation in this area of our responsibility is seemingly about to bear fruit. This is a development to be enthusiastically welcomed and rigorously pursued to its culmination.

In addition, there are now available the results of the first comprehensive examination for foreign licensure applicants. This information together with the experience of the instructors from the Canadian Forces Dental

Services with the Czech dentists should be of considerable value in projecting our future courses after they have been studied and assessed.

Should the Board at this time initiate measures with the object of establishing a training centre which would offer courses to familiarize foreign applicants with our standards and methods? This centre could also be utilized as a training centre for certain categories of dental teachers and would be available for remedial training for members of the profession requiring it. In addition, it could be used as a centre for postgraduate courses. In time these rather modest beginnings might burgeon into more elaborate areas but it would appear — superficially — that such preliminary steps could be taken with relative ease.

V Dental Education and the Board — It is agreed that much of the ambiguous and meaningless legislation regarding control of dental education could be removed from the Statutes without in any way derogating from the quality of dental education made available. However, the report of the Committee indicates appreciation of the need for active involvement in the practical elements of the curriculum (see page 126, Vol. 2).

To this end, it is suggested that this Board take steps to have legislation enacted requiring representation from it on the Faculty Council of any Faculty of Dentistry in any University in Ontario.

This report has become lengthier than was the original intention. It is expected that most of the time at this meeting will be taken up with discussion of the Report of the Committee on the Healing Arts. However, most of the material contained herein will be relevant thereto.

NOVEMBER 1970 BOARD MEETING

There are a number of items of concern to this Board which have been discussed at different times without final resolution. In some instances there was an understandable refusal to act while awaiting the Report of the Committee on the Healing Arts. Now that this deterrent has been removed, there is no justification for further delay. It has been suggested that a Board whose term is about to expire should not make decisions on matters whose oversight and implementation will be the responsibility of its successors. On the

other hand, it is also frequently and rightly argued that it takes some time for a Board member to become acquainted with its modus operandi and the background and pertinent data surrounding the various matters with which it concerns itself. Most of these subjects have been discussed repeatedly at Board and Committee meetings, and the College deserves to be the beneficiary of the efforts and experience of the members of the Board before it makes way for its successors.

Here are a few of these items:

1. Delegation of duties to auxiliary personnel;
2. Training of assistants in x-ray procedures;
3. The circumstances under which laboratory technicians may be permitted to assist in taking shades;
4. Reconsideration of the last portion of Paragraph 4, Section 4 of The Dentistry Act;
5. Amendment of Paragraph 2, Section 4 of the Act to make it mandatory that only those members of the College who are Canadian citizens shall be eligible for membership on the Board of Directors of the College;
6. A need to re-examine the terms of reference and perhaps even the name itself of the Complaints Committee has manifested itself from the experience of the Committee;
7. It may be desirable to codify the procedures to be followed when a licence is suspended for disciplinary reasons;

There are indications for a need to re-examine those aspects of our Disciplinary Act dealing with enquiries into professional conduct, to ensure that all required legal safeguards are employed. Every effort must be made to establish procedures and practices which will ensure that justice and equity will not be frustrated by some technical derangement;

8. A repeated and continuing dereliction with

which successive Boards have had to deal is the wholesale distribution of announcement cards. The relevant by-laws dealing with this matter should be strengthened and clarified if indicated;

9. There should be present in our By-laws a reference to a Code of Ethics to guide practitioners which may be used in assessing conduct;
10. This Board will be asked to consider a number of other matters in its detailed consideration of the Report of the Committee on the Healing Arts. It is confidently anticipated that the Board will assume leadership in those areas which are its responsibility;
11. There are two other items that perhaps merit consideration by the Board of Directors. Would this Board have any role to play or any responsibility to discharge in the face of a threatened strike (withhold of services) or in an actual strike by members of the profession? There probably exists no precedential body of legal opinion or experience since the expedient is perhaps of comparatively recent origin. It is conceivable that some Board in the not too distant future may be challenged to assess its legal requirements;
12. With the burgeoning demands and interest in continuing education not only for members of the profession but for assistants, hygienists and dental technicians, perhaps steps should be taken to investigate the suggestion offered a few years ago for the appointment of a Director or Co-ordinator of Continuing Education.

COMPLAINTS COMMITTEE REPORTS

R.A. CLAPPISON, D.D.S.
CHAIRMAN

APRIL 1970 BOARD MEETING

1. Since the last report to the Board, the Committee has met three times officially. The Registrar-Secretary has on many occasions, aided by the staff, ably answered queries and solved problems avoiding action of the Committee in those matters.
2. Correspondence and discussion appeared to satisfy a complaint by a patient regarding alleged unsatisfactory service and the inflexible attitude of a practitioner.
3. Misunderstanding by a patient of the proposed treatment, and the progressive increases in the final estimate as treatment progressed, led to a breakdown in relationship. On review of detailed self-designed charting by the patient, and on examination of the patient and discussion with patient and dentist, an arrangement was arrived at that permitted a resumption of treatment.
4. Dissatisfaction with services entailing construction of partial dentures led a patient to withhold partial payment of the account. Upon review of the case and upon discussion with patient and dentist, the disagreement was solved by a reduction of the fee.
5. Construction of anterior crowns following an accident to a youth was the basis for complaint by a parent. The size and appearance were not satisfactory since crowns were utilized in a situation where some orthodontic treatment may have been indicated. Since the parents were not willing to return to the dentist and since the crowns required remaking, a partial return of the fee was suggested to the practitioner to enable the patient to proceed with re-treatment. An unusual aspect of this case was that the insuring body was involved as it had paid the initial fees.
6. A breakdown in patient/dentist relationship followed numerous broken appointments and neglect on the part of the dentist to proceed, even though he had received fees for which treatment was not completed. Fault on both sides and a lack of appreciation of each other's position has thus far led to an impasse. The matter is to be reviewed at the next Committee meeting along with a direct confrontation with both parties.
7. Disagreement regarding an amount billed to a patient for fees in addition to the amount allowed by an insuring body, was the basis for review. Dissatisfaction with the service was an additional factor that delayed settlement. After correction of the aesthetics of the treatment, and after explanation by the Committee of the fee structure, an agreement was reached.
8. The Committee was requested to aid in attempting to settle a complaint against a dentist who had performed occlusal correction which the patient complained had resulted in pain and other discomfort. A settlement had been offered by the insurance company on behalf of the dentist, but

this did not cover the costs the patient claims to have settled. The patient has been requested to substantiate her costs and then the Committee will attempt to arbitrate her problem.

9. A patient's complaint of fees in excess of what she anticipated, and the fracturing of a lingual cusp of a tooth under endodontic treatment, led to an official complaint. Discussion with the dentist resulted in a reduction in fee to the amount of the laboratory account. This was done as an attempt to settle the matter. The patient was not willing to meet the Committee as she thought it would be to no avail.
10. Three anterior crowns with exposed margins, due to recession, and unmatched shade and size caused a patient to register a complaint. The dentist agreed that the periodontal condition should have been completed before construction of the crowns and to settle the affair agreed to cancellation of the outstanding balance of the account and a refund to the patient of a moderate sum.
11. A sequel to item 6 of the November 1969 report of the Committee resulted in the partial refund of fees because of the failure of the posterior abutment.
12. Restorations in deciduous teeth were the cause of complaint when the same teeth were exfoliated two weeks later. As this situation was repeated in the same mouth the dentist agreed not to press for payment of the account. The dentist's method of diagnosis of such conditions was reviewed by

the Committee and changes were suggested.

13. A complaint against the same dentist mentioned in (12) regarding an unsuccessful attempt at root canal therapy was dismissed because the radiograph submitted by the dentist showed an obstruction in the canal — explaining the dentist's inability to gain access.
14. A counter-suit as a result of a wage garnishee action was settled by the agreement of the dentist to dismiss the fee. The practitioner was to be complimented because a solution to the problem was practically impossible. The dentist appeared to be more in the right than the patient who had been unco-operative and negligent in her commitments and presentation for treatment.
15. A patient's complaint of an improperly fitting partial lower denture was apparently solved by the agreement by the dentist to remake the case for a minimal sum on payment of an outstanding balance for non-related services.
16. An ill-conceived attempt in a Toronto newspaper, at what the practitioner described as a public relations article for the benefit of the profession resulted in a reprimand by the Committee for a violation of the code of ethics in regard to unpermitted advertising. The practitioner was warned that any further such action would be most severely dealt with.
17. A similar reprimand was given to a practitioner who gave an interview which was published in a Toronto magazine.

JUNE 1970 BOARD MEETING

1. Since the last report to the Board, the Committee has met twice. The Registrar-Secretary and the Chairman have met several times for discussion and to implement actions.
2. After discussion with the committee, a dentist agreed to reimburse a dentist selected by the College to correct problems with a complete upper denture and a partial lower denture.
3. Dissatisfaction with the shade and shape of four anterior crowns led a patient to the Complaints Committee after settlement could not be reached through a local Media-

tions Committee. The practitioner agreed to waive the balance of the account provided the patient would return the crowns upon the remaking of the crowns by another practitioner. This settlement was satisfactory to the patient.

4. A complaint of long standing has been settled by an agreement to accept the return of \$375.00 to the patient because treatment was not completed. This problem points up the need to meet problems with patients promptly and if a patient is not co-operative to face the issue firmly and swiftly in order to prevent a complete breakdown of patient/dentist relations. Had the practi-

tioner and the patient been more definite with each other, the situation may have been prevented.

5. The fracture of a ceramic veneer and the difficult attitude of the patient involved the committee in an otherwise routine problem. Because of the patient's attitude, the dentist would not further treat the patient but was willing to meet the costs of another practitioner's treatment.
6. The referral of a patient to another practitioner for root canal therapy, without proper education of the patient to the service, and the further complication of a broken instrument led to a complaint to the committee. The committee suggested a reduction in fee and this was done by the practitioner, but since the reduction was by no means magnanimous, the committee seeks a further reduction in fee.
7. A complaint alleging improper use of medications, negligence in obtaining a complete radiographic diagnosis and insulting behaviour against a practitioner involved correspondence and interviews with a lawyer, and the patient, dentist and his dental nurse. There appeared to be a wide variation in the evidence presented by the practitioner and the patient and, in order to settle a very unhappy situation the dentist agreed to forego the remaining fee as a public relations gesture.
8. A complaint regarding a lengthy appointment and an unsuccessful attempt at root canal therapy was resolved by the examination of the radiograph of the involved tooth. This tooth presented anatomical obstructions that made treatment worth the attempt but likely unsuccessful.
9. One of the bright spots in the committee's activities was a letter thanking the committee for help. "I am grateful for the existence of the Complaints Committee. Even if the results had gone against me, at least I had the chance to air my views." Such a letter from a patient makes up for some of the others from dentists and patients.
10. An incorrect decision regarding a radiograph for root canal treatment resulted in improper treatment. On review and on discussion with the dentist it was agreed that the dentist would be responsible for the fee for re-treatment by another practitioner.

11. The committee was asked to review fees submitted by a dentist for examinations and diagnoses to a government agency. It was the opinion of the committee that the department involved was obliged to enforce the regulations of that particular department regarding its fee schedule.
12. An interview to a local newspaper produced another of those unprofessional reports with a photograph of the dentist in the operatory and reference to the dentist's skill and equipment. The apology and the explanation and comments were accepted but not without the warning of the consequences of a similar act.
13. A similar, but more obnoxious newspaper report was dealt with in a similar manner. The claimed ignorance of the profession in the approved manner of granting an interview points out the urgent need for tightening the regulations regarding unprofessional conduct.
14. Examination of a patient regarding denture services showed the need for rebasing and resetting the upper denture. Since the patient had not settled all of her account it was recommended that she do so and that the dentist perform this service to correct the problem. Dentist and patient agreed on this arrangement.
15. Mediation most often settles complaint situations but infrequently the committee can see no solution to the problem in that the facts presented by the patient and the dentist are so different, and there is no certain way of testing their authenticity. A complaint regarding crowns, partial dentures, restorations, extractions and diagnostic services resulted in civil action and the committee concurred that perhaps the only way to decide the issue was in the courts.

The committee did, however, aid in settling one aspect of the case in that it reviewed the radiographs of a child of the complainant and concurred in the original diagnosis which was in dispute.
16. A disagreement over a small amount charged for diagnosis and adjustment and polishing of a denture was settled when the dentist, in order to settle the disagreement, waived the fee.
17. An upper fixed bridge was found to be

defective in many areas and because the fixed restoration had not served the patient properly the dentist was advised to return the fee since the patient would not return for treatment.

18. A disagreement regarding a denture, removal of teeth and periodontal surgery persuaded the patient to refrain from paying the balance of his account. The dentist turned the account over to a collection agency which continually annoyed the patient for payment. The patient became very emotionally involved with the continual phone calls and contacted the College in an attempt to have them stopped.

The Complaints Committee assessed the problem and requested the Secretary-Registrar to advise the dentist to have the collection agency stop the action as the patient had a legitimate complaint. The Committee suggested the dentist waive the balance of the account, as the patient would

not return for treatment, and also refund an additional sum to provide for the correction of the problem.

19. Treatment involving services provided by three different practitioners brought the patient to the committee for an opinion. It would appear that the first practitioner provided treatment that was improperly constructed. The second practitioner further treated the case and it failed. The third practitioner has now completed the case satisfactorily. The committee is continuing to investigate the treatment. The patient's main complaint is the fact that the second dentist guaranteed his services and on that basis the patient decided to attend him for treatment rather than another dentist she had sought an opinion from at an earlier date.
20. The committee is grateful to the staff and the Registrar-Secretary for their able and abundant aid to the committee.

NOVEMBER 1970 BOARD MEETING

1. Since the last report to the Board, the Committee has held two meetings and the Chairman and the Registrar-Secretary have met several times to discuss cases and implement action.
2. A dentist sent out approximately two hundred cards to the residents of an apartment building, announcing the arrival of an associate into his practice. This matter was brought to the attention of the Committee and after correspondence and an interview the Committee was satisfied that the problem was minor and the dentist did not realize the seriousness of his action. He was warned that a repetition of such violation would be dealt with much more severely.
3. A complaint regarding complete dentures resulted in a recommendation of slight changes in treatment and design which apparently have satisfied the patient.

The patient also complained about the sum of money he received for scrap gold left with the dentist for refining. The patient complained that the dentist had a great deal of gold scrap in his possession and this left doubt in the patient's mind that he received full value for his gold.

4. Unsuccessful orthodontic treatment was the

cause of complaint by a parent against a practitioner. The dentist countered with the complaint that the parents did not bring the patient in for treatment, as required. The return of a sum of money and the signing of a release by the patient brought the matter to a conclusion.

5. The lack of a complete treatment plan and of a final estimate created a situation whereby a great deal of misunderstanding arose between a patient and the dentist. The patient complained also that the services rendered caused other teeth to fracture. Many of the complaints were ungrounded and the appreciation of the patient for dental services left much to be desired. This unhappy affair points out the need for a final estimate, even when a preliminary one has been made, and of the need for a complete treatment plan, not one covering only one area or service.
6. Unsatisfactory complete porcelain crowns and the formation of an abscess at the apex of one of the teeth initiated a complaint against a practitioner. Upon discussion with the dentist and examination of the patient, further complications were discovered in treatment rendered in other areas of the mouth. The dentist agreed to return the deposit paid but the Committee awaits evi-

dence of the findings of the present dentist to see if this agreement is adequate.

7. Four dentists over a period of two years attempted to provide complete dentures which would be satisfactory to the patient. Each dentist made an effort to provide the required service and one dentist constructed three upper dentures and two lower dentures. Nevertheless, none were successful and upon investigating the patient's physical and emotional history the Committee feels that the profession has a duty to see that the patient has recourse to expert treatment, as a final attempt to satisfy the needs of a patient with great difficulties. The Committee and the Registrar-Secretary have taken steps to implement such treatment.
8. A very difficult and perplexing patient with an anti-professional attitude persuaded a practitioner to remove the metal point from a treated root canal because she claimed it was producing headaches. This he did against his better judgment. The patient claimed immediate relief from the procedure but because he had prepared an orifice for access to the canal in an acrylic splint and because both the acrylic crowns in the splint subsequently fractured, the patient is now claiming return of all monies paid for the services back to and including the original root canal treatment. Legal action is threatened and while the Committee feels the dentist is not negligent, they recommended return of the fee to settle an unsatisfactory situation.
9. A dentist was interviewed concerning the placement of a $3\frac{1}{2} \times 5\frac{3}{4}$ inch announcement of practice. His excuse was that he had delegated the placement to an auxiliary. He was reminded that this was not a valid reason and that he was totally responsible.

This same dentist had also participated in an interview with the newspaper which resulted in a good-sized article with a photograph, listing the name and address of the dentist. The dentist again claimed no responsibility for what the newspapers print. He was reminded that had this action taken place after the Registrar-Secretary had again warned the profession about such interviews by letter and through the Journal of the Ontario Dental Association, the matter would have been referred directly to the Discipline Committee. This should serve as a warning of the decision of the Committee to deal harshly with such offences in the future.

10. A complaint of unnecessary restorations was brought to the Committee, and upon reviewing the records and the radiographs of the dentist, he was cleared of any over-treatment of the patient. The dentist had been generous in his fee assessment, and the Committee recommended that the patient pay the dentist the amount owing.

The Committee thanked the staff for their assistance in the affairs of the Committee during its term, and special gratitude went to the Registrar-Secretary for his continual efforts to handle the enquiries of the public regarding their dental problems.

The Committee also thanked the local Mediations Committees of the local societies for capably averting large problems by dealing with them successfully at the local level.

As a result of recommendations made by the Complaints Committee, the Board agreed that the revised Code of Ethics should be inserted in its entirety in the Ontario Dental Manual and that consideration be given to changing the name of the Complaints Committee to the Review Committee.

DISCIPLINE COMMITTEE REPORT

J.D. PURVES, D.D.S.
CHAIRMAN

1. As a result of a hearing of the Discipline Committee on October 28th, 1969, Dr. Lorne Bruce Brunton of 145 Wellington Street, Sarnia, Ontario was found guilty of the charge of improper conduct in a professional respect in his conduct in respect of two patients.

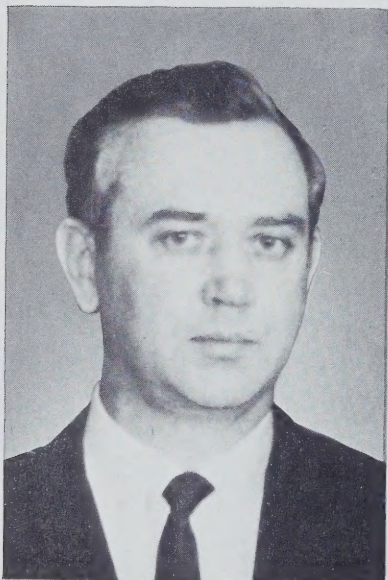

The defendant was given the following penalty:

- (i) He was given a reprimand;
- (ii) He was charged with the cost of the hearing;
- (iii) He was fined the sum of \$500.00.

2. As a result of a hearing of the Discipline Committee on February 27th, 1970, Dr. Sheldon Rose of 229 Balsam Avenue, Toronto, Ontario was found guilty of the charge of infamous, disgraceful and improper conduct in a professional respect.

The defendant was given the following penalty:

- (i) His licence to practise was suspended for a period of four months;
- (ii) He was assessed the costs of the hearing (\$1,484.49).

EDUCATION COMMITTEE REPORTS

R.W. EDWARDS, D.D.S.
CHAIRMAN

APRIL 1970 BOARD MEETING

1. MEMORIAL LECTURES

Whereas the administration of the Memorial Lectures is now shared by the R.C.D.S. and the two Faculties of Dentistry, the Committee recommends that both Faculties be approached through the proper channels to take over the conducting of these courses, with a grant of \$500.00 from the R.C.D.S., on the condition that the original criteria determined for said courses be maintained.

The original criteria —

- (1) a participation course;
- (2) of a week's duration;
- (3) by a clinician from outside the province of Ontario.

The Board approved the recommendation that the Faculties of Dentistry at the University of Toronto and the University of Western Ontario be

approached to assume the conducting of the Memorial Lectures. The courses will alternate from year to year between the two Faculties with an annual grant (of up to \$500.00) available. The original criteria of the courses will be maintained.

2. DENTAL HYGIENIST AND ASSISTANT COURSES

The Education Committee recommended that the courses for dental hygienists be transferred to and established in C.A.A.T. Colleges in communities where there is at present a Faculty of Dentistry; and

That the dental assistant courses in high schools be phased out gradually; with the equipment being transferred to the C.A.A.T. Colleges; and

That dental assistant graduates of C.A.A.T. Colleges be registered with the R.C.D.S. and be designated "Registered Dental Assistants".

The Board agreed that as the R.C.D.S. is concerned about the desirability of perpetuating dental assistant courses at the secondary school level, the Ontario Department of Education be requested to evaluate the present courses in dental assisting in respect of the quality of the product and the availability of employment opportunities for the graduates.

The Board also agreed that courses in dental assisting should be mounted in a greater number of Colleges of Applied Arts and Technology at the earliest possible moment. However, the Registration and Licensure Committee were requested to study the question of designating graduates of these courses "Registered Dental Assistants".

The Board agreed that courses in dental hygiene be mounted in C.A.A.T. Colleges, in addition to the diploma course at the University of Toronto.

NOVEMBER 1970 BOARD MEETING

1. 1970 MEMORIAL COURSE

Although numerous applications were received, due to limitations only ten members of the profession could be accepted to participate in the crown and bridge course conducted by Dr. Henry M. Tanner of Los Angeles held at the University of Toronto from August 31st to September 4th, 1970.

2. CONTINUING EDUCATION CENTRE

Further to a resolution passed by the R.C.D.S., viz:

"Whereas the Board of Directors of the Royal College of Dental Surgeons of Ontario believes there is a need for a major centre for (a) continuing dental education, (b) training for foreign-trained dentists seeking registration, and (c) remedial training for dentists whose services are less than adequate; therefore be it resolved that the Education Committee be requested to enter into discussions with the Minister of Health to identify for him the need for the establishment of a major dental centre for retraining and continuing education, and to seek from him his views in respect of government capital and operating support for such a centre" —

The Committee had discussed this with Dr. Reid, Director of Research and Planning, Department

of Health for Ontario. Dr. Reid stated that the Government would possibly have to move into this difficult area on a step by step basis, and suggested that he approach the people concerned and submit recommendations. He felt that the R.C.D.S. could provide the Government with worthwhile advice on continuing education and its recommendations would receive sympathetic consideration.

3. COMPULSORY CONTINUING EDUCATION

The Committee recommended to the Board that whereas it has been estimated that the half life of dental knowledge is seven years; and whereas the Committee on the Healing Arts has recommended that dentists periodically prove to the R.C.D.S. of Ontario that they have maintained a satisfactory level of competence in the areas of dentistry that a dentist ordinarily practises; and whereas it is the responsibility of the R.C.D.S. to guarantee to the public the competence of the dental practitioner; that the Board of Directors of the R.C.D.S. write into statute the provision that a dentist be re-licensed to practise only if he has provided proof of fifty hours of acceptable postgraduate education within a period of three years, commencing January 1972.

The Board amended the recommendation as follows and the Government and Licensure Committee were requested to write this provision into the R.C.D.S. By-laws —

Whereas dentistry renews its knowledge every fourteen years;

Whereas it is the desire of the R.C.D.S. to continue to upgrade the competence of the dental practitioner;

Therefore be it resolved that the Board of Directors of the R.C.D.S. write into its by-laws the provision that a dentist be re-licensed to practise only if he has provided proof of fifty hours of acceptable postgraduate education within a period of three years, commencing January 1972."

4. DENTAL AUXILIARIES — EXPANSION OF DUTIES

The Committee recommended that whereas an increase in the demands for dental treatment has been intimated; and whereas there is an interest on the part of government bodies and others in the expansion of duties of dental auxiliaries so as to provide more dental services; and whereas it is hoped that this expansion of duties of auxiliaries will lessen the ever-increasing costs of provision of these services to the public; that the R.C.D.S. go on record as recommending the expansion of the duties of presently recognized dental auxiliaries, provided that —

- (a) The Auxiliary be properly and formally trained in the provision of these services;
- (b) That these services be compiled into a list, subject to revision by the Board of the R.C.D.S., so that no doubt exists as to the legality of the provision of these services by the stated auxiliary.

The Board referred this matter back to the Education Committee for further study.

5. NEED FOR THIRD DENTAL SCHOOL IN ONTARIO

The Committee recommended that the R.C.D.S. approach the Department of Health or appropriate Government agencies with a request that they provide the funds necessary to enable an agency outside the profession to carry out a survey to establish whether or not there is a need for a third dental school in Ontario at this time or in the fairly near future; but that should these Government agencies indicate that they are not prepared to provide the funds for an independent survey, they then be requested to conduct a survey to determine whether or not a new dental school is required at this time.

The Board comment regarding this matter follows recommendation No. 29 of the Committee on the Healing Arts — See page 42.

6. DENTAL SEMINARS 1970 - 71

The Committee recommended that, inasmuch as the customary training grant has been received from the Department of Health for the purpose of conducting dental seminars in 1970-71, that the seminars for 1970-71 be held in Pembroke, Sudbury, Niagara Peninsula and Thunder Bay and also that the seminars be conducted this year by clinicians from the Faculty of the University of Western Ontario.

The Board concurred with this recommendation.

7. SCHOOL OF DENTAL HYGIENE

The Committee presented minimum requirements for the approval of a School of Dental Hygiene.

The Board approved these requirements.

UNIVERSITY OF TORONTO

FACULTY OF DENTISTRY
P.G. ANDERSON, D.D.S.
ACTING DEAN

1. INTRODUCTION

The Session 1969-70, which ends June 30th, has indeed been a busy year, not only from an academic point of view, but as well from the many changes that have come about by virtue of the movement of personnel and the discussions, frustrations and problems related to University Government. This year might be called the "Year of the Deans". Since the last report from the Faculty of Dentistry, University of Toronto, we have lived through the resignation of one Dean, the administration of an Acting Dean and the appointment of a new Dean. The loss of Dean Ellis as chief administrator, in the middle of the year, created a few problems of administration, but these have all been taken care of mainly because Dr. Ellis made provision for returning to the Faculty from time to time to carry out so many of the duties with which he alone was familiar. The Acting Dean is particularly grateful for this assistance and indeed the position would have been practically untenable without the tremendous help that Dr. Ellis has given throughout the past six months.

2. STAFF-STUDENT RELATIONSHIPS

The Faculty of Dentistry must consider itself fortunate in that it did not experience many of the problems that existed in other parts of the University. Our students were particularly co-operative in all staff-student relationships and we experienced nothing but complete

co-operation. At no time were there any demonstrations to undermine our relationship and I can only observe that many of the discussions we had with students and the decisions that were made, such as the inclusion of students on many of our committees and also a limited number on the Faculty Council, has resulted in nothing but good end results for the whole faculty structure.

3. COMMISSION ON UNIVERSITY GOVERNMENT

The Government of the University of Toronto is on the threshold of major changes. Being an integral part of the University, the Faculty of Dentistry will be involved in these innovations. The first stirrings of change occurred in 1966 when the Duff-Berdahl Report was published. Following this the President of the University, in consultation with the President's Advisory Council, conceived the idea of forming a commission to study and report on Government of the University of Toronto. At first there was considerable discussion and disagreement on the composition of this commission, but finally an acceptable structure was decided upon.

The Commission was composed as follows:

The President of the University
Three undergraduate students
One graduate student

Four members of the academic staff;
in addition there were four non-voting members,

two of whom were members of the Board of Governors and two were graduates elected to the Senate.

The Commission held over 145 meetings, in all parts of the University. It invited, and received, representations from many sectors of public and academic life in Canada and the United States, as well as representatives from virtually all constituencies within the University. In October 1969 it produced the monumental work which has come to be known as the "CUG Report".

The CUG Report suggested far-reaching changes in University Government at all levels. It consisted of 107 recommendations with preambles and discussion on each of them. The contents of this report were received with mixed feelings.

Shortly after the publication of the CUG Report the President held a meeting of Deans and Principals or their representatives and he expressed a desire to get the opinion of all sectors of the University on this report. In consequence Senate, Faculties, student organizations, staff organizations and bodies connected with the University, submitted briefs. The diversity of these briefs made it obvious that the CUG Report could not be accepted by the President in the form in which it was presented and it was felt that there should be an attempt to obtain a University-wide opinion. With this end in view the University-wide Committee on University Government was formed with the CUG Report as a basis for discussion but with a free hand with regard to their ultimate presentation.

The University-wide Committee consisted of four groups, comprising forty persons in each group. These groups were — (1) the student body; (2) the academic staff; (3) the academic administrators, non-academic administrators and support staff; and (4) the alumni, non-university components on the Senate, officers from organizations associated with the University and ten members of the Board of Governors. The Governors, however, did not take their seats. In order to get fair representation the University was divided into different constituencies and the Faculty of Dentistry with several other faculties formed one component of a particular constituency.

As a result of the voting the Faculty of Dentistry has no representatives on the administrative side and the support staff side. There was, however, one student elected and two staff members (Dr. C.D. Beierl and Dr. H.G. Poyton) elected to the academic group.

Some of the main decisions of the

University-wide Committee were the principle of unicamerality and structure of the top governing structure. The Committee voted overwhelmingly in favour of the abolition of the present Senate and Board of Governors and the establishment of a unicameral body referred to as the top governing structure.

In the end it was decided to recommend that this top governing structure consist of 72 persons representing administration, faculty, students, support staff and lay people, with the faculty ratio to students of three to two. The Committee felt that faculties should have considerable freedom to govern their own affairs providing the policies were within the overall principles stated by the top governing structure. Alterations to the form of the faculty's internal structure and government would require the approval of the top governing structure.

The findings of this Committee will be prepared for presentation as a new University of Toronto Act. The future of the report beyond this stage is a matter of conjecture but it is believed that this will then be presented to the President who, if he finds it suitable, will forward it to the Department of University Affairs of the Government of the Province of Ontario. At this stage it may be accepted, rejected or modified.

4. OFFICE OF THE DEAN

During the month of November the Vice-President of Health Sciences, University of Toronto, informed the Faculty of the need for expansion in the activities in the Health Sciences, in which Dentistry is a significant and integral part. The proposition was advanced that because of the multiplicity of problems and situations which necessitated a more closely working Health Sciences unit within the University structure, the services of Dean Ellis were needed within that division. After considerable discussion, Dean Ellis was invited to join that staff as Chairman of Health Sciences, University of Toronto. After due consideration Dean Ellis accepted this position which left the Faculty of Dentistry with the problem of selecting a new dean. In the meantime Dr. P.G. Anderson was invited to serve as Acting Dean from January 1st until the end of June, when a new dean would have been selected. In December a committee of nine, with Dr. John Hamilton, Vice-President of Health Sciences, as Chairman, was set up. On this committee there were four representatives from the Faculty of Dentistry. Widespread notice was given of the vacancy and suggestions for candidates for the position were solicited in many areas. After many meetings a selection was made and on May 28th, 1970, Dr. Gordon Nikiforuk was named as Dean

Elect of the Faculty of Dentistry, his duties to begin on July 1st, 1970.

5. UNDERGRADUATE AWARDS

The Medical Research Council provided a grant of \$24,000.00 for Summer Scholarships for students working in the Faculty research laboratories during the summer months.

6. RESEARCH GRANTS PROVIDED BY THE MEDICAL RESEARCH COUNCIL 1970-71

Dr. R.C. Burgess	\$14,800.00
"The organic matrix of developing dental enamel"	
Dr. D.W. Lewis	\$10,000.00
"Statistical consultation and analysis unit"	
Dr. A.T. Storey	\$ 8,960.00
"Initiation and modulation of portal reflexes"	
Dr. A.R. Ten Cate	\$13,500.00
"Ultrastructural investigation of tissue changes associated with tooth eruption and genesis of epithelial attachment"	
Dr. C.D. Torneck	\$ 7,500.00
"Factors related to the reaction and repair of the dental pulp in response to injury"	
Dr. D.G. Woodside	\$14,000.00
"Continuing Studies of Mandibular Growth rate and direction in a population of Canadian children"	
Dr. A.H. Melcher	\$17,000.00
"In vitro organ culture of mouse mandible on chemically defined medium"	
Dean's Grant	\$15,000.00
"Towards cost of research program (2nd year initiated by Dr. D.C. Smith)"	

OTHER GRANTS

Department of National Health and Welfare

Dr. R.G. Ellis	
Dr. D.W. Lewis	\$38,045.00
"Evaluation of Interceptive Orthodontics (Including studies into periodontal disease and adolescent human physical anthropometrics)"	

Province of Ontario Health Research Grants

Dr. R.G. Ellis	\$12,800.00
"Burlington Growth Study Records"	
Dr. H.G. Poyton	\$ 2,000.00
"Radiation Dosage"	

National Cancer Institute of Canada

Dr. J.H.P. Main	\$11,410.00
"Investigations into Viral Oncogenesis"	

Ontario Cancer Research Foundation

Dr. H.A. Hunter	
Dr. D.L. Anderson	\$ 3,700.00
"Oral Cytology Service in Ontario"	

7. FACULTY ORGANIZATION

At the request of Faculty Council, the Nominations Committee selected a committee for a study

of the Faculty's organization. The committee is chaired by Dr. Kreutzer.

The duty of this committee will be to carry out a study of the present organization and structure of the Faculty of Dentistry, taking into account its relationship with other divisions of the university and to report its findings to Faculty Council including, if they wish, appropriate recommendations.

8. SUB-COMMITTEE ON DENTAL CARE DELIVERY

In May of 1969 an ad hoc committee of the Ontario Council of Health was appointed to examine the reports to Council on dental health matters to identify the proposed improved arrangements within the system of delivering dental health services to the citizens of Ontario and to propose suitable demonstration models designed to test the practicability of changes in the delivery of dental care in the province.

The sub-committee was chaired by Dr. A.B. Hord and included as one of its eight members, Dr. D.W. Lewis from this faculty.

9. FACULTY COUNCIL NOTES

The Faculty Council has set up a Structure and Organizational Committee. With the number on staff increasing year by year and alterations coming by virtue of ever changing approaches to teaching and dental instructional content, it was necessary to bring about a clearer blue print of areas of responsibility, integration of projects in teaching and a general outline of overall methods of communication of Faculty efforts.

The Session 1969-70 was the first in which the new Rules and Regulations of the Faculty of Dentistry were in operation. These were approved by Faculty Council in the spring of 1969. These have been found very satisfactory.

The inclusion of three undergraduate students on Faculty Council has been continued, with the addition of one graduate student this session.

The most recent changes in the Faculty's regulations give these students full membership status on Council, excepting when Council is considering examination results.

Another change made very recently will open all regular Council meetings to observers from our student body and support staff, although they will not have the right to speak or vote.

10. OPEN HOUSE

Open House, or visiting day, was held as usual in

February, and there were 1,700 visitors to the Dental Building. For some reason the attendance at this event remains high. The interest in the displays and demonstrations seems to increase each year.

11. ACKNOWLEDGEMENTS

The Ladies' Auxiliary to the Academy of Dentistry continues to support the Faculty in providing generous financial assistance for dental treatment for needy children with serious dental problems. The Dental Alumni Association supports several Faculty projects, particularly those related to students. The Canadian Fund for Dental Education gave each of the Canadian schools a grant for "special" projects. To these

organizations and many individuals we offer grateful appreciation.

Speaking for the Faculty of Dentistry, the Acting Dean is indeed grateful to the Board of the Royal College of Dental Surgeons for its many considerations and thoughtful acts of assistance during the past year. Particularly, may I mention your Secretary, Dr. Kenneth Pownall, and thank him most sincerely for all his able and wise counsel during so many of our discussions. May I add too, his attendance record was so near perfect that even the Acting Dean could find himself embarrassed if too close an attendance comparison were to be made. Again my sincere thanks.

UNIVERSITY OF WESTERN ONTARIO

FACULTY OF DENTISTRY

W.J. DUNN, D.D.S.
DEAN

A. EDUCATION

1. Undergraduate Program in Dentistry Accredited

On 21-24 October 1969, the Survey Team of the Council on Education of the Canadian Dental Association visited the Faculty of Dentistry for the purpose of preparing a report in respect of accreditation for ultimate consideration by the Survey Policy Committee and its parent Council on Education. The Survey Team had been supplied with comprehensive resource material covering all aspects of the academic and research programs, the administrative structure and the physical plant. The task of the Survey Team was to assess the total program in the light of the *Minimum Standards for the Approval of a Dental School* as approved by the C.D.A.'s Board of Governors.

The Survey Team, subsequent to its on-site visit, produced a draft report which was referred to the dean for the purpose of validating factual material only. The report was then considered in depth by the Survey Policy Committee before it was presented, with recommendations, to the Council on Education. The Council on Education, during its February 18-20 meeting, reviewed the report from its Survey Policy Committee. As a result of the foregoing the undergraduate dental program of the Faculty of Dentistry was fully accredited. It was recommended by the Council on Education, in view of the fact that the clinical program is not yet operating close to full capacity, that the Faculty should seek a further survey probably in 1972-73.

The survey report contained many recommendations and a small ad hoc committee has been

established to assure that each of them is carefully and conscientiously reviewed and considered. The Faculty is required, within one year of the date of accreditation, to report to the Secretary of the Council on Education the actions taken or decisions made in respect of the recommendations.

2. Curriculum Under External Review

The Committee on Undergraduate Dental Curriculum is engaged in a constant review and innovation of the undergraduate program. To this end, the committee has engaged Dr. J.A.B. McLeish, Executive Vice-Chairman of the Professional Educational Project of the Ontario Institute for Studies in Education. Dr. McLeish possesses a wealth of experience in higher education with particular interest in professional and continuing education. He has examined the Objectives of the Undergraduate Program, the Interim Curriculum and Course Syllabi. He has held formal and informal discussions with faculty, students and administration. His report will be forwarded by the Committee on Undergraduate Dental Curriculum to Faculty Council in the fall of 1970.

3. Admission Requirement Amendments

Until this year, students applying for admission to the first year of dentistry from the second year of pre-professional studies were required to come from the "science stream". Senate agreed to an amendment making it possible for applicants from Arts and Social Science, as well, to be considered. The new regulation is as follows:

"Students are eligible to apply for admission to the Faculty of Dentistry of The University of Western Ontario when they have successfully completed

at The University of Western Ontario, or at other universities where comparable programs are offered, two years of university study beyond the level of Ontario Grade 13, or its equivalent, provided that satisfactory standing is achieved in at least the work of one year in each of Biology, Chemistry, Physics and Organic Chemistry."

4. Advanced Standing Regulations

In the light of the amendments to the by-laws of the Royal College of Dental Surgeons of Ontario, which now make it possible for any dentist, who can provide evidence that he is a graduate of a university dental school, to apply directly for licensing examination, it was considered propitious that the Faculty's regulations on advanced standing be reviewed.

It was agreed there was no longer a justification for providing a major portion of an undergraduate program for dentists who did not require a dental degree from an accredited dental school in order to become licensed to practise. The advanced standing provision, however, was retained to make it possible for foreign trained dentists who aspire to academic dentistry and demonstrate that they possess the appropriate attributes and who have completed a graduate program or its equivalent at an acceptable level of achievement, to acquire the degree of an accredited North American dental school.

The Senate gave approval to the new advanced standing regulations which embrace the following requirements:

- (1) the applicant must be one whose dental qualifications are such that he possesses a registrable qualification in Ontario;
- (2) the applicant must have demonstrated an acceptable level of achievement in a graduate program or its equivalent;
- (3) the applicant can only be considered for admission to the Second Year;
- (4) the Second Year be undertaken by the candidate on the distinct understanding that it will be a probationary year and
- (5) the Doctor of Dental Surgery degree of The University of Western Ontario be not obtained in less than two academic years.

5. Admissions — 1969-1970 Academic Year

The Committee on Admissions reviewed a total of

295 applications for the 42 places available in the first year. For various reasons, sixteen applications were ruled ineligible. Of the 279 eligible applications, 92 demonstrated an academic average of "B" or higher in the final year of "pre-dental" studies.

Forty-two students were admitted to the first year. The class' academic average for the year immediately prior to admission ranged from 70.0 to 88.0 with a mean of 76.4. Seventeen students have degrees. Ages range from 20 to 27 with the mean being 22.

The R.C.D.S. Centennial Admissions Scholarship was awarded to Mr. Keith G. Mochizuki.

6. Advisory Committee to the Faculty of Dentistry

The second meeting of the Advisory Committee to the Faculty of Dentistry was held on 26 November 1969. There were 19 members present representing The University of Western Ontario, Royal College of Dental Surgeons of Ontario, Canadian Dental Association, Ontario Dental Association, London and District Dental Society, National Dental Examining Board of Canada, Royal College of Dentists of Canada, three affiliated teaching hospitals, the London Board of Education's Dental Service and the Dental Service of the Department of Veterans Affairs. Dr. Harvey W. Reid was again elected Chairman.

The Advisory Committee employed the Annual Report of the Faculty as the resource document on which the agenda was based. The members of the committee asked probing questions and several informal comments and suggestions were offered. The Advisory Committee advanced three specific recommendations to Council:

- (a) That the Faculty, if it believes that a period of mandatory internship following completion of the senior year of the program is desirable, offer definitive proposals in respect of how and under what auspices such a procedure could be effected.

Action: A report entitled "Mandatory Internship Prior to Licensure" was prepared and presented to the Executive Committee of Council on 23 February 70. The Executive Committee received the report and referred it to the Committee on Undergraduate Dental Curriculum for appropriate consideration. The Com-

mittee on Undergraduate Dental Curriculum was requested to report to the Executive Committee at its April 70 meeting any relationship the said report may have to the policies and procedures currently under study by C.U.D.C. On 27 April 70, C.U.D.C. reported that all clinical departments were opposed to the mandatory internship prior to licensure, as proposed. The Executive Committee, in turn, ratified C.U.D.C.'s recommendation that "the provision for mandatory internship as proposed not be pursued at this time."

- (b) That the Faculty, as it develops its graduate programs in clinical disciplines, be cognizant of the Committee on Education of the Royal College of Dentists of Canada, such committee being willing to render any assistance of which it is capable.

Action: The Division of Orthodontics, now in the process of developing a graduate program, is cognizant of the R.C.D.(C) committee and will be consulting it as plans evolve.

- (c) That in view now of the existence of ten chapters in Ontario of the Academy of General Dentistry, the Faculty be encouraged to expand its program in Continuing Education.

Action: The Committee on Continuing Education announces the following eight courses to be presented in the 1970-71 academic year:

1. September 25, 1970 — Utilization of the Dental Assistant
2. October 30, 1970 — Class V Powdered Gold Restorations
3. November 27, 1970 — Composite Restorative Materials
4. January 22, 1971 — Endodontics, One Appointment Technique
5. February 19, 1971 — Pin-Retained Amalgam Restorations

6. April 16, 1971 — Intravenous Premedication
7. March 5 and 26, 1971 — Orthodontics, Headgear Therapy in General Practice
8. April 26 - 30, 1971 — Occlusal Correction of Natural Dentition

7. Class Size

Council authorized the Admissions Committee for the 1970-71 academic year and thereafter, to admit a class not exceeding 52. The physical resources of the Dental Sciences Building were designed for a full class of 52.

8. Students' Performance

History was again made in this youthful Faculty when, on 8 May 70, the first students of the Faculty of Dentistry were recommended for their degree of Doctor of Dental Surgery. The Senate, at its meeting on 25 May 70, approved the recommendations and on 29 May 70 seven students were presented to Convocation for the first D.D.S. degrees ever awarded by The University of Western Ontario. To Dr. Morley P. Bodnar went the honour of being Western's first graduate in dentistry.

9. National Dental Examining Board of Canada Examinations

The written examinations of the NDEB were conducted for the fourth year students from the 18th through the 20th of March, 1970. All members of the graduating class wrote the examinations and all were successful.

10. Trimester System

Council received a comprehensive report from an ad hoc committee it established "to consider the desirability, feasibility, implications and possible ramifications of a trimester system for the Faculty." The committee, because of a paucity of available data, was unable to make a firm recommendation to Council. The report, however, was received for the significant information value it possesses and should it be necessary or desirable to re-activate consideration of the Trimester System, this report will serve as an effective resource document from which further studies or investigations may be made.

11. Graduate Program in Orthodontics

In March 1970 Council approved, in principle, the establishment of a Master of Clinical Dentistry program in Orthodontics. The action of Council was based on a report prepared by the Chairman of the Division of Orthodontics, Professor W.S. Hunter. Planning is going forward in the hope that the program may be instituted in September 1971.

12. Dental Hygiene Program — Commencement Date

For reasons beyond its control, Council was required to recommend postponement of the commencement of the four-year baccalaureate program for dental hygiene for one year. It is now proposed that the first year (in the Faculty of Science) be launched in September 1971 with the second year (first of three years in the Faculty of Dentistry) commencing in September 1972.

It is confidently expected that University Hospital will be completed by the summer of 1972 thus permitting the present users of the Dental Hygiene suite (Physiotherapy and Nursing) to vacate prior to September 1972.

B. RESEARCH

13. Research Support

The following research operating awards have been made by the Medical Research Council and apply in respect of the MRC fiscal year 1 April 70 to 31 March 71.

Dr. P.G. Dellow	\$13,000.00
"Oral inputs and responses and their central nervous relationship"	
Dr. D.G. Gardner	\$ 5,500.00
"Studies on the oral tissues in certain systemic disorders" "The salivary glands in experimental mercury poisoning"	
Dr. A.J. Gwinnett	\$ 5,000.00
"Adhesives and dental caries prevention"	
Dr. W.S. Hunter	\$ 1,800.00
"Timing, amount, and variability of human facial growth"	

The following research operating awards have been made by the Ontario Department of Health and apply to the Department's fiscal year 1 April 70 to 31 March 71.

Dr. L.N. Johnson	\$ 4,400.00
"Dental Silver Amalgam"	
Dr. R.E. Jordan	\$ 7,300.00
"Remineralization of Dentin"	

C. GENERAL INTEREST

14. Guidelines in Respect of Public Statements
The Executive Committee of Council received for transmission to all members of the Council of the Faculty of Dentistry "*Guidelines in Respect of Public Statements Involving the Faculty of Dentistry*".

15. Annual Public Lectures

The second Annual Public Lecture was held on 26

March 70 in the Dental Sciences Building. An appreciative audience was privileged to hear Dr. R.M. Grainger, former Chairman of the Division of Dental Research of the University of Toronto and, at present, Director of Research for the Association of Canadian Medical Colleges. His subject was "Dental Science in the University of the Future."

16. Faculty of Dentistry Open House

The Faculty of Dentistry Open House for interested prospective students of dentistry was held on 22 November 69. While the attendance was not large the group of students visiting the Dental Sciences Building appeared to have a sincere participating interest in the program.

17. Ontario Dental Association's Honorary Members' Prize

Council extended congratulations to Mr. Dwight F. Saunders of the Class of 1972 on winning the O.D.A. Honorary Members' Prize. This prize of \$40.00 is awarded to the undergraduate dental student writing the best article of a cultural nature which is published in an undergraduate journal of the Ontario Faculties of Dentistry. Dr. D.C. Way, an O.D.A. Governor, presented the prize to Mr. Saunders on 22 January 70 congratulating him on his article "*The Dentist — A Member of Society*" which appeared in Volume 3, Number 1 of The University of Western Ontario Dental Students' Society Journal.

18. Professor W.H. Feasby elected University Senator

Professor W.H. Feasby — Chairman of the Department of Paediatric Dentistry — was elected by the Council of the Faculty of Dentistry as its representative to the Senate for the 1969-71 term to succeed Professor J.A.F. Stevenson, Chairman of the Department of Physiology.

19. Joint Student Committee of Health Sciences

One of the more interesting student developments was the establishment of the Joint Student Committee of the Health Sciences for students in dentistry, medicine, nursing and physiotherapy. The purpose of the committee is to provide a means of communication among the various Health Sciences' Student Councils; to organize social activities and to regulate the utilization of the Health Sciences' Student Lounge and Games Room.

The first chairman is Mr. Robert D. Gillan of Second Year Dentistry.

20. Division of Oral Pathology

The Councils of the Faculties of Medicine and Dentistry concurred in a recommendation from

the Department of Pathology to establish a Division of Oral Pathology. It is expected that Senate will act affirmatively on this joint proposal. Dr. D.G. Gardner will be Chairman of the Division once it is established.

21. Ladies' Auxiliary — St. Joseph's Hospital

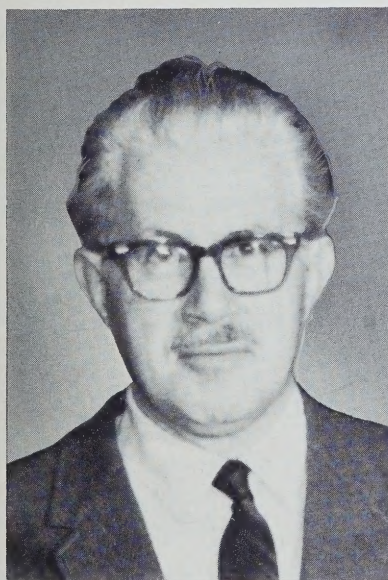

In addition to a most generous grant which made the equipping of a dental operatory possible at the time the Department of Dentistry was established in St. Joseph's Hospital, the Ladies' Auxiliary, in February 1970, donated \$5,000.00 to the Department of Dentistry for additional capital requirements. The Faculty of Dentistry is most grateful for and expressed its sincere appreciation to the Ladies' Auxiliary of St. Joseph's Hospital for this most welcome and gracious action.

22. Appreciation to the Board

It would be inappropriate to conclude this report

without a word of deep and sincere appreciation to the members of the Board of Directors for their many effective contributions to Western's Faculty of Dentistry. The relationship which exists in Ontario between the legal body of the profession and the dental schools is one which has invariably been characterized by a mutuality of interests and shared concerns for the quality of dental practice.

The tangible assistance so generously and in so many ways provided by the Board is a source of grateful appreciation for this Faculty. While, as a consequence of the Report of the Committee on the Healing Arts, we may expect certain future legislative enactments to alter, to some extent, the formal structure which exists, it is our sincere hope that this Faculty may, in the future, as it has in the past continue to enjoy and benefit from the concerned and participating interest of the Board.

FINANCE AND PROPERTY COMMITTEE REPORT

D.A. CHEETHAM, D.D.S.
CHAIRMAN

1. O.D.A. FINANCES

The Committee agreed that the O.D.A. must have additional funds to —

- (a) function adequately — without deficit
- (b) create a necessary reserve
- (c) enlarge their services in certain fields
- (d) pay for increased costs over which they have no direct control — increased postal and telephone rates; general staff pay increases; increase in rent; increased costs of general purchases, e.g. printing.
- (e) pay increased yearly grant to the C.D.A. and possibly to the component societies, and
- (f) pay an honoraria to members for *special* services.

The O.D.A. Finance Committee had suggested that they require \$180.00 per dentist commencing in 1971.

The O.D.A. Committee stated that for the period specified (five years) they wish to continue the present system whereby the R.C.D.S. collects the funds and disburses the required amount to the O.D.A.

Prior to the collection of the increased licence fee, the O.D.A. will inform the membership of the necessity for this move and for the division of the funds making up the \$225.00, i.e. a portion designated to the R.C.D.S., O.D.A. and C.D.A.

The Finance and Property Committee recommended to the Board that the licence fee be \$225.00 commencing in 1971. They requested that, should the Board concur, the Secretary be instructed to submit this proposal to the Government immediately.

The Board deferred this matter for consideration at the June 1970 meeting.

2. HEADQUARTERS BUILDING

Several minor adjustments to the new addition at

230 St. George Street were proposed along with several equipment and furnishing purchases.

The Board approved these proposals.

The Finance Committee was requested, by the Board, to consider the desirability of establishing a reserve account, to be identified as such.

The Budget, which follows, was approved by the Board.

RCDS BUDGET 1971

RECEIPTS	ACTUAL 1969	BUDGET 1970	ESTIMATE 1970	BUDGET 1971

GOVERNMENT AND LEGISLATION COMMITTEE REPORTS

W.J. DUNN, D.D.S.
CHAIRMAN

APRIL 1970 BOARD MEETING

1. Special Register

As directed by the Board of Directors, the Committee submitted the following By-law concerning the establishment of a Special Register:

REGULATIONS SPECIAL REGISTER

General Provisions

Unless otherwise stated, the following provisions shall be applicable to all persons registered in the Special Register.

Initial registration is until December 31st next following the date of registration; thereafter each such registration is subject to review and renewal annually for the calendar year according to the provisions under "Duration and Termination of Licence" page 00 of these Regulations. Registration is subject to the restrictions, limitations and conditions applicable by the terms of these Regulations.

Fees payable:

Annual Licence Fee — shall be that which applies under the By-law for licensure.

Registration Fee — \$100.00 except for Classification II, III for which there is no fee

Documentation Fee — \$25.00, except for Classification I, II, III for which there is no documentation fee

Registration does not include the right to charge or accept professional fees except as provided in these Regulations.

Those registered are not entitled to prescribe drugs regulated by the Narcotic Control Act or the schedules under the Pharmacy Act and the Food and Drugs Act, except in the cases and to the extent stated below.

Those registered are not entitled to be nominated as Directors of the Board or to vote at the election of members.

The Special Register shall be divided into the Classifications designated below, and the names of those registered shall be entered under the appropriate Classification.

The Certificate of Registration and Renewal Certificate issued to each registrant shall state the privileges, restrictions, limitations and conditions applicable to his registration.

CLASSIFICATIONS

Classification I: Dentists holding Academic Appointments.

Registration on the Special Register may be granted to a dental graduate of an approved school, college or university who has a full licence to practise in another jurisdiction and who holds a full-time appointment on the Faculty of Dentistry of a university in Ontario, provided that he

is paid full salary of rank and his work is limited to consulting practice, teaching and/or research. A person so registered may charge or accept fees for his professional services provided such services are within the terms of his full-time appointment. He is authorized to prescribe drugs regulated by the Narcotic Control Act, the Food and Drugs Act and the Pharmacy Act.

The Board of Directors may grant full registration on the Register without examination to a dentist who has demonstrated for five consecutive years clinical competence while registered under this classification on the Special Register and who has held an appointment in a Faculty of Dentistry in Ontario.

Classification II: Dentists taking Temporary Employment:

A dental graduate of an approved school, college or university in Australia, Denmark, Ireland, New Zealand, Norway, South Africa, Sweden, the United Kingdom or the United States of America or who is licensed to practise in one of the other Provinces of Canada, may be registered on the Special Register provided he fulfils the following requirement: viz.

Holds a full-time appointment in a hospital in Ontario and is recommended to the College by the Board of Trustees and the Chief of the Dental Staff of the Hospital.

A person so registered may:

- (1) Prescribe drugs regulated by the Narcotic Control Act and the schedules under the Pharmacy Act and the Food and Drugs Act.
- (2) Be assessed for and granted privileges in a hospital or Faculty in the manner outlined by the said institutions and in accord with the By-laws of this College.

A person so registered may not:

Receive professional fees.

Registration shall be annual. The registration of a person so registered may not be renewed more than once, except by authority of the Board.

Classification III: Dentists in the Armed Forces or the Public Service of Canada.

Registration on the Special Register may be granted to a dentist who is fully registered and in good standing as a dental practitioner in another Province of Canada while stationed or resident in

Ontario in the course of his duties. Every applicant shall be sponsored by the Officer-in-Command of the Dental Services of the Branch of the Canadian Forces in which the applicant is serving, or the Head of the Branch of the Public Service in which he is employed.

A person so registered is authorized to prescribe drugs regulated by the Narcotic Control Act and the schedules under the Pharmacy Act and the Food and Drugs Act in so far as such authority is necessary for the proper performance of his duties.

Those so registered shall not engage in private practice except that if stationed in an area in which the services of a private practitioner are unavailable or inadequate for the needs of the community, may engage in private practice only in the area determined by the Registrar and only to the extent reasonably required to provide proper dental care for the residents of the area. He may make reasonable and proper charges for his services. His private practice privileges may be terminated by one month's notice, if, in the opinion of the Registrar adequate services of a private practitioner become available in the area.

Classification IV: Special Cases.

Registration on the Special Register may be granted by the Board of Directors to persons to whom the provisions of the foregoing classifications are not applicable. Each such applicant for registration shall be considered individually on his merits, and registration, if granted, shall carry such privileges and be subject to such restrictions, limitations and conditions as the Board of Directors may specify in its resolution authorizing registration.

Registration under this Classification may be granted to an applicant who —

is a dental graduate of an approved school, college or university in Australia, Denmark, Ireland, New Zealand, Norway, South Africa, Sweden, the United Kingdom, the United States of America, or is licensed to practise in one of the other Provinces of Canada.

A person so registered may charge professional fees, prescribe drugs regulated by the Narcotic Control Act, the Food and Drugs Act and the Pharmacy Act.

Classification V: Probationary Registration.

- (a) Upon direction that the name of a member

be erased from the Register for any cause other than non-payment of fees, the Board may at the same time by resolution direct that the name of such member be entered upon the Special Register with such privileges and subject to such restrictions, limitations and conditions as the Board of Directors may specify in such resolution.

- (b) Upon the application for reinstatement by a person whose name has been erased from the Register other than for non-payment of fees, the Board of Directors may by resolution direct that his name be entered upon the Special Register with such restrictions, limitations and conditions as the Board of Directors may specify in such resolution.
- (c) Upon the application for reinstatement by a person whose name has been suspended from the Register on account of mental illness or other reasons of incapacitation, the Board of Directors may by resolution direct that his name be entered upon the Special Register with such privileges and subject to such restrictions, limitations and conditions as the Board of Directors may specify in such resolution.

DURATION AND TERMINATION OF LICENCE

Each registration and renewal thereof shall be valid only during the period stated in the certificate of registration. Every registration shall terminate and be of no effect —

- (a) Upon its expiration, if not renewed;
- (b) Upon the registrant failing to pay the registration or renewal fee for a period of two calendar months after the same is due and payable and such fee still remains unpaid after one month's notice by registered mail to the registrant at his last address shown on the Register. The Registrar shall thereupon erase the name of the registrant from the Special Register and notify him by registered mail that his registration is terminated;

- (c) Upon the registrant ceasing to reside in Ontario or to be eligible for registration because of any changed circumstances, qualification, appointment, employment or service;
- (d) Upon discovery that the registrant's registration was granted or renewed as a result of false or misleading statements made by the registrant or by others relating to his application for registration or renewal;
- (e) Upon breach by the registrant of the restrictions, limitations or conditions applicable to his registration;
- (f) By direction of the Board of Directors after disciplinary proceedings against the registrant.

2. Per Diem Allowance

As directed by the Board of Directors the Committee submitted the following By-law concerning the per diem allowance for Directors:

Be it enacted and it is hereby enacted a By-law of The Royal College of Dental Surgeons of Ontario:

THAT Article XV, Section 1 be amended as follows:

Section 1 —

Each Director and each member of a committee of the Board in attendance at meetings of the Board or in attendance at approved Committee meetings shall be paid \$100.00 for each day in attendance, and \$100.00 for each additional day necessarily spent in travelling from and returning to his home. \$50.00 shall be paid for each half-day in attendance, and \$50.00 for each half-day necessarily spent in travelling from and returning to his home.

The Board directed the Secretary to take the necessary steps for these amendments to be incorporated into the R.C.D.S. By-laws.

NOVEMBER 1970 BOARD MEETING

1. The Committee directed itself exclusively to the recommendations of the Committee on the Healing Arts in respect of dentists and dental care personnel.
2. The Committee enjoyed and benefited from a useful exchange of views with representa-

tives of the Dental Hygienists and Registered Dental Technicians who had attended a committee meeting. While no limitations were placed on the range of discussions, the recommendations of the Committee on the Healing Arts bearing particularly on the interests and concerns of each of the two

groups were the topics of emphasis in the Committee's two separate discussions.

3. The Committee decided to divide its task into two parts, the first of which essentially constitutes the appendix to this report. It seemed appropriate to the Committee, having had its judgment informed by the exchange of views with the Dental Hygienists and the Registered Dental Technicians and having had several weeks following the interim reaction of the Board of Directors to consider the forty-two recommendations of the Committee on the Healing Arts, to provide, for the further consideration of the Board, a significant elaboration of the comments made in June 1970. In some instances, the Committee's further consideration has resulted in no change in response. In respect of some recommendations modified or expanded responses are proposed. In respect of a view of the recommendations, the Government and Legislation Committee proposed an altered response.
4. Following the Board's adoption of Appendix A either as presented by the Committee or as amended by the Board, it is the Government and Legislation Committee's intention, in consultation with the Board's Solicitor, to draft an amended version of the Dentistry Act of Ontario based on the principles to which the Board gives concurrence.

This amended statute, it is proposed, will be presented to the next meeting of the Board.

5. The Government and Legislation Committee has many matters, not encompassed in the Report of the Committee on the Healing Arts, to which it must direct its early attention. The importance of the implications and possible consequences of the C.H.A. report, however, has made it necessary for the Government and Legislation Committee to assign highest priority to this facet of its responsibilities. It is contemplated that the Committee's next report will address itself to these other matters as well.
6. The Committee recommended that the Board of Directors approve the content of Appendix A to the November 1970 Report of the Government and Legislation Committee, and that the Government and Legislation Committee be authorized to avail itself of the legal services of the Board's Solicitor to the end that the principles enunciated in Appendix A be employed as the basis for the drafting of a new proposed Dentistry Act of Ontario, such draft to be presented, for consideration, to the next meeting of the Board.

The Board amended Appendix A to the Committee's report and the revised, approved version follows.

APPENDIX A

RECOMMENDATIONS RE DENTISTS AND DENTAL CARE PERSONNEL FROM THE REPORT OF THE COMMITTEE ON THE HEALING ARTS

1. That the Royal College of Dental Surgeons of Ontario discontinue the practice of making grants from licensing fees collected by it either to the Ontario Dental Association or to the Canadian Dental Association, that the voluntary nature of these latter two professional organizations be recognized by the elimination of its being a condition of receiving a licence that a dentist be a member of, or financially support, either of these two associations.

COMMENT: Agree. The licensing fee should not include an amount which can be construed as the dues of a voluntary organization. Because, however, of the priority interest of the R.C.D.S. in the quality of the dental services received by the public, it should not be proscribed from making grants to voluntary associations, if the Board of Directors so directs, for specific undertakings such as dental school accreditation, dental research, dental public health, etc. What is important is that there should be no 'corporate' relationship between the Royal College of Dental Surgeons of Ontario and any voluntary dental organization which represents members of the dental profession.

2. That the dental hygienist be recognized as an important member of the dental care team, and that existing university diploma programs be expanded to increase the number of hygienists trained.

COMMENT: The Board of Directors of the Royal College of Dental Surgeons of Ontario recognizes that the Dental Hygienist is an important member of the dental care team. The number of hygienists should be increased and their duties should be expanded. It is recommended that in addition to any university dental hygiene programs now in existence or which may be mounted in the future, dental hygienists receive their education and training within Colleges of Applied Arts and Technology in programs which meet the standards for accreditation.

3. That there should be no restriction regarding the number of hygienists that may be employed by a dentist, and that the Royal College of Dental Surgeons be required to repeal its by-laws imposing such a restriction.

COMMENT: Agree

4. That the Ontario Council of Health examine the possible utilization of the dental nurse along the lines of the New Zealand or English type and report its findings to the Department of Health with recommendations for specific measures.

COMMENT: The R.C.D.S. is already engaged in studies bearing on the duties of allied health personnel and favours the expansion of duties of existing auxiliaries.

5. That the Royal College of Dental Surgeons be required to abolish its restrictions on the practice of dental specialists that prevent them from practising general dentistry.

COMMENT: Agree that specialists should not be required by law to limit their practice to the area of their specialty.

6. That the regulations under the Public Hospitals Act be amended to require that qualified dentists, particularly in dental specialties, should have access to the use of hospital facilities as required for procedures requiring hospitalization. Dentists should be eligible for full hospital privileges with the right to admit patients and with representation on the Admissions Committee. Dentists should follow the regular hospital procedures and their patients should be subject to the same admission requirements as patients admitted by physicians.

COMMENT: Agree. A dentist, with acceptable hospital credentials, be permitted, in the hospital environment, to render such services as reside within his academic and legal competence. Having regard for the provisions of The Public Hospitals Act and for the General Regulations enacted pursuant thereto, the dentist who has been appointed to the active staff of the hospital must have the right to admit and to discharge patients.

7. That in hospitals where there is a large demand for dental services a separate dental department with a Chief of Dental Services be established, and that in other hospitals the dental services should be under the department of surgery.

COMMENT: In all hospitals where there is a reasonably apparent need for dental services there should be a separate Department of Dentistry with a Chief of Dentistry. If a separate department is not feasible then the Dental Service should be a service within the Department of Surgery. In departmentalized hospitals, dentists who have privileges in Oral Surgery should hold membership in both the Department of Dentistry and the Department of Surgery.

8. That one hospital in Metropolitan Toronto should develop outpatient dental services.

COMMENT: Agree that outpatient dental services should be provided in any hospital where feasible.

9. That every hospital should have one or more dentists as members of the attending staff, preferably including an oral surgeon where possible, to assist the medical staff as required.

COMMENT: Agree that hospitals which do not have dental care services are devoid of an important component of health care services which the hospitals should provide. Dentists, in addition to rendering dental treatment to patients in hospital, do in association with members of the medical staff, make a significant contribution to the total health care of the patient.

10. That a qualified dentist should be given the privilege of treating in hospitals his patients requiring dental care while they are hospitalized for other conditions. This would particularly apply to long-term patients, in convalescent and rehabilitation institutions.

COMMENT: Agree

11. That caution should be exercised to ensure that financial arrangements regarding dental services are such that they do not create an unnecessary demand on hospitals where services could be adequately provided outside the hospital.

COMMENT: Agree

12. That the Dentistry Act be amended and section 13 repealed so that the Royal College of Dental Surgeons of Ontario no longer be empowered to establish entrance requirements for dentistry; also that section 14(1) be repealed to remove from the Board of the Royal College of Dental Surgeons of Ontario control over the curriculum of studies.

COMMENT: Agree that sections 13 and 14(1) of The Dentistry Act be repealed as it is no longer necessary for the Royal College of Dental Surgeons of Ontario to establish entrance requirements for the study of dentistry.

13. That accreditation of Canadian dental schools be undertaken by the Association of Canadian Faculties of Dentistry. If, however, this Association is unable or unwilling to take on this function the Committee recommends two alternatives. The preferred alternative would be to leave the responsibility for accreditation with the Canadian Dental Association Council on Education. A second alternative would be for the Government of Ontario to direct the Department of University Affairs to establish accreditation teams which would be responsible for accrediting Ontario dental schools. In any of the above programs the Committee recommends that financial contributions to the cost of providing accrediting services in Ontario, if necessary, should be made by the Government of Ontario, and that it would be essential, because of the small number of dental schools in Ontario, that several members of the accrediting team be from outside Canada, particularly the United States.

COMMENT: Disagree that accreditation of Canadian dental schools be undertaken exclusively by the Association of Canadian Faculties of Dentistry. Agree with the 'preferred alternative' as the checks and balances implicit in the accreditation mechanism employed by the Council on Education of the Canadian Dental Association recognize the participating involvement of all groups concerned with dental education and, more particularly, the 'products' of the dental education process. The Council on Education and its Committee on Survey Policy are representative of the practising profession, the Association of Canadian Faculties of Dentistry, the National Dental Examining Board of Canada, and the Royal College of Dentists of Canada.

Disagree with the second alternative concerning the Department of University Affairs.

The R.C.D.S. believes that, at least at this time, there is no necessity for financial contributions from the Government of Ontario for accrediting services.

The R.C.D.S. would have no objection to one member of the Survey Team, which makes the on-site accreditation evaluation being a distinguished dental educator from outside Canada.

14. That accreditation of graduate programs in dentistry should also be undertaken by the Association of Canadian Faculties of Dentistry as soon as possible.

COMMENT: Agree that graduate courses should be accredited, but by the mechanism referred to in our comments to No. 13 above.

15. That the Department of Health and the Ontario Council of Health evaluate the advantages of the various pre-dental educational requirements and that university schools of dentistry require not more than the minimum educational prerequisites necessary to produce a satisfactory practitioner.

COMMENT: A 'satisfactory practitioner' may generally be defined as one who is biologically oriented, technically competent and socially sensitive. To create a practitioner who meets these criteria, there must be an adequate period of 'pre-professional' preparation as well as a sound program in the dental school which directs appropriate attention to the sciences basic to an understanding of biological processes, to the 'art' of dentistry and to the application of the art of dentistry. Present pre-professional pre-requisites for the faculties of dentistry in Ontario are reasonable and are no more than consistent with the academic and clinical requirements of the professional programs mounted in both schools.

16. That the Minister of Health of Ontario request that the Deans of faculties of dentistry in Ontario ensure that information concerning applications for entrance to dental schools in Ontario is properly analyzed and that a centralized application procedure for dentistry be developed, such as that now used for admission to most Arts and Sciences faculties in Ontario.

COMMENT: We believe that with only two schools in Ontario the present system meets the requirements, but that admission to dental schools should be facilitated to the greatest possible degree and that this matter should be referred to the two Faculties for their observations.

17. That greater emphasis be placed on preventive dentistry in the undergraduate dental curriculum.

COMMENT: The R.C.D.S. and the Faculties of Dentistry have long since recognized the importance of preventive dentistry and in their activities have done their utmost to promote interest in this area.

18. That steps be taken to make dentistry students more aware of the possibilities and usefulness of dental auxiliaries, including their role in preventive dentistry.

COMMENT: Agree. To implement this concept will unquestionably require funding beyond that of which the present formula-financing scheme is capable. A Faculty of Dentistry, to all intents and purposes, operates what is tantamount to an out-patient department of a hospital. Clinic fees from patients provide for only a very small proportion of the actual costs of clinic operation. The by far greater percentage of the cost of the operation of the clinic must derive through the formula-financing mechanism. Faculties of Dentistry in Ontario, unlike Faculties of Medicine, (a) must operate their clinical teaching programs in their own facilities for whose upkeep and operation they are totally responsible and (b) do not receive salary contributions from the Ontario Hospital Services Commission for full-time clinical teachers of dentistry. In agreeing with this recommendation it must be emphasized that the dental schools have little opportunity to implement it without a recognition on the part of government that additional funding is essential.

19. That a drug formulary be developed for dentists listing the commonly used drugs with which dentists should be familiar, their side effects and other such information as would be required.

COMMENT: Agree - supplemental to what is already in existence.

20. That dental specialty training programs continue to be given under the aegis of the faculties of dentistry.

COMMENT: Agree

21. That the Public Hospitals Act be amended to provide that certain hospitals be required to make the necessary facilities available and permit inpatients and outpatients to be available for the training of dental oral surgeons and periodontists in hospitals.

COMMENT: Section 17 of The Public Hospitals Act of Ontario provides the following:

"Subject to any existing agreement relating thereto, every hospital receiving provincial aid shall provide such facilities as the regulations require for dental students, student dietitians, medical students and interns, students of nursing, student laboratory technicians, student physiotherapists, student occupational therapists, student X-ray technicians and student social workers."

In agreeing with the general principle enunciated in this recommendation, the Royal College of Dental Surgeons of Ontario believes that all public general hospitals which have affiliation agreements with universities which have Health Science Centres should be required to have similar regard for the teaching program — both undergraduate and graduate — of a faculty of dentistry as such hospital has for the teaching program of a faculty of medicine. While it is appreciated that faculties of dentistry operate their own outpatient clinics in their own facilities, essentially for ambulatory patients, it is imperative, if a dental student, either undergraduate or graduate, is to be exposed to a full spectrum of clinical experience that he have access to hospital facilities.

22. That a program for ensuring continuing competence be implemented for dentists and that periodically, perhaps every five years, every dentist in Ontario be required to present to the Royal College of Dental Surgeons of Ontario a certificate from a dental school in Ontario stating that he has maintained a satisfactory level of competence in the areas of dentistry in which he ordinarily practises.
23. That the Ontario faculties of dentistry develop the standards and programs which would be required for such certification; these could include formal course work, a contribution to the profession through research or teaching, or other appropriate methods.

COMMENT: Agree that there is a need to ensure the continuing competence of dentists but emphatically disagree with the recommendations proposed by the Committee on the Healing Arts. Apart from the almost insoluble logistical problem of requiring Ontario's two dental schools to establish mechanisms to evaluate the competence of a total of more than 600 dentists each year, the R.C.D.S. is of the firm opinion that the dental schools should not permit their primary role of teaching and research to become smothered in acting as a licensing examination facility. The dental schools, with appropriate financial undergirding and with the co-operation and support of the profession's legal and voluntary organizations should make every effort to establish broad and comprehensive programs in continuing education.

24. That for the time being the training of dental hygienists continue in universities under appropriate faculties of dentistry but that the course should be shortened to one year after grade thirteen; and that the training programs for dental hygienists be reviewed continually by the Department of Health and the Ontario Council of Health and when feasible be moved from the universities to Colleges of Applied Arts and Technology, at which time an entrance requirement of grade twelve might be considered.

COMMENT: The Royal College of Dental Surgeons of Ontario recommends that the existing educational program for dental hygienists continue in the Faculty of Dentistry of the University of Toronto. There is wide agreement in Canada that a limited number of baccalaureate programs for dental hygienists — probably one in Western Canada and one in Eastern Canada — be mounted in order to provide teachers and senior administrators for educational and public health programs. A baccalaureate program for dental hygienists has been approved in principle, by the Senate of the University of Western Ontario and that university is encouraged to proceed as expeditiously as possible to initiate the program.

The Royal College of Dental Surgeons of Ontario agrees that in addition to the faculties of dentistry colleges of applied arts and technology are appropriate locations in which programs in dental hygiene may be established provided (a) that adequate provision may be made for clinical experience and (b) that such courses meet the minimum standards for accreditation.

The Royal College of Dental Surgeons strongly believes that the minimum period of preparation for the dental hygienist should be two years following Ontario grade XII or equivalent.

25. That appropriate programs be developed by schools teaching dental hygiene to provide refresher and retraining programs for hygienists who wish to return to practice.

COMMENT: Agree. However, to provide the facilities and personnel for such programs will require financial support.

26. That two avenues of gaining qualification as a dental technician should be open: one via an entrance requirement of grade twelve and completion of an approved program at a College of Applied Arts and Technology, and another via the apprenticeship route as at present, but removing the requirement of grade twelve and requiring only grade ten with the additional requirement that the applicant have an adequate knowledge of the English language.

COMMENT: Agree

27. That the Department of Health in conjunction with the Department of Education ensure that every primary school child in Ontario has a dental inspection at least once a year and that provision be made through the public health units for such inspections where they have not been done privately. A report of the inspection together with information regarding facilities where the child may receive appropriate dental treatment should be mailed to the parents of the child. The public health units should ensure that facilities are available for such treatment through either private dentists or public health dental units as appropriate.

COMMENT: Agree with the principle that every primary school child in Ontario should have an annual dental inspection and that the appropriate treatment should be made available. Both the Canadian Dental Association and the Ontario Dental Association have been working assiduously over the past three years toward the development of national and provincial Children's Dental Health Plans. The Royal College of Dental Surgeons of Ontario encourages governmental support for pilot projects based on the principles and plans which have evolved from The Ontario Dental Association's deliberations in respect of the O.D.A. Children's Dental Health Plan.

28. That dentists be permitted to form corporations for the practice of dentistry in Ontario, but that ownership of the shares of such corporations be restricted to dentists licensed to practise in the province of Ontario.

COMMENT: Agree, provided that proper safeguards for the public are enacted.

29. That an additional faculty of dentistry be established in the province of Ontario in a university which presently has a faculty of medicine.

COMMENT: The Royal College of Dental Surgeons of Ontario is unable to assure, at this time, that a third dental school is an early requirement for the Province of Ontario. Admittedly this is a change in position from that held by the College only one or two years ago. But it is obvious that within the past one to three years there has been a significant improvement in the availability of dental services throughout the province. In 1972, The University of Western Ontario will graduate thirty dentists; in 1973 forty; in 1974 fifty-two. These added to the 125 Toronto graduates each year create a significant annual increment even when allowances are made for deaths, retirements and graduate study. Couple this with the significantly increased productivity brought about by technological progress and the estimated increased productivity by the expanded contributions of allied dental health

personnel and it becomes obvious that to proceed apace to establish a third dental school might well be inappropriate. The Royal College of Dental Surgeons believes that the Ontario Department of Health should arrange for a comprehensive, objective study to be undertaken by some competent individual or organization outside of the dental profession to delve, in considerable depth, into all factors which have a bearing on the need for a third dental school in Ontario. If such a study indicates a need for the creation of a third dental school in this province, the Royal College of Dental Surgeons of Ontario pledges its full co-operation.

30. That the university schools of dentistry ensure that adequate financing is available for students wishing to undertake specialty training in dentistry, either through arrangements for them to work part time, through payment in the same way as for medical internes, or through establishment of appropriate fellowship programs; and that the Province of Ontario assist in making such monies available to the universities.

COMMENT: Agree

31. That the Ontario schools of dentistry work towards the establishment of joint examinations with the National Dental Examining Board to eliminate the necessity of two sets of examinations for the dental graduate.

COMMENT: Agree. This has been achieved.

32. That the Royal College of Dental Surgeons of Ontario should establish in conjunction with other licensing bodies and the federal Department of Manpower and Immigration, a Canada-wide system to provide objective evaluation of foreign dental schools; but if it is not possible for such a joint program to be developed at the federal level, Ontario should do so on its own.

COMMENT: While, theoretically, there is much to commend this recommendation, from a practical standpoint it is almost impossible of implementation. The accreditation mechanism for Canadian dental schools has evolved over a period of years and because of such factors as the autonomy of universities, provincial jurisdiction in matters of health and education, and the varying interests of the groups to which the 'products' of the dental educational process have great significance, e.g. National Dental Examining Board of Canada, Association of Canadian Faculties of Dentistry, Royal College of Dentists of Canada, The Canadian Dental Association, all ten provincial dental licensing bodies, the development of the acceptable accreditation mechanism now enjoyed was a long and arduous process. If foreign dental schools are to be evaluated the development of the arrangements necessary to an effective accreditation program would make the complications of the establishment of the Canadian accreditation program miniscule in comparison. By reciprocity, the Council on Education of the Canadian Dental Association and the Council on Dental Education of the American Dental Association accord recognition to the dental schools which each accredits. Thus all United States' dental schools accredited by the A.D.A. Council on Dental Education receive automatic accreditation in Canada.

Ontario is one of the very few jurisdictions in North America in which a graduate of any university dental school in the world may register once having, by comprehensive examination, demonstrated his capacity to practise an acceptable standard of dentistry.

The Royal College of Dental Surgeons of Ontario does not agree with this recommendation of the Committee on the Healing Arts.

33. That the Royal College of Dental Surgeons of Ontario take the initiative to establish a Federation of Licensing Bodies for Dentistry in Canada which could develop national standards for licensing of dentists and provide more flexible interchange of dental personnel between provinces.

COMMENT: This recommendation is not fully understood. The Royal College of Dental Surgeons agrees that there is need for a 'Federation of Licensing Bodies for Dentistry in

Canada' but would contend that the National Dental Examining Board of Canada is competent by performing the function which the Committee on the Healing Arts recommends for the 'Federation'. The National Dental Examining Board of Canada was created by federal legislation and its Council consists of one representative elected by each of the ten provincial dental licensing authorities plus two members elected by the Council on Education of the Canadian Dental Association.

The National Dental Examining Board of Canada now having a meaningful role in the accreditation of Canadian dental schools, from 1971 onwards will grant its certificate to any eligible graduate of an accredited Canadian dental school without further examination. As the N.D.E.B. certificate is registrable in any province in Canada the 'flexible interchange of dental personnel between provinces' of which the C.H.A. speaks may now readily be accomplished.

34. That the Royal College of Dental Surgeons of Ontario no longer be required to prosecute persons for unauthorized practice under the Dentistry Act, but that this responsibility be transferred to the Crown Attorney for the county in which the offence is alleged to have been committed.

COMMENT: Agree. We assume, however, that this does not preclude the R.C.D.S. from investigating independently.

35. That it be mandatory that a dentist submit to his patient an itemized bill showing charges for professional fees and charges for dental appliances supplied; that the Royal College of Dental Surgeons of Ontario should declare as unprofessional conduct any mark-up by a dentist on a dental appliance dispensed; and that a dentist be allowed to charge only for professional services involved in the prescribing, fitting or adjusting of such dental appliances.

COMMENT: The Code of Ethics of the Canadian Dental Association to which the Royal College of Dental Surgeons of Ontario subscribes, provides that a patient is entitled to an itemized account. The R.C.D.S. agrees that the dentist's account, to which laboratory services apply, should be separated into two components (a) the laboratory fee and (b) the fee for the professional services of the dentist.

36. That the fee schedule published by the Ontario Dental Association be a matter of prior negotiation by the Association and the Minister of Health, who would be advised by the proposed Fee Negotiations Advisory Committee.

COMMENT: The Royal College of Dental Surgeons of Ontario avers that the dental fee schedule resides within the purview of the voluntary organization, The Ontario Dental Association.

The Royal College of Dental Surgeons of Ontario, however, reserves to itself, in the interest of the public to whom it is primarily responsible, the right to consider and, if found necessary, to act on the propriety of any fee schedule which is established.

37. That there be representation from the Department of Health and significant lay representation on the Council of the Royal College of Dental Surgeons of Ontario, and that there should also be lay representation on the Discipline Committee of the College.

COMMENT: The Royal College of Dental Surgeons of Ontario offers no objection to lay representation on its Board of Directors. This is, by no means, a significant departure from the principle at present applicable. The Minister of Health and the Minister of Education are, by statute, ex officio members of the R.C.D.S. Board of Directors. It is appreciated, however, that the heavy demands of their offices scarcely permit the extent of involvement envisaged by the Committee on the Healing Arts. The Royal College of Dental Surgeons believes that The Dentistry Act of Ontario should be amended to permit the Minister of Health and the Minister of Education or, preferably, the Minister of University Affairs, each to appoint a full voting member of the R.C.D.S. Board of Directors.

The Royal College of Dental Surgeons would welcome the participation of one of the lay members of its Board of Directors as a member of the Discipline Committee.

38. That the present exception of dentists from the Medical Act continue and that dentists should continue as in the past to be able to use the title "Doctor".

COMMENT: Agree

39. That the licensing of dental hygienists should cease to be a responsibility of the Royal College of Dental Surgeons of Ontario, and instead be made the responsibility of the proposed Health Disciplines Regulation Board through a Dental Hygienists Division, and that in the legislation outlining the requirements for licensing by the Board there be no restrictions regarding sex, age, nationality or citizenship.

COMMENT: In principle, the Royal College of Dental Surgeons avers that the dentist must assume full responsibility for the dental services his patients receive in his office irrespective of whether the dentist renders the services himself or the services are provided by anyone employed by him. Section 11(1) of The Dentistry Act of Ontario provides that the R.C.D.S. Board 'shall make such by-laws as it deems necessary for the proper and better guidance, government, discipline and regulation of the Board (of Directors), the College (R.C.D.S.), the members of the College (dentists licensed in Ontario) and the profession of dental surgery'. There can be no doubt, therefore, that to the extent the services of the allied health disciplines bear on the R.C.D.S. Board's statutory obligations, this Board has a participating interest in and concern for the services which members of the allied health disciplines render. The R.C.D.S. Board, however, has no interest in 'the government, discipline and regulation' of the people who comprise the allied health disciplines. The R.C.D.S. Board, therefore, would support the C.H.A. proposal for the licensing of dental hygienists if this proposal were ascertained, after due study and consultation, to be in the best interests of the public and the profession of dental hygiene.

As the services of the dental health team are best rendered in an atmosphere of understanding and co-operation, consideration might be given to the establishment of an autonomous Dental Hygienists' Regulation Board under the umbrella of the Royal College of Dental Surgeons of Ontario. The R.C.D.S. is by no means promoting this mechanism but does feel that co-operative co-ordination might more readily be achieved through this arrangement than by the one recommended by the Committee on the Healing Arts. The attractiveness of the C.H.A. proposal in which it could not even appear that the R.C.D.S. were attempting to legislate for and collect licensing fees from an allied group not directly represented on the Board of Directors is appealing. To repeat, The Royal College of Dental Surgeons in no way seeks to govern, discipline, or regulate members of the allied dental health professions. The R.C.D.S. would support the creation of a Dental Hygienists' Division of an Ontario Health Disciplines Regulation Board. The R.C.D.S. would accept, if such a recommendation were made, the establishment of an autonomous Dental Hygienists' Regulation Board under the regulatory umbrella of the College.

The Royal College of Dental Surgeons emphatically agrees that 'in the legislation outlining the requirements for licensing there be no restrictions regarding sex, age, nationality or citizenship.'

40. That the Department of Health enact legislation to license dental laboratories in the province of Ontario. Such legislation should include a requirement that all such laboratories be licensed and that they be prohibited from dealing directly with the public. The Health Facilities Board should administer the licensing scheme. No requirements regarding qualifications of owners should be included and corporate ownership of such laboratories should not be prohibited. Regulations regarding quality control, advertising and other matters affecting laboratories should be established, but such requirements should be kept to the minimum required consistent with the public interest. The Health Facilities Board should have the power to suspend a licence, but the conditions under which such suspension might take place should be included in the legislation.

COMMENT: The Royal College of Dental Surgeons of Ontario does not oppose the enactment of legislation to license dental laboratories in the province of Ontario but is uncertain as to what such licensing will accomplish that is not possible through the registration and licensing procedures for individual registered dental technicians.

The Royal College of Dental Surgeons agrees that dental laboratories and dental technicians be prohibited from dealing directly with the public.

The Royal College of Dental Surgeons, while believing that corporate ownership of dental laboratories should not be proscribed, strongly recommends that there should be requirements regarding qualification of owners. The majority of the shares in any corporately owned dental laboratory should be held by registered dental technicians.

It is agreed that regulations regarding quality control, advertising and other matters affecting laboratories should be established, if not through a Health Facilities Board, through the regulations applicable to individual registered dental technicians. It is further agreed that such regulations should be kept to the minimum consistent with the public interest. Any power to suspend the licence of a registered dental technician should have the conditions under which suspension might take place included in the legislation.

41. That dentists should be required to provide a formal prescription to dental laboratories for each item ordered; and that, if dentists ignore this requirement, this should be a matter for disciplinary action by the Royal College of Dental Surgeons.

COMMENT: Agree

42. That dental technicians be certified by the Health Disciplines Regulation Board through a Dental Technicians' Division. The Board should make provision for certifying dental technicians trained outside Ontario, but who have the equivalent education and/or experience, on the basis of their competence. Certification would not be a requirement for the practice of dental technology but only those so certified should be able to use the title "Registered Dental Technician".

COMMENT: The Royal College of Dental Surgeons of Ontario makes a similar comment in respect of this recommendation as it has in respect of recommendation No. 39 applying to dental hygienists.

INSPECTOR'S REPORT

MR. J.H. PAYZANT

PROSECUTIONS – DENTISTRY ACT

19-11-69 Provincial Judge's Court, Ottawa, Ontario

MANELLI, Wilfrid, 31 Solva Drive, Crystal Beach, Ontario

Sec. 23(1)(c) 'supply denture' FINED \$500 i/d payment 30 days imprisonment

Sec. 23(5) 'have dental equipment' FINED \$500 i/d payment 30 days imprisonment

Sec. 23(1)(b) 'take impression' WITHDRAWN
(Subsequent offences, total fines \$1,000 paid)

19-1-70 Provincial Judge's Court, Ottawa, Ontario
SISSON, Allan, 536 Tweedsmuir Avenue, Ottawa, Ontario

Sec. 23(1)(b) 'take bite' FINE \$50

Sec. 23(1)(b) (three charges) WITHDRAWN

15-6-70 Provincial Judge's Court, Sudbury, Ontario

GAZDIC, George, 445 Victoria Street, Sudbury, Ontario

Sec. 23(1)(b) 'take impression' FINE \$50

Sec. 23(1)(c) (one charge) WITHDRAWN

In addition to the foregoing, charges have been laid under Section 23(1)(b), Section 23(1)(c) for offences in the Ottawa and Tillsonburg Districts and Court action is pending.

INVESTIGATIONS

(a) Complaint unhygienic condition dentist's offices (3)

(b) Signs contrary to By-laws (2)

(c) Patient complaint against dentists (5)

- (d) Service of Notice Discipline Committee (2)
- (e) Investigation of Dentist's activities and procedures affecting practice (2)
- (f) Complaint concerning RDT's (5)

Above reported to the Registrar-Secretary and dealt with by referral to Complaints Committee, Discipline Committee or as otherwise indicated.

Complaints concerning RDT's were referred to the Governing Board of Dental Technicians for any action considered necessary by that Board in the circumstances.

GENERAL

Investigations are continuing regarding instances of suspected cases of illegal practice of dentistry in various sectors of the Province.

NATIONAL DENTAL EXAMINING BOARD

J.D. PURVES, D.D.S.
R.C.D.S. REPRESENTATIVE

1. The National Dental Examining Board met in Ottawa, May 4 and 5, 1970.
2. New members to the Board include:
Dr. M. Cipton - replacing Dean J.D. McLean as a representative of the Council on Dental Education
Dr. N. Layton — representing Nova Scotia
Dr. Roger Coulombe — President of the Board of Examiners, Province of Quebec, who was sitting as an observer. He will be replacing Dr. Lindsay Mussels.
3. Dr. Leung reported on the results of the NDEB Examinations —
 - (a) Candidates writing all 6 papers - 210
 - (b) Candidates writing 1 paper (supp) - 1
 - (c) Successful candidates - 200
 - (d) Drop in candidates over 1969 - 48
4. Motions allowing Canadian graduates prior to 1948 to be allowed to sit for the NDEB examinations. Also U.S. graduates presently licensed in Canada, who graduated prior to 1948 are allowed to sit the NDEB examinations.
5. The notice of motion, granting graduates of all accredited Canadian schools to receive the NDEB certificate, was passed unanimously, it reads as follows:

"That because of direct representation on the Policy on accreditation of the Council on Dental Education of the C.D.A. and because of the participation of an NDEB appointee to all survey teams, and because of voting membership on the Council on Dental Education, the NDEB is satisfied that a meaningful voice in the accreditation process exists. The Board therefore suggests that the NDEB certificate be offered to graduates of approved Canadian dental schools, as of classes graduating in the spring of 1971 and thereafter, providing the above conditions are continued. These certificates are to be granted without examination."

Several provinces were not prepared to make the NDEB the only certificate for licensure in their provinces. Alberta and Manitoba have a special problem, in that, the University is the examining agency. However, Ontario and Quebec representing two-thirds of the dentists, concurred.

6. The issue raised by the R.C.D.S. re proportionate voting related to the number of dentists in the province, was declared by legal opinion to be not in accordance with the Act.
7. The Board was split on the decision to offer

hygienists a National certificate. Legal opinion as to its efficacy ranging to the conflict and confusion in the dental hygienists — dental assistant roles, principally in Saskatchewan, were evinced. No definite action was taken.

8. A survey of the desirability of mounting a National certificate in specialty fields, in the event the RCD(C) fail to become a viable entity in this area, was left to your representative to peruse the problem. The motion was carried but with little support (one opposed — 2 abstentions).
9. The examination of Foreign Dentists has

been agreed to, in principle, and the examining committee has been requested to proceed with all necessary arrangements. The fee was set at \$900.00 to be paid on or before March 30th.

10. Dr. Harold Beach retired as Registrar — his pro-tem successor is Dr. Don Proctor.
11. The NDEB now have their own office in Ottawa, with Mrs. Julie Matte as Executive Secretary.
12. The NDEB have had a challenging year, but with its decisive moves, we will hopefully go on to truly be a national examining facility.

ONTARIO DENTAL ASSOCIATION

H.M. JOLLEY, D.D.S.
R.C.D.S. REPRESENTATIVE

1. Request for consideration of an increase in representation from the R.C.D.S. on the Board of Governors of the C.D.A.

The Executive agreed to defer consideration of this request until after the meeting of the C.D.A. Board of Governors, at which time the increase in numbers on the C.D.A. Board would be considered. The O.D.A. Board concurred in this decision.

2. Discussion of Transfer of C.D.A. Headquarters to Ottawa

The Board of Governors of the O.D.A. approved —

1. A resolution that the O.D.A. strongly encourages the retention of the C.D.A. headquarters in the Toronto area;
2. A resolution that the C.D.A. and R.C.D.S. be approached to form a committee to study the feasibility of co-operating in the provision of both physical plant and allied services to the mutual benefit of all organizations.

3. Increase in Grant to the O.D.A. from the R.C.D.S.

It was approved that the dentists in Ontario be informed about the request made to the R.C.D.S. for an increase in the grant and the need therefor; that each component society deal officially with the matter and that each society discuss the merits of the R.C.D.S. making grants to the O.D.A. in lieu of dues.

4. Chargex

The Board of Governors was informed of the Board of Directors' decision regarding the use of Chargex and that any licentiate

contravening this injunction would be liable to a charge of unethical conduct.

5. Deputy Secretary-Treasurer

The Executive Council agreed that its ad hoc committee established to discuss the R.C.D.S./O.D.A. assets is empowered to discuss the desirability of employing a deputy Secretary-Treasurer.

6. OSHIP/OHSC

This item occupied a large segment of the time spent at the Board of Governors meetings. It is of special interest to the Board for several reasons. Historically, the Board of Directors made known in the earliest stages of negotiations of OMSIP benefits its disapproval of some of the regulations which it felt discriminated against dentists who were capable, by virtue of training and licensure, to perform certain services. However, except in certain limited circumstances the regulations excluded them from those eligible to receive payment for those services.

Subsequently, a member of this Board, as well as a former member, drew to our attention complaints about what were labelled abuses of OHSC regulations in carrying out the requirements for OHSIP benefits. The President of the R.C.D.S. and the Registrar (Secretary of the O.D.A.) met with Dr. Aldis of OHSIP. At this first meeting, arrangements were made for a subsequent meeting with the O.D.A. Hospital Services Committee, Dr. Aldis and a representative of OHSC.

The Board of Governors of the O.D.A., on receipt of the report of the Hospital Services Committee and a special sub-committee thereof, adopted a resolution in regard to changes in OHSIP Regulations (326/69) and agreed to the appointment of a special ad hoc committee to carry on negotiations with Government representatives. One of the members of that Committee is Dr. N.L. Diefenbacher, who can report on the progress of these negotiations.

7. Prepayment Insurance

A great deal of time at Board of Governors meetings, Executive Council meetings, Special Committee meetings, joint meetings with Co-operative Health Services organizations and others has been spent discussing this subject. It is probably fair to say that the establishment of an operative Dental Service Corporation even with limited powers, is not imminent. Negotiations and discussions are continuing.

8. Welfare Plan

Agreement in principle was reached in the suggestion that the O.D.A. Welfare Plan pay 100% of O.D.A. fee schedule for services rendered. However, it was pointed out that it was impractical to institute this at this time. Authority was given for re-negotiation

of the agreement with the Government on a basis of a cost plus according to O.D.A. fee schedule and on a scale commensurate with the real needs of welfare patients.

9. Fee Schedule

Supplements to be included in the O.D.A. Manual on "Guidelines for the Use of the Fee Schedule" and "Minimum Clinical Procedures for Satisfactory Complete Denture and Removable Partial Denture".

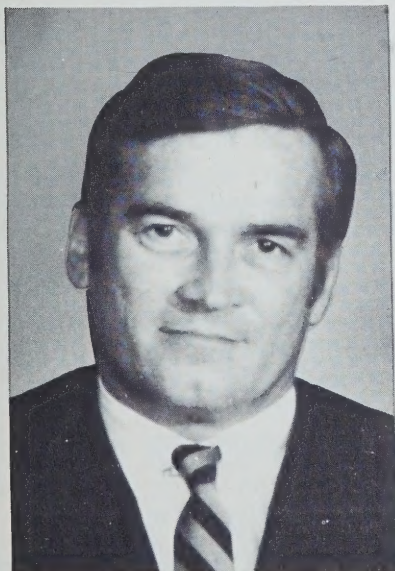

The Board of Governors allocated \$3,000 to help defray the cost of a joint study by Urwick, Currie and Partners Limited on Dental Health Care Costs.

10. Delivery of Dental Health Services

The Board has approved recommendations in the field of enlargement of procedures which may be performed by various categories of existing dental auxiliaries.

11. Elections

Dr. N.A. Mancini, Hamilton elected Chairman of the Board
Dr. I. Hrabowsky, St. Catharines confirmed as President
Dr. L.J. Schiller, Windsor elected President-elect.

REGISTRATION AND LICENSURE COMMITTEE REPORTS

T.H. WACHNA, D.D.S.
CHAIRMAN

APRIL 1970 BOARD MEETING

1. Fall Board Examinations — 1969

Twenty-three candidates sat for the examinations, eighteen were successful. To date six have applied and have been granted licence to practise in

Ontario.

2. Board Examinations — April/May, 1970

Twenty-three candidates have completed their applications and will sit for the Board examinations.

3. Procedure for Certification in a Specialty

This discussion dealt with the "mechanics" of the procedure. The role and selection of the liaison sub-committee was reviewed. The following format was presented to the Board.

A. Liaison Sub-committee

That the name of the Liaison Sub-committee be changed to "Specialty Consultants to the Registration and Licensure Committee", and

1. That these specialty consultants —

Be two members from each of the recognized specialties;

2. That selection be made by the Registration and Licensure Committee on the following basis:

- (a) one member whose name is submitted by the provincial specialty organization;
- (b) one member of each specialty selected by the Registration and Licensure Committee;

3. That appointments be made by the Board after recommendation by the Registration and Licensure Committee;

4. That the term of office of the specialty consultants be three years, renewable after review and consultation by the Registration and Licensure Committee;

5. That the duties of the specialty consultants be —

- (a) to assist the Registration and Licensure Committee and the Registrar in evaluating applications for specialty certification; and
- (b) to assist in preparing and assessing examinations conducted by the R.C.D.S. or any mechanism employed by the R.C.D.S.

B. Procedure — for Certification in a Specialty

1. That the application forms be completed and all pertinent documents supplied by the applicant;

2. That the Registrar assess if the application meets the minimum standard;

3. That the application form, all pertinent documents, the examination results when applicable, specialty consultants' confidential reports be assessed by the Registration and Licensure Committee

4. That the applicant be granted certification if the Registration and Licensure Committee recommends such to the Board and the Board approves.

5. That such recommendations as in (4) above may be circulated to the Board by mail with a request that each Board member indicate his approval in the event that the Board does not meet within 30 days.

The Board approved the preceding procedure recommendations.

4. Review of Specialty Certification

The Committee continues to study the present specialties and the possible restructuring of specialists.

5. Screening Examinations for Foreign Dentists

This Committee approved in principle the regulations for the screening of foreign dentists for admission to sit for our Board examinations.

6. Board Examinations — Dental Hygienists

The Secretary advised that at present there is only one candidate for the Board examinations for hygienists this year.

The Board approved a recommendation that the Registrar set the examinations for the candidate or candidates in Dental Hygiene.

7. Specialty Examinations

The Committee recommended that, after January 1, 1971, all applicants for specialty certification be required to sit for an examination.

This recommendation was not approved by the Board.

8. Review of Specialties

The Committee recommended that the Education Committee be requested to seek further information from the two Faculties of Dentistry in Ontario on the feasibility of setting up courses in endodontics and prosthodontics.

9. Applications for Certification

Dental Public Health
Dr. Stephen J. Fuzy

Dr. James McGaughey
Dr. C. Aberdeen McCabe

Paedodontics
Dr. Keith C. Titley
Dr. George Chung Shun Ng

Orthodontics
Dr. Ian M. Milne

Approved by Board when all remaining requirements have been met.

JUNE 1970 BOARD MEETING

1. Board Examinations — 1970

Twenty-one candidates sat for the Board examinations held April 23rd to May 7th, 1970 and ten were successful.

The Committee noted that the examiners had suggested that licensure should be withheld from three of the successful candidates until they are in a position to provide proof of more proficiency in the English language, since this could create a problem in attempting to communicate with their patients.

The Board concurred with this suggestion.

2. Screening Examinations for Foreign Graduates

Consideration had been given by the Committee to a letter from Mr. B. Godbout, Director General, Foreign Service, Canada Immigration Division, which had been forwarded by Dr. W.G. McIntosh, Executive Director of the C.D.A.

According to Mr. Godbout, the majority of the Registrars of the provincial licensing bodies in Canada agreed with the principle of a pre-screening examination for foreign dental graduates; there appeared to be an even division of views on the necessity for a manual dexterity test in addition to a multiple choice examination. Mr. Godbout indicated there were other problems, e.g. financial responsibility and the mechanics of administering and routing the examinations, which would have to be resolved, and that his Department were prepared to assist by invigilating examinations at their overseas offices.

Dr. Pownall had indicated that these screening examinations may not be necessary in view of the fact that while approximately two hundred and fifty enquiries had been received from overseas graduates, only twenty-one candidates sat for the Board examinations this year. It was understood the provincial Registrars would meet in Winnipeg during the C.D.A. Convention, when these examinations would undoubtedly be discussed.

The Committee stated its intention to follow up the question of screening examinations for overseas graduates.

3. Specialty Certification — Endodontics

The Committee discussed at length the request by the endodontists for specialty certification.

It was recommended that Endodontics be recognized as a specialty; following consideration, it was agreed that it be left to the Board to reach a decision on this question.

The Board did not approve this recommendation.

4. Oral Pathology — Recognition as Specialty

As requested by the Board, the Committee considered a proposal by Dr. D.G. Gardner, that Oral Pathology be recognised as a specialty. It was recommended that this recognition be withheld at this stage.

The Board agreed with this recommendation.

5. Dental Assistant Courses

The Committee, at the request of the Board, discussed the recommendation by the Education Committee "that dental assistant graduates of C.A.A.T. Colleges be registered with the R.C.D.S. and be designated 'Registered Dental Assistants.'"

The Committee felt this question of dental assistant courses should be deferred for further study following consideration of the recommendations in the report of the Committee on the Healing Arts.

6. Specialty Certification

The Committee continues to investigate the different avenues in respect to specialty certification, e.g. N.D.E.B.

7. Applications for Certification

Periodontics
Dr. Leeland A. Reynolds
Dr. Stephen Richmond
Dr. Michael Litchen

Orthodontics
Dr. Randall T. Lang
Dr. Frank Corti

Paedodontics
Dr. Arlington F. Dungy

Oral Surgery
Dr. Andrew G. Andrews

Dr. Andrew Boyko
Dr. Alan S. Ross
Dr. George C. White

Approved by Board when all remaining requirements have been met.

NOVEMBER 1970 BOARD MEETING

1. Foreign Dentists — Pre-screening Examination

At the last meeting of the Committee reference was made to a communication received from Mr. B. Godbout, Director-General, Foreign Service, Canadian Immigration Division, Department of Manpower and Immigration, concerning pre-screening examinations and manual dexterity tests for foreign dentists. It had been suggested that should such examinations be established, the N.D.E.B. was the logical organization to set them up, and that the pre-screening should take place in the native countries of the foreign graduates. However, through Dr. W.G. McIntosh, Executive Director of the C.D.A., it was learned that the N.D.E.B. had indicated it was not prepared to participate in such a program at this time and Mr. Godbout had been so advised.

In view of the fact that the R.C.D.S. Board in lieu of conducting an examination in 1971 is accepting the N.D.E.B. licensing examination, the Committee decided not to pursue this matter.

2. Graduate Courses in Endodontics and Prosthodontics

As recommended by the Committee, the two Faculties in Ontario had been contacted concerning the feasibility of setting up courses in endodontics and prosthodontics.

In his reply, Dean Nikiforuk, Faculty of Dentistry, University of Toronto, had stated "I see availability of qualified staff as the major limitation in development of postgraduate courses in prosthetics and endodontics." Dean Dunn, of the Faculty of Dentistry, University of Western Ontario wrote that he had discussed the proposal with Professor R.E. Jordan, Chairman of the Department of Restorative Dentistry, and they both believed "that it is quite feasible to establish a two-year program leading toward a Master of Clinical Dentistry degree in Restorative Dentistry and within such a program have a major area of emphasis such as Endodontics or Prosthodontics....."

3. Specialty Certification and Grouping

The Committee presented for the consideration of the Board the following specialty certification and grouping —

1. Oral Surgery
2. Orthodontics
3. Oral Medicine —
(Periodontics
(Radiology
(Pathology
4. Restorative Dentistry —
(Fixed Prosthesis
(Removable Prosthesis
(Endodontics
(Paedodontics
5. Community Dentistry —
(Public Health
(Epidermiology
(Biometrics

It was the majority view of the Committee that a two-year graduate training program with an additional year of practice be a minimum requirement for specialty certification.

Although no definite action was taken by the Board, a further proposal for specialty grouping was discussed —

1. Oral Surgery
2. Orthodontics
3. Oral Medicine —
(Dental Radiology
(Pathology
4. Clinical Dentistry —
(Restorative
(Prostheses
(Paedodontics
(Endodontics
(Periodontics
5. Dental Public Health

4. 1971 Licensure Examinations

Dr. Purves reported that it had been decided that the N.D.E.B. would conduct the licensing examinations for 1971. A meeting would be held in Montreal to finalize the details, but according to present arrangements the examinations would take place at the University of Montreal probably at the end of May or beginning of June, and the fee would be \$900. At the upcoming meeting the examiners would be nominated.

5. Dental Internships and Residencies

The C.D.A. had written to the various hospitals in

Ontario with dental internship programs that "At the July 1970 meeting of the C.D.A. Board of Governors a revised policy with respect to the accreditation of dental internships and residencies was adopted, viz. (1) no internship or residency should be considered for accreditation unless the dental service of the hospital in which the internship or residency takes place has been approved by the Canadian Dental Association; (2) only when an internship or residency forms part of a formal university (dental) program of graduate or postgraduate study, approval of the internship or residency should be included in the accreditation of the graduate or postgraduate program by the Council on Education of the C.D.A., providing such a program lies in an area of specialization recognized by the C.D.A."

Under our by-laws it is not mandatory that the oral surgery training taken by a candidate applying for certification be in a hospital associated with a University.

The Committee recommended that the regu-

lations with regard to oral surgery be amended to indicate that the internship component be at a University affiliated hospital only, with one year basic science course at the University.

6. Applications for Certification

Dental Public Health
Dr. Samuel Green
Dr. Sydney W. Muller

Orthodontics
Dr. Martin A. Slater
Dr. Bryan D. Tompson

Paedodontics
Dr. Peter A. Konchak

Periodontics
Dr. James E. Biggar

Approved by the Board when all remaining requirements have been met.

TREASURER'S REPORT

K.F. POWNALL, D.D.S.
TREASURER

1. Financial Statements

1. The Auditor's Report, the Balance Sheet and List of Investments for the R.C.D.S. as of December 31, 1969 are attached as Appendix A.
2. The Auditor's Report and Balance Sheet for the Harry R. Abbott Memorial Library Fund are attached as Appendix B.

2. Receipts

Income exceeded the estimated budget by nearly \$25,000. More dentists were registered and licensed than anticipated. The number of candidates taking the Board examinations was greater because permission was granted the special refugee Czechoslovakian dentists to sit the examinations. Due to good management of funds and higher interest rates the income derived from interest on monies was substantially greater. Fines and penalties which are difficult to budget accurately, were actually double the expected amount.

3. Expenditures

Actual expenditures were very close to budgeted expenditures. The increased expenditures are

shown in the maintenance and renovations which were approved at the June 1969 meeting.

The other additional expense was a non-recurring grant of \$7,000 to the NDEB.

4. Investments

At present excess funds are held in short term bank certificates which are reflected in the asset sheet as "Cash". In addition, we have bonds (Appendix A) which were purchased when interest rates were much lower. Fortunately \$10,000 of the 2¾% bonds due in 1970 and the remainder in 1971 and 1972.

5. The Harry R. Abbott Memorial Library Fund

Over the past few years revenue has been exceeding expenditures and a balance of over \$4,000 was reached in 1968. The Library Committee agreed that more use should be made of this fund and more books were purchased in 1969 reducing the balance to \$1,861.

6. Note of Appreciation

I wish to bring to your attention the fact that the office staff of the College deserve high commen-

dation. They perform their duties in an exemplary manner and I am very proud to be associated with them.

7. Re-appointment of Auditors

As the firm of Thorne, Gunn, Helliwell and Chris-

tenson continues to provide adequate auditing services it is recommended that the firm be re-appointed auditors for 1970.

The Board approved this recommendation.

APPENDIX A

AUDITORS' REPORT

To the Directors of the
Royal College of Dental Surgeons of Ontario

We have examined the balance sheet of the General Account of the Royal College of Dental Surgeons of Ontario as at December 31, 1969 and the statement of revenue and expenses for the year then ended. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion these financial statements present fairly the financial position of the General Account of the College as at December 31, 1969 and the results of operations for the year then ended, on a basis consistent with that of the preceding year.

FOREWORD

KENNETH F. POWNALL, D.D.S.
REGISTRAR-SECRETARY-TREASURER

As Registrar, I would like to draw to your attention a few of the major discussions held and decisions made during 1971.

In September 1966, the Minister of Health established the Committee on the Healing Arts to investigate, report and recommend improvements in the health disciplines in Ontario. Since that date the cloud of pending new legislation has been constantly overhead. Will the

cloud have a silver lining or will it be a black cloud of frustration? The RCDS continues to be optimistic. Progress towards new legislation has been slow. To date a spirit of co-operation has existed between those drafting the new Act and the existing Colleges. Reasonable people acting reasonably can accomplish miracles.

We hope our legislators will judge with candour the efforts of the members of this and

the other Colleges who spent countless hours preparing briefs and drafting legislation for this new Act to be called "The Health Disciplines Act".

I particularly commend for your perusal the report of the President of the College. His workload has considerably multiplied in the last couple of years. Frequently, on short notice, his attendance has been required at the Parliament Buildings. As the President conducts a large general practice, this necessitates the changing of many patients' appointments. Perhaps the members of the College should be grateful to his patients for the inconvenience they have been caused.

The year 1971 will be remembered as the year a group of people organized themselves for the purpose of blatantly flaunting the law as set out in the Dentistry Act of Ontario. The Dentistry Act, in effect since 1868, was enacted to protect the public from charlatans representing themselves as persons knowledgeable in the science of Dentistry. A section of the Act obligates the College to enforce this Statute and, as a result, the College has been involved in searches and seizures in respect to illegal operations. This has consumed many hours of the time of the staff of the College.

The reports of the Committees are self-explanatory. The increasing importance of dental hygienists and dental assistants has enlarged the work-load for our Education Committee. The Colleges of Applied Arts and Technology working in co-operation with the RCDS to ensure that these important dental health workers receive excellent training. As new courses are established they must receive the approval of the College. The Education Committee serves as a catalyst. It arranges meetings at regular intervals of all teachers of dental assisting to pool ideas and improve teaching methods.

The Registration and Licensure Committee has made great strides in improving the mechanism for certifying specialists. The question of establishing new specialties is under constant review by this Committee.

The Government and Legislation Committee has been occupied with overseeing pending changes in dental legislation.

The Complaints and Discipline Committees continue to serve the purposes for which they were established. Complaints and enquiries about dental services and fees continue to increase. There are many reasons for this, ranging from general economic trends to anti-establishment sentiments of some people. Failure by a few dentists to properly communicate to their patients the "how, when and why" of their treatment leads to misunderstandings.

The duties of the National Dental Examining Board in examining foreign dentists is increasing. Our representative to the NDEB, Dr. James Purves, has earned our gratitude for his services to that Board. He was elected President of the NDEB in 1971.

Close co-operation continues between the two Faculties of Dentistry in Ontario and the RCDS. The Faculty representatives to the Board make major contributions to its smooth operation. Their points of view are always well expressed and appreciated. The RCDS is convinced that dental education in Ontario is in good hands.

The Directors of the College have made themselves available to speak at local dental society meetings. This is the best method of communication and I am pleased to report that requests for directors to attend society meetings have never been more numerous.

The accreditation of dental schools in Canada is performed by the Council on Education of the CDA. This is a very worthwhile endeavour and the RCDS appreciates the services of our national association in providing this assistance.

The telephone at your headquarters building is busier than ever before. It is pleasant to know that before they proceed, most dentists contact the College for advice concerning any problem or misunderstanding involving the public.

In conclusion, I wish to express my appreciation to the President and Directors of the College as well as to the more than 3,000 dentists who practice dentistry in Ontario with high standards both clinically and ethically and so serve the public of Ontario in the finest manner possible.

PRESIDENT'S REPORT

N.L. DIEFENBACHER, D.D.S.

I deem it an honour to have been elected to the office of President of the Royal College of Dental Surgeons in January 1971. I am certain that all the members of the Board anticipated a more active term of office than in previous years, but I believe no-one realized how extensive our duties would become.

I want to take this opportunity to inform the profession in Ontario of the high calibre of the members of the Board. In fulfilling their duties they have given me maximum co-operation and effort, thus enabling the Board to function as efficiently as possible. On my part, I have been able to cope with the increased work-load only because of the assistance and guidance so willingly given by Dr. Pownall, our Registrar-Secretary-Treasurer, supported by the office staff. To all of them, a sincere "thank-you".

At best, communication within our profession is less than optimum, and in this past year possibly this area has suffered even more. I do not feel, however, that any lack in this respect can be assigned to any person or group. The many items the Board was required to consider, discuss and decide seemed to come up with ever-increasing

rapidity. I was fortunate to be able to accept every invitation extended by local dental societies throughout Ontario, hoping in this way to improve communication. These visits included Ottawa, Toronto East, Toronto North, Hamilton, Niagara Peninsula, Windsor, Oshawa and the Northern Ontario Convention. I am sure there will be more in 1972. In addition, this year, the Board opened its meetings to a limited number of observers. This proved to be a very progressive step to better understanding of our operations.

One of the most important documents the Board has ever had to consider in its history was the Report of the committee on the Healing Arts. On January 21, 1971, the Honourable Thomas Wells, Minister of Health, released a document entitled "Guiding Principles for the Regulation and Education of the Health Disciplines" — the next phase of the CHA Report. This document was discussed by the various health disciplines and Government in February. The results of these deliberations will assist Government in drafting new legislation for all the health disciplines.

The following are some of the areas of interest and concern —

- (a) There will be a "Health Disciplines Regulatory Board", composed of five to seven members, who must be lay people. This Board will be the body acting as coordinator for all the health professions. Essentially, this Board will almost entirely assume the responsibilities presently assigned to the Minister of Health in respect to specific dealings with the various Colleges of the health disciplines.
- (b) It is suggested that the College should not be involved in the education of its membership. The Board of the RCDS and the other four Colleges, viz. Medicine, Pharmacy, Nursing and Optometry, opposed this proposal.
- (c) The regulatory body must be independent of the voluntary association.
- (d) No one health discipline should have the authority to regulate another health discipline. This will require Dental Hygienists and Dental Technicians to be totally self-governing.
- (e) There should be a significant number of members of the Colleges who are not engaged in the health field. Accordingly these persons would be lay members and a significant number is considered to be 20% to 25%. This would mean up to three lay representatives on our Board.
- (f) That it be mandatory that a dentist submit to his patient an itemized account showing separately, charges for professional services and laboratory charges. The RCDS Board agreed with this recommendation in June 1970, and this will become a by-law in the near future.
- (g) Everything possible should be done to find adequate means to implement a method of ensuring continuing competence. This may have to eventually become a condition for re-licensing. Our Board agreed with this in principle but it was pointed out that these proposals would require Government funding in terms of facilities, staff, etc.

The new legislation for the Health Disciplines Regulatory Board is to be presented to the Legislature in April 1972. It is understood that immediately following this, new legislation for the five Colleges will be introduced. Accordingly, the new Dentistry Act should be completed by Government in 1972.

At meetings with Government at various times this year, subjects frequently discussed were a "plan for better dental service" and "the expansion of duties of allied dental personnel". Expanded duties of Dental Assistants and Dental Hygienists elicited much dialogue on the delivery of dental care. Also, the Department of Health was informed that the Board of the RCDS recommends that the training program for registered dental technicians at Colleges of Applied Arts and Technology be extended to include certain technical intra-oral services. These would only be applicable in the provision of complete dentures. This new auxiliary would be known as a "Dental Prosthetic Therapist". As the dentist is the only person properly trained to assume the ultimate responsibility for the total oral health of a patient, our Board recommends that any auxiliary providing dental care services should work under the supervision of a dentist. The RCDS is prepared to assist Government in immediately establishing this training program.

The Honourable Robert Welch, Minister of Education, is an "ex officio" member of our Board, as is the Minister of Health. In the history of the RCDS a Minister of Education had never attended one of our meetings. Mr. Welch established a "first" when he was present for a portion of our April Board meeting. His visit and comments were very much appreciated by the members.

In 1971 much time and effort was expended by many people because of the situation created by the "illegal practice of dentistry by unqualified persons". The RCDS has co-operated with Government in enforcing the Dentistry Act. Successful prosecutions were carried out in the courts, and those individuals who continue to break the law can expect to be subjected to further prosecution. Under the law the Royal College of Dental Surgeons of Ontario is required by Government to enforce the Dentistry Act, and

the College has no intention of failing in its duties.

I sincerely hope that our Government will not succumb to the propaganda being circulated via the news media and by personal presentations (in an attempt to have "illegal mechanics" legalized.) This propaganda is not only misleading, but in many cases is completely inaccurate. The representatives to Government of this College will do their utmost to counteract such misinformation. Also, the College will do everything possible to assist those responsible for the dissemination of accurate information to the public of Ontario concerning this important aspect of health care. It would be most unfortunate if the final decision of Government is arrived at by anything other than what is in the best interests of the public.

There is no doubt that changes in the delivery of dental care services are imminent. While many of these changes may appear desirable, some may create apprehension. Therefore, I would ask that you do your utmost to be fully informed on the activities of your College. The RCDS Director for your district is responsible for bringing this information to you. Please utilize his services or mine whenever necessary.

1971 has been a very busy year and from present indications 1972 will present an even heavier schedule. This is one of the most critical times in the history of Dentistry, a time that will shape the destiny of the profession for many years to come. However, I am confident that the problems faced by us in the past year will be overcome and that we can look forward hopefully to a bright future.

COMPLAINTS COMMITTEE

*R.C.D.S. Complaints Committee
I. Dr. Blake McAdam, Chairman; Dr. George Burgman*

APRIL BOARD MEETING

The Complaints Committee of the R.C.D.S. met at 230 St. George Street, Toronto, on the afternoons of February 25 and March 26, 1971. Of

the fourteen cases considered, ten have been resolved, three are in the process of resolution and one has not been assessed since the patient failed to attend.

The cases resolved were of the following nature:

1. Two instances involved minor and accidental infractions of the R.C.D.S. by-law governing newspaper announcements and district mailings.
2. Five instances concerned complaints on the part of patients for unsatisfactory services received. In three of these cases, the Committee, on examining these services, agreed that the complaints were justified and ruled that the entire fee be refunded or the service repeated. In two other cases, the Committee felt that the services were performed competently and the patients accepted such explanation.
3. The solution offered required that the dentist return 55% of a fee collected for impressions taken and dentures constructed since the patient (who was mentally unstable) refused to appear for the immediate insertion.
4. The credibility of one dentist was impugned by another who said that three small cavities recommended for filling were not there. The areas described were probed, shown to the mother of the thirteen-year-old patient and the disparity of clinical judgment described to her satisfaction.
5. In another situation a Toronto dentist found fault with the services rendered by his new patient's previous dentist in St. Catharines. When he, in turn, exceeded his estimate without consulting the patient's parents, the family no longer knew whom to believe. The Committee censured the Toronto dentist for his handling of the situation and required him to return the \$80.00 in excess of his estimate.

The cases pending resolution were of the following nature:

1. A dentist who was highly insulting and condescending to his patient pressed them for a \$35.00 fee and refused to co-operate with the R.C.D.S. in its efforts to resolve disagreement. The Complaints Committee required that he apologize to the patient for his remarks and reduce his fee by 50%. To date his decision is not known.
2. A complex, long-standing case still does not have an ending in sight, for the dentist selected by the patient to correct previous inadequate treatment is currently experiencing difficulties with his own restorations. The Committee was reluctant to have the latter re-make a deficient bridge of the former until his existing corrections have been successfully terminated.
3. A complex complaint presented by the patient's lawyer for resolution involves extensive and expensive operative treatment prescribed for a family of five children by one dentist three months after receiving a clean bill of health from another. Since the previous dentist had never taken bite-wing x-rays, he was unaware of much of the caries destruction in these mouths. This dentist has been censured by the Committee for such negligent practice and we will recommend that he settle out of court for a portion of the estimated sum involved.

The new dentist recommended fillings for many small incipient cavities and root canal treatment for four asymptomatic vital teeth with large untreated cavities. His estimate is \$1,300.00.

The children were examined and x-rayed by the Committee Chairman and the mouths noted. An effort will be made to equate fees charged with services rendered so that a fair assessment may be arrived at for settlement.

NOVEMBER BOARD MEETING

Since the April meeting of the R.C.D.S. Board, the Complaints Committee has had to consider and offer mediation in fifty-one complaints. These hearings were held during full day meetings conducted in the months of May, June, July, September and October with Drs. Burgman and McAdam in attendance.

This represents an unfortunate increase in the number and complexity of complaints brought against practising dentists. While solutions were effected in most instances, some of the grievances will probably reach settlement only after being heard in the civil courts. In addition, there seems to be an increase towards consultation with legal counsel.

Many of the complaints were exceedingly detailed in that costs that were initially accepted by the patient as satisfactory were considered in retrospect to be unsatisfactory once a complaint arose. The result was that, instead of a single dissatisfaction, some complaints contain many itemized dissatisfactions.

Since the Committee is directed to examine complaints in order to insure that dental treatment is performed in the public interest, it must examine the treatment at issue and answer the following questions:

1. Does the patient have a legitimate measurable complaint?
2. Is the fee within reasonable limits?
3. Is the service rendered with reasonable competence?
4. Has the treatment been carried out in the patient's best interest and with reasonable diagnostic basis?
5. Was permission given for the above treatment and expense?

These answers are what guide the Committee in attempting to establish a reasonable solution.

Because it is natural for both the patient and the dentist to heavily substantiate and sometimes exaggerate their claim, in many instances it follows that the solution recommended does not fully satisfy either party. A solution, therefore, seeks to represent the basic interest of each and thereby permit both patient and dentist to retreat from the impasse honorably and without further loss of time and funds.

In recent years the public has demanded and is prepared to pay for more aesthetic restorations. The advent of accurate impression materials, satisfactory porcelain-to-gold procedures and sophisticated laboratory techniques has encouraged many general practitioners to undertake increasingly extensive and expensive bridge reconstructions. Since the working tolerances of these fixed restorations are exceedingly fine, complaints are easily generated. In the event of a complaint, the cost involved is substantial enough for the patient to seek redress. Many consider that they cannot afford not to do so. Discrepancies in the marginal fit and occlusion that are gross cannot disappear or get better and any "expert witness" called upon by the patient must testify that they exist. For these reasons, dentists entering into this type of service should be prepared to remake, to repair, to amend or to return the construction provided by the laboratory so that the retention, fit, occlusion and aesthetics are within reasonably clinical limits. In the event that he does not or cannot achieve this and the restoration must be redone elsewhere, the dentist must be prepared to return the entire fee or that portion of the fee required by another dentist willing to undertake a repair. In general, if the patient has paid for a service, at the end of the treatment there must have been a reasonable result.

DISCIPLINE COMMITTEE

R.C.D.S. Discipline Committee

l. to r. J.R. Callingham; P.R. McCutcheon; H.M. Jolley, Chairman; D.A. Cheetham; D.I. LeCocq

APRIL BOARD MEETING

At the direction of the Board of Directors, the Discipline Committee met to inquire into the alleged misconduct in a professional respect of a member of the College.

The defendant was represented by Mr. David

Humphreys, Q.C. The Committee was assisted by Mr. Richard Shibley, Q.C. and Mr. Barry Worsman, a member of Mr. Shibley's firm.

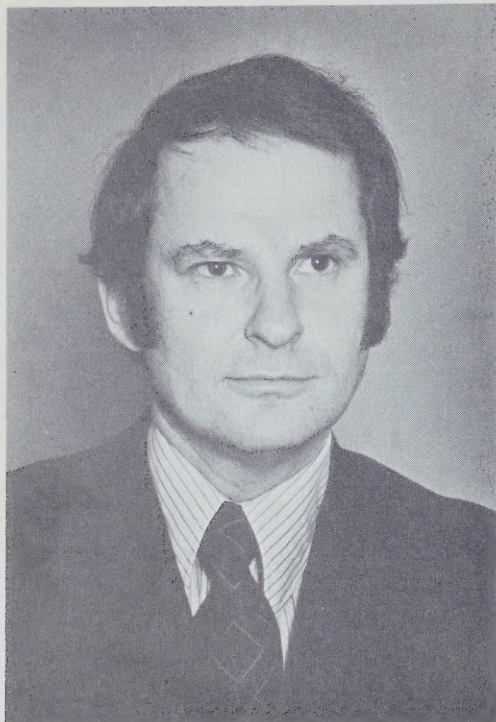

After hearing all the evidence the Committee agreed that the investigation was justified but found the defendant Not Guilty.

NOVEMBER BOARD MEETING

1. At the direction of the Board, the Committee met on Thursday, November 11, 1971, to inquire into the alleged "misconduct in a professional respect" of a member of the College.
2. The Committee was assisted in its examination of the charge by Mr. Barry Worsman of the firm of Shibley, Righton & McCutcheon, Counsel for the College, and Mr. R.J. Generaux, Counsel for the defendant.
3. The Committee found that "the procedure you followed left yourself open to criticism and formal complaint. Nevertheless, the explanation given and the supporting comments of other witnesses have raised a reasonable doubt in our minds."

The finding therefore was Not Guilty.

The Board agreed to seek further legal advice in connection with the Committee's recommendation that the Board consider the desirability of having legislation effected to give power to the Discipline Committee to make a member of the College responsible for the costs of any investigation into his conduct where the facts elicited by such investigation sustain the justification for the investigation and the imposition of costs even if the findings of the Committee lead to the conclusion of not guilty of improper conduct in a professional respect. This must in no way influence or affect the Committee in arriving at its decision as to the propriety of the conduct of the member under investigation.

EDUCATION COMMITTEE

P. ZAKAROW, D.D.S.
CHAIRMAN

It is the fond hope of any committee that, when at year's end, its deliberations are summarized and printed, that these will be read by the members at large. So it is with the Education Committee whose meetings I was privileged to chair during the year 1971. This report of our discussions and recommendations seeks to escape the conventional format of reporting and, I hope, presents concisely and clearly the 1971 committee's activities.

The general areas of the Committee's concern in 1971 were:

The complete spectrum of Continuing Education for the profession and its auxiliaries including emphasis on the potential advent of mandatory continuing education.

Expansion of duties of presently recognized auxiliary personnel including Dental Technicians to create an entirely new auxiliary.

I am pleased to report that plans for our annual Memorial Lecture are presently being made. It is now confirmed that Dr. J.M. Phillips has agreed to conduct a course which will give emphasis to new techniques in endodontics.

Therefore — the unlimited 2-day attendance lecture is scheduled for October 1972. Limited attendance (ten members) to follow for a period of five days, now tentatively scheduled for January, 1973 at the University of Toronto.

As previously, the lecture will commemorate an outstanding individual in the profession.

Since the customary training grant has been obtained from the Department of Health for the purpose of conducting dental seminars in 1971 — 72, they were held in the following locations, Kingston, Sarnia, Dryden and the Niagara Peninsula.

Feeling that the whole program for continuing education in our profession required re-examination, the education committee investigated through contact with the various dental societies and individual questionnaires with a view to ascertaining whether the present procedure for lectures be continued or some other form of continuing education should be established.

Generally, the findings concerning extramural lectures show that their continuance is

favoured, as are those presentations given locally rather than regionally; the preferred months for meetings would seem to be October and November; the most desired presentation — one that combines both lecture with some demonstration. All day meetings were preferred to dinner meetings with Ontario clinicians being more popular than out of province. In as much as some presentations left room for improvement, the topics, generally, were acceptable with future stress to be placed on more current and controversial aspects. The topics in order of preference are —

Operative Dentistry — pin techniques and amalgams, Oral Surgery — practical minor oral procedures, immediate dentures and implants. Prosthetics — Immediate denture service and fundamental principles and prevention of post-insertion problems, Periodontics — occlusal corrections, followed by Endodontics and Drug Therapy.

The Committee has recommended to the Board that the Deans of the two Faculties in Ontario be approached requesting their co-operation in the establishment of an active and vigorous continuing education program, the provision of clinical facilities necessary, and a one-third contribution from each towards the salary of a proposed co-ordinator.

Regarding continuing education for the presently established auxiliaries, a one-day continuing education course for Dental Hygienists with emphasis on modern techniques to be held at the University of Western Ontario and specific topics of interest will be continually sought in order to enhance attendance.

In view of the fact that dental assistants are now allowed by law to expose radiographs, the Committee has recommended that the RCDS become instrumental in the conduction of clinics for dental nurses and assistants on x-ray techniques. The Committee is presently in the process of employing a lecturer to conduct these clinics for the dental nurses in the various dental societies throughout the province.

Concerning the profession's dependance relationship on our Auxiliary Personnel a large

portion of your Committee's time was spent in meeting with the Directors of Dental Assisting Courses in both Community Colleges and Secondary Schools, followed, in both cases, by a subsequent tour of a representative school in each category, in order to examine the teaching facilities. In both cases with what we observed, we were generally in agreement.

The main purpose of the conferences was for an exchange of information and ideas between the teachers so that the graduates of the courses would receive the best possible education, hopefully leading to a common standardization and guidelines for the dental assistant courses.

Subjects discussed included; Admission selection, Text book and Library, Audio-visual Aids, curriculum, certification, field work, intra-mural clinical arrangements, attendance, failures and equipment. It was unanimously agreed that similar conferences be held again in the next year.

In the ever-changing field of Dental Auxiliaries, your Board has gone on record of expanding the duties of Registered Dental Technicians to include certain intra-oral procedures, under the direct supervision of the dentist. The Committee had been delegated the task to designate a name and formulate a training format for this newly proposed auxiliary. Our recommendations concerning this auxiliary, respectfully submitted are —

— *That the designation of the proposed new auxiliary be "Dental Prosthetic Therapist"*

— *That this new auxiliary should come under the Dentistry Act, at least at its inception.*

— *That candidates have a minimum of grade 12 or its equivalent.*

— *That the candidates should not be convicted of any crime and be of good moral character.*

— *That they should be qualified by way of an examination, with diploma from a community college and licensed under the HDRB in due course.*

— That these auxiliaries would be permitted to construct only complete dentures — either complete upper and lower, or complete upper or complete lower — in addition to their regular technical services.

— That they should undertake a one year (800 — 900 hour) training course on attainment of RDT course and subsequent to obtaining an RDT licence.

The course should include — Basic Anatomy, Intra-oral Procedures, all phases of laboratory work, Physiology, as geared to the needs of the Dental Prosthetic Therapist, Principles of Sterilization, ethics and jurisprudence, patient management, personal hygiene and first-aid.

We have recommended that the sites for training be Community Colleges, with a pilot course being established at the George Brown Col-

lege of Applied Arts and Technology with training staff deriving from the University of Toronto.

Regarding the advent of Mandatory Continuing Education, the Committee recommended that the Board postpone the date of implementation a further year, to January 1973, since the necessary facilities have not been found, nor the actual arrangements determined.

However, the Committee is investigating this area by reviewing programs of various Dental Education Institutions in the USA.

No report of this Committee's activities would be complete without acknowledging the splendid co-operation given me by my committee members — Dr. R.P. McCutcheon, Dr. R. Mulrooney and our Secretary, Dr. K.F. Pownall during this past year.

*Two lectures for Academic Year September 1, 1971 to August 30, 1972

Clinic Floor, Faculty of Dentistry, University of Toronto

UNIVERSITY OF TORONTO

GORDON NIKIFORUK, DEAN

In this my first report to The Royal College of Dental Surgeons of Ontario as the Dean of the Faculty of Dentistry, I wish to review the educational highlights for the year and, in addition, to project the major priorities for the years that lie ahead.

This has been a year of transition. After

22½ years as Dean of the Faculty, Dr. Roy G. Ellis resigned in the fall of 1969 to assume his current position in the Office of the Vice-President, Health Sciences, at the University of Toronto. The staff and I acknowledge his energetic contribution to the Faculty and wish him well in his present endeavours.

ADMINISTRATION

Guided by the principle that administration must only be a means to an improved end and recognizing that one inevitably loses the paper war in the Dean's office, it became essential early in the year to decentralize the administration in the Faculty. Thus, to permit effective grass-roots communication and decision making, the following appointments were made to decentralize administrative functions:

- (a) Dr. H.G. Poyton was appointed Associate Dean for Administration
- (b) Dr. D.G. Woodside was appointed Associate Dean for Curriculum Affairs
- (c) Dr. Murray Hunt remains as Associate Dean for Graduate and Postgraduate Studies
- (d) Dr. A.B. Hord was appointed Assistant Dean for Student Affairs.

Further, several senior positions in the Faculty have been filled in accordance with recommendations of a Faculty Search Committee:

- (a) Dr. J. Kreutzer was appointed Director of Clinics with extended duties in order to streamline the clinical teaching and clinical services of the Faculty and to innovate programs in delivery of dental health services
- (b) Dr. C.E. Purdy was appointed Assistant to the Director of Clinics
- (c) Dr. G.A. Zarb was appointed Chairman of the Department of Prosthodontics
- (d) Dr. A.R. Ten Cate was appointed Chairman of the Division of Biological Sciences
- (e) Dr. R.C. Burgess was appointed Chairman of the Department of Preventive Dentistry
- (f) Dr. J.E. Speck was appointed Chairman of the Department of Periodontics.

It is my conviction that the above new appointments will strengthen the educational and research programs of the Faculty.

STAFF

A recurring theme over the past ten years in the reports of Dr. R.G. Ellis, former Dean of the Faculty, has been the shortage of full-time

staff. At the beginning of this decade there were 22 full-time and 92 part-time staff members, while in 1970-71 there were 40 full-time and 230 part-time staff. These figures, while indicating an increase in the full time staff, also identify a major problem area for this Faculty. Currently the full-time staff to student ratio is 1:14, and there is only one full-time staff to each six part-time staff members — both ratios reflecting staff patterns that need changing.

Every major study of this Faculty's programs and curriculum, such as the User's Committee, the Curriculum Committee Report, and the independent study of Dr. J.B. Macdonald, all underscore the need for additional full-time staff. This dilemma is not unique for this Faculty; the Association of Canadian Faculties of Dentistry has estimated that 256 full-time staff will be needed in Canadian Schools of Dentistry by 1976.

The Curriculum Committee has recommended that the Faculty should seek to employ an undergraduate and graduate staff equal to 100 full-time equivalents for an overall staff to student ratio of 1:5. I consider the recruitment of highly qualified full-time staff as the number one priority of this Faculty. The development of essential programs, such as graduate studies, research in prevention and educational fields, and hospital and community clinical dental programs are all predicated upon acquisition of more staff.

NEW STAFF

In line with the policy of recruiting more full-time staff, I am happy to indicate that during the past year the following full-time staff have been added: Dr. Charles Munroe in the Department of Oral Diagnosis; Dr. Barry Sessle in the Division of Biological Sciences (Physiology); Professor J.A. Hargreaves in the Department of Paedodontics; and Dr. P.A. Watson in the Department of Restorative Dentistry. The new staff are exerting an important effect on the teaching and investigative programs of the Faculty.

STUDENT AFFAIRS

During the past year there has been a significant increase in the involvement of students in the affairs of the Faculty. Students are members

of most standing committees of the Faculty as well as the Faculty Council. Further, students have been added to the search committees in the selection of new chairmen and new staff. Their inputs have been particularly valuable as they relate to teaching, didactic programs, and evaluation processes.

The second Canada-wide Dental Students Conference was held in Toronto under the auspices of the Canadian Dental Association this year. This forum provided an opportunity for the students to exchange views on mutual problems relating to student government in the faculties of dentistry, financing of student activities, the clinical evaluation and teaching of students, the question of exchange of students, and staff-student relationships. Mr. Randy Whyte was the representative from the Faculty of Dentistry, University of Toronto, to this meeting.

An important question relating to student affairs is that of admissions to the Faculty of Dentistry. During the past year over 800 applications have been received for a total of 125 positions in the first dental year at this Faculty. Obviously an increasing number of highly qualified individuals are seeking admission to Dentistry. It is becoming increasingly evident that the selection process is a difficult one and that the current practice of deciding which student gets admitted on the basis of an A, B, C or D mark is proving to be a wholly inadequate method. The time is opportune for an in-depth study of the admissions process, not only from a standpoint of predicting student performance at didactic and manual skill levels, but also from the standpoint of admittance of a student with the proper attributes for professional life. Much has been written about characteristics and attributes of a professional man, but little has been done from a standpoint of attempting to select students who best meet these criteria. I am suggesting that it is necessary that we experiment with an admissions process that will attempt to consider the above attributes beyond the straight A, B, C or D of academics in the selection process of future students for professional activities. The question is whether we are wise enough to make these decisions.

I welcome the increased student participation in the affairs of the Faculty. The greater

student involvement and perhaps greater freedom in the academic sphere through an attempt at individualizing programs means a greater choice for students and a greater responsibility. I am confident that students will meet this challenge.

EDUCATIONAL AND CURRICULAR CHANGES

A Curriculum Review Committee, originally chaired by Mr. J.H. Sword (Acting President) and subsequently by Mr. D.F. Forster (Vice-President), has only recently made important proposals which during the past year have been adopted by the Council of the Faculty. The Curriculum Committee was charged with the responsibility of implementing the above Curriculum Committee proposals. The main recommendations are as follows: to develop a course programmed in the behavioural sciences, to emphasize the concept of prevention; to establish a division of social and preventive dentistry; to encourage cross-appointments with appropriate university science departments; to utilize seminar or tutorial teaching in lieu of lectures where feasible; to develop self-instruction devices; to increase full-time staff; to develop in-service courses relating to teaching principles and methodology for new staff members; to integrate the preclinical and clinical programs; and to appoint coordinators on curricular matters in order to minimize duplication.

There is a growing awareness in the Faculty that changes within the curriculum structure, changes in teaching methodology, do not per se result in a fundamental change in the student unless there is a concomitant change in the learning situation. I am happy to detect a flexibility in the staff and a willingness to experiment in educational programs in the direction of individualizing instruction through electives, improvement in acquisition of motor skills, and of revising the current trend toward a highly structured curriculum in order to place the primary responsibility for learning where it belongs, namely on the shoulders of the student.

GRADUATE PROGRAM

I have already alluded to the shortage of adequately trained staff for careers in teaching and research for faculties of dentistry across

Canada. Educational programs of dental schools in Canada have not adequately provided for the education of highly qualified students for careers of teaching and research. A study by the User's Committee of this Faculty, chaired by Dr. A.M. Hunt, and an independent report by Dr. J.B. Macdonald, Chairman of the Ontario Committee of University Presidents, have both recommended that a major effort should be placed on programs to educate future dental teachers and investigators. With this background, the Faculty is placing a very high priority on the development of graduate programs. The User's Committee's initial proposal, as spelled out in 1967, made provision to expand the graduate division from the then current 51 full-time and 7 part-time students to a total of 150 full-time and 10 part-time students in post graduate, Masters, Ph.D. and post-doctoral programs. The expansion in student enrolment on a graduate level is to be accompanied by an adequate provision for staff and physical facilities. This is an essential program if this Faculty is to discharge its provincial and national obligation to ensure that an adequate number of dentists, teachers and research personnel are education to care for the growing dental needs of our population.

RESEARCH

It is important to recognize that the vitality of both dental education and dental practice inheres in continuous contact with the currents of new knowledge and in the broadening and deepening of fundamental research directed not only towards diagnosis and treatment of specific diseases, but also toward understanding of the total living organism. It is hoped that this relationship can be developed not through a "publish or perish" approach, but rather by developing a climate that encourages the creative and questioning mind to probe the unknown.

Major contributions have been made by staff of this Faculty relating to the understanding of the pathogenesis of periodontal disease by elucidating the nature of mixed infections in the oral cavity. Studies relating to the composition of hard tissues, fluoride metabolism, nutrition as it relates to the integrity of dental tissues, have all attracted international attention. Further, the work relating to the pathogenesis of periodontal disease as it involves immunochemical mecha-

nisms is promising. The elaboration of the embryological basis of cleft palate anomalies by staff of the Faculty is considered a major breakthrough by workers in the maxillo-facial field. Also, the development of adhesive dental filling materials shows great promise of immediate application to clinical problems. The oral cytology studies and services that have been developed in this Faculty have provided the practitioner with important armamentarium for the early detection of cancer.

The Burlington Orthodontic Research Centre has attracted world-wide interest among research workers interested in oral-facial growth and development. This study is the major impetus for the most extensive program of undergraduate teaching of orthodontics in any school of dentistry in North America. Further, the computer facilities in the Faculty, including a delivery in March of 1967 of an IBM 1130, has made possible a synthesis of important new data in understanding and treating oral-facial growth problems. The processing of epidemiological and health survey records is expedited by the ability to interface these facilities with the large IBM 7094 at the Institute of Computer Science of the University of Toronto.

Professor D.G. Woodside was awarded the Milo Hellman Award, a special merit by the American Association of Orthodontists, 1970, for his work relating to the relative growth rates of the mandible in a Canadian population. Professor A.R. Ten Cate was honoured by receiving the Medical Research Council Visiting Professorship at the University of British Columbia and at the University of Saskatchewan. This program permits an exchange of staff between the faculties of dentistry in Canada. Dr. Ten Cate participated in a series of lectures and seminars in each of the above universities.

THE NEXT DECADE

The past decade has brought about significant changes in dental education and increased student and staff enrolment. It is a safe prediction that the major changes are ahead. In the re-thinking of policies and the re-shuffling of priorities, the greatest attention should be focused on the areas noted below.

1. The development of graduate programs in

order to adequately prepare larger numbers of academically qualified personnel for careers in teaching and research and for the practice of clinical specialties in dentistry.

2. It is essential that the number of full-time staff equivalents be increased to approximately 100, and concomitantly, the part-time staff should be reduced in numbers by increasing the number of half-time appointments. The development of substantive new programs is predicated upon the recruitment of more staff.
3. The development of new systems of delivery of health services so that optimal oral/dental health would be possible for the total population of the province. This will necessitate development of experimental models in hospitals, community health centres, group practices, and effective utilization of auxiliaries.
4. The development of satellite dental clinics in the teaching hospital of the University of Toronto, and in community health centres as part of a new model for delivery of dental health service and also to improve the clinical preparation of future dentists so that they will be able to extend dental services to the emotionally and physically handicapped, to the sick patient, and to the geriatric groups.
5. The early development of a multidisciplinary, mission-oriented research centre whose objective would be the discovery of new knowledge relating to the prevention and treatment of oral/dental diseases, with emphasis on the triad of dental public health programs — dental caries, periodontal disease and malocclusions in addition to more basic biological phenomena.
6. Experimentation in education programs in the direction of individualized instruction through electives; improvements in

teaching the acquisition of motor skills; and reversing the current trend toward a highly structured curriculum.

7. A model should be developed to shorten the professional training of dentists to three years without sacrifice of quality of training.
8. The Faculty, as an integral part of the academic health science centre, should more effectively utilize the inherent potential of the health science disciplines as well as the know-how in other parts of the University to develop substantive academic, research and clinical programs.

To accomplish the above objectives there will have to be an early and effective evolution of new organizational structures and administrative processes in the Faculty in order to cope with the scale and complexity of the new responsibilities.

I acknowledge with thanks the contributions of the Royal College of Dental Surgeons of Ontario to such worthwhile projects as Open House, the Faculty contingent fund, the dental research fund, and the extramural lecture fund. The support of the Faculty Research Fund has been most valuable in initiating research programs for new staff members, such as Professors Hargreaves and Sessle. In the area of continuing education, a new program to be introduced this session involves the Niagara Academy of General Dentistry. An intensive one week program in Dental Therapeutics and related aspects such as drug abuse is being planned. I am also grateful for the initiation of the Dean's Discretionary Fund. During the coming academic year I have earmarked some of this fund to the Library of the Faculty and some to invite special lecturers in Preventive Dentistry.

I want to express my sincere thanks to the academic and support staff and to the students for making my first year as Dean of this Faculty enjoyable and challenging.

UNIVERSITY OF WESTERN ONTARIO

Clinic Floor, Faculty of Dentistry, University of Western Ontario

WESLEY J. DUNN, DEAN

It is a privilege to present the seventh annual report of the Faculty of Dentistry of The University of Western Ontario to the Board of Directors of the Royal College of Dental Surgeons of Ontario.

1. Undergraduate Dental Curriculum

If one policy-recommending committee of Council can be considered more important than any other to the total program of the Faculty it is likely that one would receive little argument if he were to contend that the Committee on Undergraduate Dental Curriculum is that committee. The following is a summary of the committee's major activities and recommendations.

The most noteworthy activity of the CUDC has been the employment of a curriculum consultant, Dr. J.A.B. McLeish, Executive Vice-Chairman of the Ontario Institute for Studies in Education's Professional Education Project. Much of the year's work was directed to a review of Part I of Dr. McLeish's interim report.

Council approved a CUDC recommendation bearing on the Areas of Concentration quarter

agreeing that there should be three types of activity recognized:

- (a) Improvement of deficient clinical performance;
- (b) extension of already adequate skills and knowledge of clinical areas; and
- (c) basic science research.

In order to fulfil the requirements of the Area of Concentration quarter adequately, Council directed that each student, in the final quarter of fourth year, must have at least eight half days available each week.

Council approved the disassociation of the Timetable Sub-Committee from CUDC and agreed that the Sub-Committee should relate, primarily, to the Health Sciences Timetable Co-ordinating Committee.

On the subject of course objectives, Council agreed that a department, when initiating a significant change in course objectives, shall seek the advice of CUDC and obtain the approval of Council before the change is implemented.

CUDC embarked upon a review of the curriculum in order to discover if any unreasonable duplication in course content exists. The syllabus prepared for the accreditation survey in October was reviewed and several apparent duplications were found. The committee is now engaged in an evaluation to determine if curricular adjustments should be recommended.

In February 1971, CUDC after reviewing the interim report of the consultant, advanced several recommendations which, in the opinion of the committee, could be implemented without involving a substantial change in curriculum hours. The following are the recommendations derived, in each instance, from specific recommendations contained in the interim report:

- (1) "That the orientation and planning committee responsible for setting up the 'hospital experience' be a joint one of the dental and medical professors and that it include student representation, and it is further recommended that the Director of Medical Education of participating hospitals, where dental programs exist, be invited to be represented on the Hospital Services Committee of the Faculty of Dentistry and that it also include a student representative."

Action — Received and referred to the Hospital Services Committee for its comments.

- (2) "That a technician be designated for the pre-clinical dental laboratories, to eliminate the time lost to instruction and learning in the setting up and clearing up of laboratory periods."

Action — Approved and forwarded to the Director of Clinics for his consideration.

- (3) "That courses carry more precise statements of objectives for the information of students and faculty colleagues. It is recommended that the calendar of the Faculty describe more fully and more graphically the curricular innovations which distinguish this Faculty of Dentistry."

Action — Approved and transmitted to

Department Chairmen and to Directors of Conjoint Courses.

- (4) "That intensive work be pressed on the development and employment within the Faculty of Dentistry of the latest methods available in educational technology and that a conference in educational technology be organized for all members of the Faculty of Dentistry and that it be arranged as soon as possible."

Action — Approved in principle and forwarded to the Dean for his action. (See section in this report on Teaching Conference).

- (5) "That a committee drawn from professors concerned review the backgrounds in science of students entering the basic science courses, and that new strategies be developed to permit highly qualified students to work through tutorial or individual study, or to pursue further aspects of the work. To this end, it is recommended that achievement tests be devised for administration at the beginning of these courses, as needed."

Action — Approved in principle and referred to the Basic Science Departments for consideration.

- (6) "That a conjoint committee, perhaps chaired by the two deans, consider and encourage the development of continuing projects of common concern between dental and medical professors other than simply the contacts made through course organization meetings — for example, through mutual survey projects or research and that this recommendation be referred to the Dean of Dentistry for appropriate action."

Action — Received and referred to the Dean for his comments.

- (7) "That within the Faculty of Dentistry a co-ordinator be appointed wholly responsible for the better integration and smooth functioning of the interdepartmental conferences. It is recommended

that this professor be relieved of certain other obligations so that he can give consistent and detailed attention to the successful functioning of this program."

Action — Approved in principle and referred to the Sub-Committee on Interdepartmental Teaching for refinement.

- (8) "That in future planning of the interdepartmental conferences, attention be given to the factor of fatigue in the length of an individual session; and that efforts be made to include on occasion topics and participant discussion leaders from closely related non-medical/dental fields, and that didactic activity should not exceed three hours."

Action — Approved in principle and referred to the Sub-Committee on Interdepartmental Teaching for further consideration. (For additional commentary in this area please refer to section of report entitled "Interdepartmental Teaching").

- (9) "That a student representative from appropriate years of the dental course be included in any committees designed to improve the performance of conjoint teaching and learning in the basic sciences and in the interdepartmental conferences. In this context "appropriate" indicates that where possible a student representative has taken the course."

Action — Approved. To be activated when such committees referred to are formed.

- (10) "That faculty members who are engaged upon personal experiments in education which introduce new materials, techniques, or projects within their sphere of activity, be invited to keep the Dean and the appropriate Chairman informed of these experiments and projects, and of how well they seem to be turning out, so that a continuous stream of ideas for renewal may be constantly available for the curriculum."

Action — Approved in principle and referred to all departments for implementation.

2. Interdepartmental Teaching

The Sub-Committee on Interdepartmental Teaching of the Committee on Undergraduate Dental Curriculum presented recommendations designed to improve the IDT program. Council concurred and ratified the following recommendations:

1. The Interdepartmental Teaching sessions of the third and fourth years be now termed Oral Biology.
2. The Oral Biology sessions be held at the same time each week throughout the entire academic year, embracing a course of six consecutive quarters commencing with the second quarter of the third year.
3. The Department of Social Dentistry be invited to participate in the teaching sessions.
4. A comprehensive examination in Oral Biology be held at the end of the fourth year.
5. The non-neurophysiological and the applied neurophysiological elements of IDT Oral Biology in the present second year be removed from this year and be taught in third and fourth year programs.
6. IDT Oral Biology of second year be replaced by an integrated course of Neuroanatomy and Neurophysiology, the former discipline being withdrawn from the first year course.
7. The didactic aspects of third and fourth year Occlusion be incorporated into the Oral Biology of these years, maintaining the interdepartmental approach, organized horizontally throughout the first quarter and managed by the Committee on Occlusion.

The CUDC identified a need for a more complete co-ordination of the teaching of oral cancer. Accordingly, Council named the organizer of the Interdepartmental Program in Oral Cancer as co-ordinator of the teaching of oral cancer within the Faculty.

3. Student Evaluation Procedures

Student evaluation procedures is a subject which frequently engages the attention of the Faculty. Fair and equitable evaluations are, at best, difficult to achieve and it is to the Faculty's credit that it constantly strives to develop the most rational system possible. It is fair to say that there are many views and opinions among faculty in respect of student evaluation and these range on the one hand from the assigning of numerical marks in each discipline thus producing a numerical aggregate with student ranking dependent on the aggregates to a pass-fail-honours system without ranking on the other. Studies are proceeding in this area.

At the end of the 1970-1971 academic year the following represents the policy of the Faculty in respect of student evaluation procedures:

- (1) Senate, at its meeting of 7 May 70 approved a Grading System for the final evaluation of student performance in courses offered by the Faculty of Dentistry:

E — excellent performance
G — good performance
S — satisfactory performance
U — unsatisfactory performance

- (2) Pursuant to the above motion Senate then responded to a Faculty-approved recommendation on Student Ranking. Each Department ranks the students in the subjects of the Department and submits the ranking schedule to the Council of the Faculty of Dentistry for over-all ranking of students in each year. This ranking refers only to the final evaluation as provided for in paragraph 1 above.

- (3) The force of paragraphs 1 and 2, then, requires each Department, when it returns its final evaluation to the office of the dean, (a) to evaluate each student's performance as E, G, S, or U and (b) to rank each student in the subject being reported.

- (4) In respect of student ranking, the Senate has ruled that "publication of ranking shall not be permitted except on the written request or consent of an individual student for reasons which in the opinion of the dean justify the release."

- (5) As far as Departments are concerned there have been no circumscriptions placed on their "in term" evaluation procedures. Each department, during the course of the academic year, is free to use numerical marks, letter grades, grade points, or any other method which, to the department, best meets its requirements.

- (6) During the 22 December 69 meeting of the Council a motion was passed recommending "that each academic department be encouraged to describe (to the students) the minimum standard for satisfactory performance."

- (7) Irrespective of the evaluation methods being employed by a Department, a student should be able, during the year to relate his academic and/or clinical performance to the four performance levels employed in the final evaluation. In most instances, the numerical mark of "80" and above would constitute an "E" performance, and the numerical range 70-79 would be indicative of a "G" performance. Some Departments employ 60-69 as the range of the "S" performance while others have established the 50-69 range as indicative of an "S" per-

formance. This prerogative rests entirely with each department but it is urged that the student be informed of "the minimum standard for satisfactory performance."

- (8) Departments may, if they wish, post student marks or grades. By action of Council the names of students are not posted. Departments may employ the student number or any other number which the department may have assigned to a student which is known only to that student.

4. Term Examinations

Extensive attention was given to the number and timing of term examinations particularly as these tests affect first and second years. An ad hoc committee, representative of faculty and students and of the Faculties of Medicine and Dentistry, after careful study presented a report which was approved in principle by the Executive Committee but implementation was deferred until further discussions are possible with the Faculty of Medicine in respect of conjoint courses.

The following is the final report of the ad hoc committee:

Examination Problems:

1. Due to pressure of study immediately prior to examinations, many students are absent from classes.
2. Instructors and teaching technicians particularly those involved in the preparation of practical teaching exercises, waste time and energy teaching to poorly attended classes.
3. If a means of student self-assessment is provided during the term most students are able to estimate whether their performance is adequate prior to any term test.

4. If a term examination week is scheduled within two weeks after the end of Christmas vacation, the committee was informed that most students would not return to classes during the intervening period or would leave early for Christmas vacation.
5. Half-courses and other courses operated on the quarter system would lose valuable teaching time if a week prior to Christmas vacation was set aside for examinations, although in most cases this time could be regained by adjustment of teaching schedules within the departments concerned.

Recommendations:

1. **Continuous Self-Evaluation:** All other formal term examinations should be eliminated, and in their place some other informal method of testing instituted. Such a method might involve the use of informal short objective tests which are used for self-evaluation, and such tests should be discussed as soon as possible.
2. **Term Examination Week:** (a) One week should be set aside for mid-year term examinations in all courses which wish to give them. (b) If possible, the examinations should be scheduled during Monday, Wednesday and Friday so that students have Tuesday, and Thursday free for uninterrupted study.

Since the net time lost by setting aside one week for term examinations would almost be offset by the elimination of two additional formal term tests, the Committee sees this proposal as one reasonable solution to the problem stated.

3. **Date of Term Examination Week:** The last week of term before Christmas vacation.
4. **Timetable Changes Required:** Timetable changes will be required to complete the required number of lectures in half courses prior to the examination week. This means rescheduling approximately 12 lectures in Genetics and Biochemistry II.
5. **Student Responsibility for Attendance:** It should be made clear to students that they are expected to attend classes and laboratories during the week prior to the examination week.

5. Determination of Honours

The Faculty of Dentistry has introduced a grading scheme which categorizes student performance in each subject into one of the following four groups:

- E — excellent
- G — good
- S — satisfactory
- U — unsatisfactory

The mechanism by which each department assigns the grades to the students is one of departmental jurisdiction. In order to ascertain if a student completes his year with an over-all "Excellent" level of achievement a system had to be devised. The following system was approved and it will be re-evaluated after a period of one year's trial:

- (a) That student grades be assigned a point value of 3 for Excellent, 2 for Good, and 1 for Satisfactory performance in each subject.
- (b) That to be designated as having passed his total year's work with "Honors," a student must achieve a grade point total of 2.48 times the number of subjects he has taken in that year.

- (c) That if a student has failed to perform satisfactorily in one or more courses during the year, or if he has not completed the requirements in one or more courses by the end of the normal academic year, he is not eligible for "Honors" designation.
- (d) That in cases in which there is some question of the eligibility of a student for "Honors" designation, it is the responsibility of the Faculty, through whatever mechanisms and committee it may designate, to determine whether or not "Honors" shall be conferred.

6. Incomplete Status

There are many subjects taught within the undergraduate dental curriculum in which the final grade is based primarily upon satisfactory completion of multiple laboratory and/or clinical projects. For a variety of reasons, a student may be unable to complete the required projects by the end of term. An "incomplete" status was approved by Council to avoid the assigning of a failure to a student who may simply be slow in learning or slow in acquiring psychomotor skills. The following addition to the Calendar was, therefore, approved:

"A student who fails to satisfactorily complete the laboratory, clinical or other assignments prescribed in a subject will be designated 'Incomplete' and may be required to return to the Faculty for a specified period during the summer months in order to fulfil his assignments."

7. Regulations on Advanced Standing Admissions Rescinded

As all applicants for admission with advanced standing possess a registrable qualification for the practice of dentistry in Ontario, Council, at its meeting of 1 June 1971, acted affirmatively on the recommendation of its Executive Committee, to rescind its regulations bearing on admission with advanced standing. This action in no way affects the students already accepted into the

Faculty on the basis of advanced standing.

At best, the number of advanced admissions is so small that this mechanism provides no effective solution to the re-training of the dentists who emigrate to Canada. The 37 failures among the 41 candidates who took the National Dental Examining Board of Canada examinations in June 1971 provide mute testimony to the inability of the dental schools, employing an advanced standing mechanism, to do more than mar the surface of the problem. Experience has adequately demonstrated that the normal undergraduate dental program does not provide the appropriate re-training stratagem for foreign dentists. If a solution is to be found for this problem it will require the resourceful and effective co-operation of provincial licensing authorities, the NDEB, and the provincial and federal governments.

8. New Awards Established

The following awards were established in the Faculty during the 1970-1971 academic year:

Canadian Society of Oral Surgeons Award: a book in oral surgery or the equivalent in cash awarded annually to the fourth year student who achieves the highest standing in the subject of oral surgery.

RCDS Award in Oral Biology: a cash award of \$100.00 plus a plaque or scroll to be presented annually (commencing in 1971-1972) to the second year student who achieves the highest standing in the subject of Oral Biology.

The Faculty Association of The University of Western Ontario granted several one-time awards across the university. One was available for the Faculty of Dentistry. The award was granted to the second year student who, on the basis of a special examination, was adjudged to be most proficient in the subject of Oral Biology. The winner was Mr. Raymond C. Hillary.

The Faculty of Dentistry expresses its deep thanks and appreciation to the donors for their thoughtful generosity.

9. RCDS Centennial Admissions Scholarship

Mr. Gerald D. Seaman of first year was awarded

the RCDS Centennial Admissions Scholarship. This award will now be discontinued. The Faculty is grateful to the RCDS Board for establishing a Dean's Discretionary Fund to be used, when appropriate, to assist students needing financial help.

10. Admissions — 1970 - 1971 Academic Year

The Committee on Admissions was presented with 363 applications for the 52 places available in the first year class. Seven were declared ineligible and seven withdrew before being considered. Thus the net increase over the 279 eligible applications of the previous year was seventy.

Fifty-two students were admitted as was one unsuccessful student of the 1969-70 first year. First year enrolment in 1970-1971 was 53.

The successful applicants attained either at least a "B" average in the year preceding admission (48) or at least two years of "B" standing among the three years of Grade XIII and the two years of pre-professional study (4).

Twenty-nine students have degrees and of these students, two have two degrees — 18 B.Sc., 10 B.A., 2 B.Sc.Ph.m. and 1 M.Sc. Fifteen of the students, at the time of admission, were married. The age range was 20 to 35 with the mean, 22.7. The students came from a total of 31 Ontario communities and received their pre-professional education within a total of ten universities.

11. First Year Class Size

The rated class size for each of the four years is 52. The Executive Committee, cognizant of the fact that withdrawals, transfers, illnesses, and failures do from time to time occur, recommended the establishment of a small ad hoc committee to consider the implications of a modest increase in First Year Class Size in the hope that the clinical resources of the Faculty, in the third and fourth years, may be employed as close to the maximum utilization as possible. The ad hoc committee appointed by Council at its June 1971 meeting comprises Dr. D.B. Smith of Biochemistry, Dr. J.P. Sapp of Pathology and Dr. R.E. Jordan of Restorative Dentistry.

12. Continuing Education 1970 - 1971

The following activities were carried out during the 1970-1971 academic year:

- (a) Five short postgraduate courses were held with a total attendance of 95, almost double that of last year. In addition, a representation from the part-time and full-time faculty was able to attend as guests. Unfortunately, three other scheduled courses were required to be cancelled because of insufficient candidates.
- (b) Seventeen extramural lecture engagements were provided to dental societies throughout the province. Of these, sixteen were presented by full-time members of faculty and one by a part-time member. In addition, two two-day seminars were provided by the Department of Restorative Dentistry under a special program sponsored by the Royal College of Dental Surgeons of Ontario and the Ontario Department of Health.
- (c) Arrangements have been made to present nine short postgraduate courses during the 1971-1972 academic year. Brochures for both short postgraduate courses and extramural lectures are being distributed to all dentists and dental societies in the province.

13. Advisory Committee to the Faculty of Dentistry

Sixteen members of the Advisory Committee to the Faculty of Dentistry met on 14 October 1970. Dr. Harvey W. Reid, representative of the Canadian Dental Association, was again elected chairman of the meeting. The 1969-1970 Annual Report was employed as the resource document for the meeting.

The members of the Advisory Committee unanimously requested that their sincere congratu-

lations be extended to the Council of the Faculty of Dentistry on the school's acquisition of full accreditation status. The committee, too, was highly commendatory in respect of the performance of the first graduating class both in the examinations within the Faculty and in the examinations of the National Dental Examining Board of Canada.

The following were the requests and/or recommendations of the committee, all of which were considered by Council:

- (a) That the dean be requested, following the production of the Faculty of Dentistry's response to the recommendations of the Accreditation Survey Team, to provide each member of the Advisory Committee with a copy of the Faculty's reply.

Council Action — That this request be referred to the dean for action. Each member subsequently received a copy of the reply.

- (b) That a copy of the McLeish Report be made available to each member of the Advisory Committee, following its presentation to Council.

Council Action — That this request be referred to the dean for action. The report, of which only Part I has to date been received, has not as yet been presented to Council.

- (c) That the Committee on Continuing Education be requested to consider Basic Science Disciplines in the development of the Faculty's program of continuing education.

Council Action — That this recommendation be referred to the Committee on Continuing Education. The committee has favour-

ably considered this recommendation and expresses the hope that the profession will seek instruction in basic science disciplines.

- (d) That in view of the fact that awards for proficiency in basic science disciplines seem scarce, it is recommended that a suggestion might be made to the Royal College of Dental Surgeons of Ontario to provide an appropriate award.

Council Action — That as the recommendation in the Minutes of the Advisory Committee identified Dr. P.G. Dellow as one who might make the request, the Scholarships and Awards Committee be requested to consider this recommendation in consultation with Dr. Dellow and to recommend appropriate action. Subsequently, a request to the Board of Directors of the Royal College of Dental Surgeons of Ontario was generously acted on with the result there has been established the RCDS Award in Oral Biology.

- (e) That as there appears to be a need for some predictive documents in respect of future graduate clinical programs because all such programs have some implications for basic science departments, the Advisory Committee recommends that the Committee on Advanced Training in dentistry give due consideration to this matter and attempt, if at all possible, to develop projections which will alert the basic science departments to possible future teaching commitments.

Council Action — That this recommendation be referred to the Committee on Advanced Training in Dentistry.

- (f) That as one of the members of the Advisory Committee (Dr. D.A. Cheetham) expressed an interest in the series of half-hour programs on dental health being planned, indicating that he was reasonably certain that the television outlet in his area would welcome such programs, that Dr. B.P. Martinello be informed of this interest in the hope that it might be possible to release such material for telecasting in areas of the province desiring it.

Council Action — That this request be referred to the Chairman of the Department of Social Dentistry. Subsequently Dr. Martinello and his colleagues arranged for the production of seven telecasts which were scheduled for viewing in London through Cablecast 13. These videotapes are available for other Cablecast outlets throughout the province. The TV Series — Dentistry Today — was scheduled for July and August, 1971 on Cablecast 13 in London, as follows:

TITLE OF PROGRAM	MAIN PARTICIPANTS
Dentistry Today	J.L. Leake D.W. Banting
Periodontal Disease	K.H. Wright
Modern Orthodontics	B.R.W. Smith H.C. Parrott
Dental Radiography	J.A. Reid
Paediatric Dentistry	D.A. King
Restorative Dentistry	J.A. Guest
The Dentist and Diseases of the Mouth	D.G. Gardner J.P. Sapp

Each of the programs was also

shown during July and August on Maclean Hunter Cable TV Channel 4.

The series was scheduled for viewing in subsequent months over local channels in Chatham, Brantford, Oshawa and Newmarket (including Holland Landing and Bradford).

14. Mercury Disposal

An ad hoc committee was established to ascertain if appropriate measures were being taken within the school to avoid mercury contamination. A report submitted to Council on 22 March 1971 provided information on the methods of disposal of waste mercury and dental amalgam in the dental clinics. It was concluded that all possible measures are being taken in our procedures to avoid any form of mercury contamination.

At the March 22 meeting the terms of reference of the ad hoc committee were extended to "report on the possible hazards to faculty, staff, students and patients of the toxic properties of mercury in terms of capacity enrolment." As a consequence, the Chief of Occupational Health Services of the Ontario Department of Health arranged, at our request, for a sampling of air samples in the Main Clinic under varying circumstances and at different locations. Air samples were taken on 27 April 1971 in nine locations.

The Threshold Limit Value (TLV) for mercury for an eight-hour day, forty hours per week exposure is 0.10 mg/m³ of air. All nine samples were well below this value. The limit of detection is 0.001 mg/m³.

At the 1 June 1971 meeting of Council it was agreed that a survey be carried out annually to determine if there is an appreciable increase in mercury accumulation in the areas monitored to a point of potential hazard.

15. Pathologic Examination of Tissue

The Council adopted a policy that all tissue, including cytologic smears, removed from a patient within the clinics of the Faculty will be submitted to the Division of Oral Pathology for examina-

tion. An exception was made in respect of extracted teeth except those with lesions attached and except for any tooth that the clinician considers interesting. Should research involving human tissue be proposed a pathologist will be a member of the ad hoc committee charged with reviewing the research protocol.

16. Open House

As a part of an ambitious university-wide "open house" in November 1970 the Faculty of Dentistry mounted a wide variety of displays which attracted broad public interest. The theme, "The Making of a Dentist," was carried out through a visitor flow pattern whereby guests were shown the basic science aspects of dental education, dental pre-clinical materials and techniques and clinical practice routines in an order simulating the experience of dental students. Displays in each of these areas assumed a variety of forms including table exhibits, posters, slide-tape presentations and demonstrations of dental techniques and equipment.

An exact count of the number of visitors who toured the Dental Sciences Building was not made. According to press reports, the Health Sciences' tour was, by far, the most popular with the Engineering Sciences tour, second. Approximately 1400 visitors signed the guest book in the Engineering Sciences' Building but organizers estimated total numbers of visitors to be closer to 3,000. It has been conservatively estimated that between three and four thousand people visited the Faculty of Dentistry during Open House.

17. Ontario Council of University Health Sciences Formed

On 17 June 1971 action was taken to constitute an Ontario Council of University Health Sciences. Twenty-one senior health science academic administrators representing nine Ontario universities met in Toronto under the chairmanship of Dr. John D. Hamilton, Vice-President (Health Sciences), of the University of Toronto. Dr. J.B. Macdonald, Executive Director of the Council of Ontario Universities, was present for the morning session.

As a consequence of the day's deliberations a request has been transmitted to the Council of

Ontario Universities to give official recognition to OCUHS as a council affiliated with and responsible to COU. The purposes of OCUHS are five in number:

- (1) To provide an effective means of co-ordination of effort through a regular medium of communication between health science faculties and schools of Universities of Ontario;
- (2) To provide a forum for discussion of problems of mutual interest;
- (3) To advise the Council of Ontario Universities on matters which will influence health science education and research;
- (4) To consider such matters as may be referred to it by the Council of Ontario Universities;
- (5) To serve in a liaison capacity between the schools and faculties represented on it and other agencies, offering educational programs for allied health personnel.

The following were elected as the first Executive Committee of OCUHS:

Chairman — Dr. John D. Hamilton, U of T
Vice-Chairman — Dr. Wesley J. Dunn, U of WO
Secretary — Dr. Helen Carpenter — U of T
Members — Dr. E.J. Fisher, U of Waterloo and Dr. D.G. Howell, U of Guelph

18. Coupland Reference Library of Interpretive Radiology

Dr. James P. Coupland of Ottawa, a distinguished past president of the Canadian Dental Association and the Royal College of Dental Surgeons of Ontario, donated his collection of slides on interpretive dental radiology as a reference library for the students and faculty of the Faculty of Dentistry. Council, at its meeting of 1 June 1971, gratefully and unanimously adopted a resolution of appreciation which was immediately thereafter forwarded to Dr. Coupland. The collection called the "Coupland Reference Library of Interpretive

Radiology" is maintained by the Division of Radiology of the Department of Oral Medicine.

19. Course for Dental Assistants — Fanshawe College

In early January of 1971 the Course for Dental Assistants was launched by Fanshawe College of Applied Arts and Technology. The program had its genesis within the College's Health and Welfare Programs Advisory Committee and the various approvals by the College's Board of Governors, the Council of Regents, the Ontario Department of Education and the Board of Directors of the Royal College of Dental Surgeons were all subsequently received.

The Dean of the Faculty of Dentistry is the chairman of the Course Advisory Committee and Dr. B.P. Martinello, Chairman of the Department of Social Dentistry, is the chairman of the Course Evaluation Committee.

The students, nineteen in number, received all their clinical experience in the clinics of the Faculty of Dentistry. Assignments commenced on 30 March 1971 and continued for three days a week and later to four days a week until 25 June. During the weeks of the regular curriculum, working hours were 9-12 a.m. and 2-5 p.m. These were amended during Summer clinic to 9-12 a.m. and 1-4 p.m. In addition to assignments in the Main Clinic, the candidates progressed through the Oral Surgery Clinic, Emergency Clinic, Oral Diagnosis and Dispensary.

It has been mutually-advantageous to the Faculty and to Fanshawe to have effected this co-operative arrangement and the Faculty expresses the hope that it will continue.

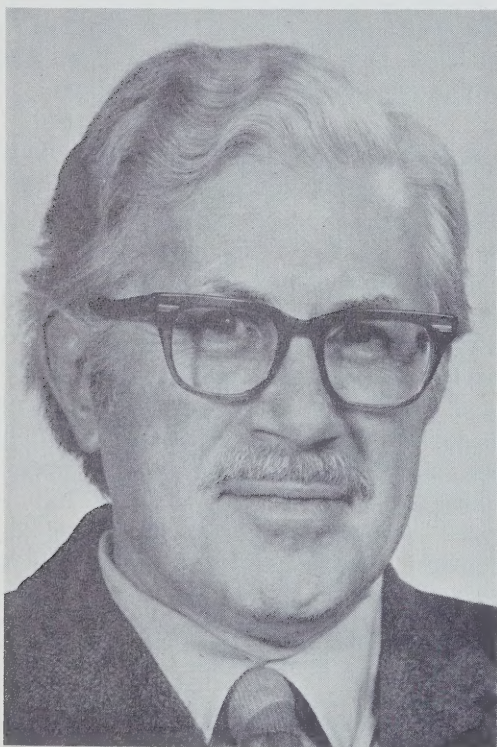

20. RCDS Contingency Fund

The Faculty of Dentistry is deeply grateful to the Board of Directors for its generosity in providing a grant of \$1,000 for a contingency fund. The availability of such "non-formula" resources is of inestimable value to the school, permitting important activities which are almost impossible to finance through the normal budgeting procedures.

The 1970-1971 academic year began with a

balance of nineteen dollars in the fund. During the year, about \$906.00 was spent leaving a balance on 30 June 1971 of about \$113.00. The following were the activities supported:

- Faculty Open house — \$212.73
- Special Curriculum Committee Conference — \$69.00
- Student-Faculty Reception — \$200.00
- Refreshments — Annual Public Lecture — \$34.80
- Student Seminar — \$57.50
- Attendance at two courses by two faculty members — \$331.80

21. Appreciation

This report to the Board of Directors of the Royal College of Dental Surgeons of Ontario would be incomplete without an expression of the deep and abiding appreciation of this school for the continuing and participating interest of the Board. The grants given for support of deserving students, for awards, and for such contingencies for which provision cannot be made within the normal university budget, are deeply appreciated and gratefully acknowledged. We appreciate, too, the Board's continuing interest and involvement in the work of the Advisory Committee.

FINANCE AND PROPERTY COMMITTEE

D.A. CHEETHAM, D.D.S.
CHAIRMAN

As you are aware, the RCDS was recently granted permission to —

- (a) continue to collect jointly, the fees required for the RCDS and for the ODA
- (b) to increase the licence fee to supply sufficient funds to cover the operating costs of the two organizations.

The Licence fee for 1972 was \$215.00, divided as follows, RCDS — \$60.00, ODA — \$155.00.

Regarding the Dental Building at 230 St. George Street, the required transfer papers have now been prepared, making the ODA (i.e. the dentists of Ontario), the owners of the property, while the RCDS continues in its management.

Prior to January 1972, Dr. K.F. Pownall had, with great effort, held the dual position as Registrar-Secretary-Treasurer of the RCDS and the Secretary-Treasurer of the ODA.

The increased volume of business and the increased complexity of problems have made this joint managerial position one that is beyond the capabilities of any single man.

It is with considerable satisfaction that I report that Dr. K.F. Pownall is now solely concerned as Registrar-Secretary-Treasurer of the RCDS.

The Finance Committee, as requested, has now established a "Reserve Fund" — see the Budget — This fund is somewhat depleted due to construction costs of the sorely needed addition, which space is now fully occupied and very well used by a number of organizations, e.g. Ontario Dental Association, Ontario Dental Hygienists' Association, Ontario Dental Nurses and Assistants' Association, Toronto Dental Nurses and Assistants' Association, Academy of Dentistry, Ontario Society of Orthodontists, Ontario Society of Preventive Dentistry, Ontario Society of Implantology, etc.

A brief explanation of the Budget for 1972 (which follows this report) —

(a) Receipts

Fees — Dentists This is composed of licence and registration fees. The estimate for 1971 is calculated on the basis of 3280 dentists paying the licence fee. In addition, there will be approximately 85 "Life Members" who do not pay any fee.

The estimate for 1972 is based on an additional 100 which makes a total of \$745,700.

Fees — Hygienists This is composed of licence, registration and examination fees. In 1971 we estimated 435 members, 56 registrants and 14 examinations. In 1972 we estimate 480 members, 56 registrants and 8 examinations.

Interest Estimate is higher than in 1971

because of larger amounts of money but on the other hand interest rates are dropping.

Rent — Equipment This is made up of monthly charges to C.D.S.P.I. of \$24, the O.D.A. \$14 and the Academy \$9.

Property This is covered in a separate budget.

Fines and Penalties This amount consists of fines for offences under the Dentistry Act.

Sundry This consists of the sale of lists of members.

(b) Expenditures

Most items are self-explanatory.

Equipment purchase Estimate in case of need for a new typewriter, adding machine.

Rental The RCDS pays directly for rental on addressograph machine and photocopier. The RCDS pays C.D.S.P.I. for IBM equipment, etc.

(c) Surplus Account

A simple explanation of the composition of the surplus account in the RCDS General Ledger is —

Cash in bank as of December 31st (not including deferred income from next year's licence fees) —

Plus — Value of Bonds, viz. —

Cash — \$56,950
Bonds — 42,000

Surplus — Jan. 1, 1971 — \$98,950

Additional items, e.g. grant to President, allowance for additional assistance to enforce the Act, etc., were noted in the Minutes of the Board meeting.

SURPLUS ACCOUNTS — RCDS

PROPERTY BUDGET — 1972

Surplus — January 1, 1971	\$266,848.00
Add:	
Excess of receipts over expenditures (re: estimate 1971)	9,410.00
	<u>\$276,258.00</u>
Deduct:	
Book value of land and building	177,308.00
Surplus — January 1, 1972	<u>\$98,950.00</u>
Add:	
Excess of receipts over expenditures (re: budget 1972)	8,614.00
Surplus — January 1, 1973	<u>\$107,564.00</u>

REGISTRATION AND LICENSURE COMMITTEE

J.R. CALLINGHAM, D.D.S.
CHAIRMAN

April 1971 Board Meeting

Graduate Courses in Endodontics and Prosthodontics:

In November 1970 the Committee had recommended to the Board that the Faculties

expand the graduate programs in all phases of dentistry as quickly as staff, facilities and finances permit. Particular mention had been made of endodontics and prosthodontics.

A recommendation by the Committee "that the Board agrees in principle that endodontics be recognized as a specialty, providing all candidates possess a minimum of two years' graduate training in that area" was not approved by the Board. Discussion of prosthodontics as a specialty was deferred for the present.

Specialty Certification and Grouping:

Discussion centred on the grouping of specialties as presented to the Board in November 1970, on which no action was taken. The CDA Council on Education had proposed a grouping for submission to the Board of Governors in September 1971, and as a result the RCDS Board deferred consideration of this question pending CDA action.

Specialty Consultants:

As approved by the Board, the Liaison Sub-Committee's name was changed to "Specialty Consultants to the Registration and Licensure Committee of the RCDS", with two consultants from each specialty, one appointed by the Committee and one selected by the provincial specialty organization.

The Board approved the following nominations by the specialty groups:

Ontario Society of Orthodontists — Dr. Bruce Ross
Ontario Society of Paedodontists — Dr. Franklin Pulver
Ontario Society of Oral Surgeons — Dr. Richard Booker
Ontario Society of Periodontists — Dr. H. Freedman
Ontario Society of Public Health Dentists — Dr. A.B. Sutherland

The following nominations by the Registration and Licensure Committee were approved by the Board:

November 1971 Board Meeting:

Oral Surgery Program at Doctors' Hospital, Toronto:

The Dean of the Faculty of Dentistry,

Orthodontics — Dr. W.S. Hunter
Paedodontics — Dr. A.W.S. Wood
Oral Surgery — Dr. N.B. Lightford
Periodontics — Dr. J.E. Speck
Dental Public Health — Dr. M.E. Jarrett

Program in Oral Surgery at Doctors' Hospital, Toronto:

The RCDS has gone on record that the products of any further programs in oral surgery which are not affiliated with a teaching hospital would not be recognized for certification in that specialty. This applied to the program in oral surgery at the Doctors' Hospital, which is not so affiliated. If this program formed part of a formal program within the Faculty of Dentistry, University of Toronto, the RCDS Board would be prepared to recognize the relationship and grant certification to the hospital's graduates in Oral Surgery. This matter will be followed up.

Certification of Specialists — National Dental Examining Board of Canada:

As a result of a recommendation by the Canadian Academy of Periodontology concerning freedom of choice of location of practice, the Committee recommended "That the National Examining Board of Canada should have a role to play in the certification of specialists so long as this is an accredited program."

No action was taken by the Board.

Applications for Certification:

Oral Surgery —	Dr. Malcolm J. Gibson
	Dr. Robert J. Pye
Paedodontics —	Dr. Gerald Z. Wright
Periodontics —	Dr. Robert Lundy
	Dr. Marvin Stutman
	Dr. Robert H. Johnson

Approved by the Board when all remaining requirements met.

University of Toronto was informed that if the oral surgery program at the Doctors' Hospital could become part of a formal program within the Faculty, this would permit the RCDS Board

to grant certification to the graduates of the hospital oral surgery program. Dr. Nikiforuk indicated no answer could be given at present.

The oral surgery specialty consultants, Drs. Lightford and Booker, will also look into this question.

Training Program in Oral Pathology — Faculty of Dentistry, University of Toronto:

The Faculty of Dentistry, University of Toronto, had requested the Ontario Hospital Services Commission to establish one residency per annum for training in oral pathology and medicine, and asked the RCDS to support their proposal. This was agreed to by the Board.

Specialty Certification and Grouping:

The question of specialty certification and grouping was again deferred. The Board requested the Committee to reconsider the applications for

specialty recognition in the disciplines not presently recognized and which have been applied for and bring in recommendations to the next Board meeting.

Applications for Certification:

Oral Surgery —	Dr. Sheldon M. Claman
Orthodontics —	Dr. Michael G.D. Culbert
	Dr. Gilbert E. Dodds
	Dr. William L. Wilson
	Dr. Ernest I. Fedun
	Dr. Albert J. Colle
	Dr. Frank V. Dudas
Paedodontics —	Dr. John A. Hargreaves
Periodontics —	Dr. Paul D. Schuller
	Dr. Robert S. Turnbull
Dental Public Health —	Dr. Kenrick Kawaii
	Dr. Raymond E. McDermott

Approved by the Board when all remaining requirements met.

NATIONAL DENTAL EXAMINING BOARD

**J.D. PURVES, D.D.S.
R.C.D.S. REPRESENTATIVE**

1. The National Dental Examining Board of Canada met in Ottawa June 14 and 15, 1971.

2. Two new representatives from the Council on Dental Education are Dr. John Speck and Dr.

M. Crompton. Dr. Speck was made Chairman of the Committee of Examiners. This Committee met in Ottawa October 4th, 5th and 6th to prepare three new sets of examination papers from the question bank. We have now received more than 1,200 new questions. Many of these require translation into French. The examinations will be composed of questions from this bank.

3. Action on the RCDS resolutions of November 10th, 1970 and January 18th, 1971 was unable to be resolved by all provinces. The majority opinion favoured continuing the \$200.00 fee and leaving the decision in regard to a rebate to each province.

The concept of the deferment of "picking up" the NDEB certificate by March 31st was felt to be unwieldy in its management and again the majority decision favoured no deferment.

4. The number of Canadian candidates who accepted their certificates this year was 326. The breakdown is as follows:

School	No. applying for Certificate	NDEB Certificates granted as of June 14/71
U of B.C.	19	19
U of Alta.	46	46
U of Man.	28	28
U of Tor.	99	91
U of WO	9	9
U of Mont.	67	58
McGill	36	36
Dalhousie	22	22
	326	309

American Graduates (inclusive of Canadians registered in US schools) and Canadians graduating prior to 1952 (now eligible to write) 38

Total for 1971 347

Total Number of NDEB Certificates granted since 1952 2587

5. Candidates writing the NDEB examinations in May 1971 — 32; Passed — 20; Failed — 12.

Distribution of these candidates was:

Ontario	5
Quebec	8
British Columbia	1
USA	13
Korea (DDS McGill 1970)	1
Guyana (DDS Loyola - Univ. of Chic. 1950) . . .	1
Haiti (DDS Univ. Montreal 1969)	1
Jamaica (DDS Howard Univ. 1966)	1
Greece (DDS McGill 1962)	1

6. The first Foreign Dentist Examination was held May 25th to June 8th, 1971. The screening committee reviewed 68 applications and accepted 56 as being eligible to write. Of these 41 finally sat the written examination.

	Passed	Failed
Written Exam.	22	19
Preclinical Exam	20	2
Clinical Exam	4	16

The examinations were sequential and required an aggregate of 75% in all subjects. In the pre-clinical and clinical 65% was required with a minimum of 55% on any subject. The experience, repeated that found in those schools which have accepted foreign graduates into their undergraduate course. Standards and philosophies of dentistry and dental treatment do not meet our minimum standards. For those who passed it could only be said that they barely passed the minimum standard required of Canadian students.

Those failing the written examinations failed very badly — not marginally. They were refunded \$500.00. As with our by-laws for eligible candidates these foreign graduates have the option of repeating the examination series one more time.

Those failing the clinical will be required to repeat the clinical portion only and are allowed one opportunity to repeat.

Examinations for next year are at the University of Toronto (May 1st to 16th).

7. A meeting between the Presidents and Secretaries of the RCD(C) and the ACFD and the NDEB took place on September 27th in Ottawa. Two issues were considered:

- (a) The possibility of sharing a common secretary and, in the case of the NDEB Registrar of each organization. Preliminary discussions were in acceptance of the concept. Details are to be worked out when each Board meets. The NDEB is compelled to appoint a Registrar-Secretary to relieve Dr. Proctor.
- (b) The possibility of the NDEB and the RCD(C) jointly engaging in a program similar to that of the undergraduates, upon the accreditation of schools of graduate study. The RCD(C) would be the examining facility and the NDEB the grantee of national certification. The RCD(C) would continue to carry out a certification fellowship program as has been done formerly.

8. Dr. D.B. Proctor is speaking to the Annual Students' Conference on the NDEB — its broad philosophies and objectives.

9. I was requested last year to prepare a statement relating to a projection of the role of the NDEB in the future. In brief, the report recommended the NDEB be the national certification facility of all programs accredited by the CDA. Such programs as Dental Hygiene, Dental Assisting and Dental Internships are but a few. The possibility of initiating Dental Technicians into such a program could be considered a future objective beginning with the two programs now in existence across Canada. The Board therefore has authorized the opening of the Act of Incorporation to broaden such a base for future growth and development of standards. This is currently under way.

10. The role of the NDEB is gradually emerging and, in keeping with the improved financial situation, could carry us on our way with greater security. The need for development of a reserve fund, appointment of at least a half-time Registrar, need for more office space than presently exists and the repayment to the licensing bodies of the \$12,000 they "loaned" are all present obligations we are aiming to secure. Greater experience in the foreign dentist examination procedure to allow for future projections can also be of help. For the present at least we plan to retain the \$200.00 NDEB certificate fee and perhaps when our house is entirely in order we can consider its reduction.

I have been pleased to serve the RCDS Board on the NDEB and as the President of the latter hope to achieve some of the objectives conceived twelve years ago.

TREASURER'S REPORT

K.F. POWNALL, D.D.S.

1. Financial Statements

1. The Auditor's Report, the Balance Sheet and list of investments as of December 31, 1970, are attached to this Report as Appendix A.
2. The Statement of Receipts and Expenditures as of the same date is attached as Appendix B.
3. The Auditor's Report and Balance Sheet for the Harry R. Abbott Memorial Library Fund are attached as Appendix C.

2. The Year 1970 — The Year of the Addition

For several months during 1970 the work of the College was performed amid the roar of construction in the background. The agony caused by the upheaval and disruption during the construction of the addition has, however, been offset by the pleasure the new quarters are now providing.

It is pleasant to listen to the compliments of visitors to our headquarters building.

Also there is no doubt that because of the additional working space, staff efficiency has increased.

3. Revenue

Our revenue amounted to \$447,970. The increase is mainly due to the increase in the number of dentists licensed in 1970.

4. Expenditures

Expenditures amounted to \$442,746, resulting in an excess of revenue over expenses of \$5,224. Expenditures in 1970 were greater than usual due to renovation and building. Salary charges were greater because of additions to the staff and general salary increases. While postage expenses also increased in 1970, it should be noted that our book-keeping is on a cash basis rather than on an accrual basis, so that postage on the meter is charged in the year purchased and not necessarily to the year the postage is used. This causes variations from year to year but it balances out over a longer period. Increases in Board expenses were caused by the need for extra meetings and other activities during the year.

5. **The Cost of Living**
The cost of the addition to the building amounted to \$119,524. This figure includes the costs of furniture and fixtures, architect's fee, etc. This makes the total cost of the building \$199,375. The land is valued at \$10,000.

6. **The Harry R. Abbott Memorial Library Fund**
The funds for this account are derived from the interest on a capital sum bequeathed to the RCDS in 1924 for the purchase of books for the Harry R.

Abbott Library, which is part of the library of the Faculty of Dentistry, University of Toronto.

7. **Securities**
It is noted that a Province of Ontario Bond matures in July 1971. At the request of the Finance and Property Committee, a review of our method of handling surplus funds is underway.

8. **Re-appointment of Auditors**
The re-appointment of Thorne, Gunn, Helliwell and Christenson for 1971 was approved by the Board.

AUDITORS' REPORT

APPENDIX A

To the Directors of the
Royal College of Dental Surgeons of Ontario

We have examined the balance sheet of the General Account of the Royal College of Dental Surgeons of Ontario as at December 31, 1970 and the statement of revenue and expenses for the year then ended. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion these financial statements present fairly the financial position of the General Account of the College as at December 31, 1970 and the results of operations for the year then ended, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

AUDITORS' REPORT

To the Directors of the
Royal College of Dental Surgeons of Ontario

We have examined the balance sheet of the Harry R. Abbott Memorial Library Fund of the Royal College of Dental Surgeons of Ontario as at December 31, 1970. Our examination for the year ended December 31, 1970 included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion the accompanying balance sheet presents fairly the financial position of the Harry R. Abbott Memorial Library Fund of the College as at December 31, 1970 in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

PRESIDENT'S REPORT

N.L. DIEFENBACHER, D.D.S.

This, my final report as President of the R.C.D.S., is written with a conflict of emotions. I am pleased to have those busy two years completed, to permit me more time for my practice and personal life. I am disappointed that many topics and issues I had hoped would be resolved, have had to receive less attention than under normal circumstances. It is unfortunate that a small group of totally unqualified people, practising illegally as dental mechanics, motivated only by personal financial gain, have been able to utilize so much of the Board's time. This has been a glaring example of what a highly financed campaign, with a pseudo concern for the poor and the gullible public, can do to influence people making political decisions. To discover that finally their costly and time-consuming efforts have met with rejection by the Legislature of Ontario, is considerable compensation for the efforts expended.

The year 1972 began with the announcement that a Task Force on Dental Technicians would do a comprehensive study into the delivery of denture services. This committee was comprised of three lay people, and chaired by Miss Donna Haley, Q.C. The hearings were held on

February 8th and 9th, with the following groups invited to participate, viz. the R.C.D.S., the Ontario Dental Association, the Governing Board of Dental Technicians, the Dental Laboratories Association of Ontario and the Denturist Society of Ontario. There were also presentations made by the University of Western Ontario, the University of Toronto and the Consumers' Association of Canada. The Denturist Society refused to appear with the other groups in attendance, which merely confirms that their position cannot be exposed to an unemotional scientific evaluation of their qualifications and motives, even before a lay group. As a result, all groups were heard in camera. I am sure that the recommendations of this Committee, as well as the Ontario Council of Health, are known to all. The key recommendation was that the dentist must be ultimately responsible for all dental services, and therefore these auxiliary personnel must work under the supervision of a dentist. Every study done of this problem has reached a similar conclusion.

It is imperative that I mention the tremendous assistance provided to Dr. Pownall and

myself at that time by Dr. M.E. (Mike) Lucyk. He not only provided us with most of the background and research material, but also donated hours of his time in the preparation and presentation to the Task Force. "Thank you, Mike!"

The report of the Task Force was eventually made public June 23rd, 1972. Bill 203, or the Dental Technologists Act, was tabled in the Legislature June 26th, 1972. This legislation ignored the key recommendation of the Task Force, and would permit a dental technologist to provide complete dentures directly for the public, with no supervision. It was now time for Dentistry to completely inform every member of the Legislature of all aspects pertaining to the provision of these services, as had been done for the Task Force. Sponsored by the Ontario Dental Association, many men devoted countless hours of their time to this endeavour. As a result, Bill 203 was withdrawn, and replaced by Bill 246, with significant changes. This auxiliary, now called a denture therapist, could perform these services only under the supervision of a dentist. This places the ultimate responsibility on the person most qualified, thus ensuring the quality of care the public deserves. This Bill received third reading December 15th, 1972.

Also in December, amendments to the Dentistry Act received third reading. The principal changes are — penalties for violations are significantly increased; the R.C.D.S. will maintain a roster of dentists providing low cost denture services; three lay members will be appointed to the Board of the R.C.D.S.

The new Health Disciplines Act, an omnibus act, as well as new legislation for all health disciplines, should be introduced in 1973. A considerable amount of time was spent on this legislation in dialogue with Government during 1972. When the new legislation is enacted, the R.C.D.S. will then collect only the licence fee which applies to that organization. In effect, the Ontario Dental Association and the Canadian Dental Association membership will be strictly voluntary.

The Board also passed a by-law making it mandatory that when a laboratory fee is involved, a member of the College shall itemize his

accounts which he submits to patients and/or third parties and therein separate laboratory costs from the professional fee. This should finally silence the critics of our profession that dentists receive a "mark-up" on laboratory services.

The "principle" of the acceptance of credit cards for payment of dental accounts received approval. Individual credit cards must now meet a set of guidelines in order to be approved by the Board. To date no card has been approved. It is imperative that this area of dental practice maintain a high degree of professionalism.

As of January 1st, 1973, all dentists licensed in Ontario are automatically covered for malpractice insurance. The cost of this is included in the licence fee. This will protect the public of Ontario by ensuring that every practitioner has this important coverage. It will also enable the R.C.D.S. to have closer supervision of the types of claims and the number processed, as well as accurate costs. This is something a private carrier does not provide.

The transfer of ownership of the property at 230 St. George Street to the Ontario Dental Association has now been completed. The College is still responsible for the management of the building, and the tenants remain unchanged.

I believe that communications with the profession have improved considerably in the past few years. In spite of the improvement, however, the comments frequently heard indicate that it is still not satisfactory. Although this responsibility rests mainly on the shoulders of your leaders and elected representatives, it is also essential for all societies and individuals to assist in the dissemination of information. The future of dentistry and the delivery of dental services are changing rapidly. It is imperative that this is recognized and accepted *now*, so that we are prepared to act instead of react. I trust that all members of our profession will approach their individual responsibilities with a strong social conscience. If this is done seriously, then the future of Dentistry can be bright indeed.

I would like to thank Mr. W.E. (Gene) Jackson for the many years he has served the R.C.D.S. as Business Manager. It was with regret

that we accepted his resignation, and he is now in the full-time employ of C.D.S.P.I. I am certain he will continue to provide the same capable administration as he has done for the R.C.D.S. since 1958.

I wish to welcome two new members to our permanent staff — Miss Joyce Deeton and Mr. Fred Hargreaves. They have adopted the dedication and devotion to their duties displayed for many years by Dr. Pownall and Mrs. Shand. We are most fortunate to have such an excellent staff.

The members of the Board who served during the past two years have given unstintingly of their time, as well as complete co-operation and support. In particular, two people who are leaving the Board deserve special mention. They are Dr. Harry Jolley and Dean W.J. Dunn. Their contribution to the success of organized Dentistry will serve as an example for others for many years. The sincere dedication and effort they have exhibited were performed in a manner to which all Dentistry can look up with pride.

Another bonus I have enjoyed was to be the representative to the Ontario Dental Association. This provided me with the opportunity to work with some very fine people — the O.D.A. Board of Governors, the Executive Council and the permanent staff of the O.D.A.

There is one person who deserves special praise — none other than our Registrar-Secretary-Treasurer, Dr. Kenneth F. Pownall. This tireless and dedicated servant of Dentistry is the prime reason for all the successful functioning of the R.C.D.S. He is a very exemplary representative of this Board at all times. He has been of inestimable assistance to me, as well as giving sound guidance to representatives of the Board whenever this was required. A sincere "Thank you, Ken!"

Finally, I would like to express my appreciation for the opportunity afforded me to be President during the past term. It has been a great experience to meet and work with so many fine people.

COMPLAINTS COMMITTEE

*R.C.D.S. Complaints Committee
I. Dr. Blake McAdam, Chairman; Dr. George Burgman*

REPORT — APRIL, 1972 MEETING

Since the last meeting of the R.C.D.S. Board in November, 1971 The Complaints Committee of the R.C.D.S. has held hearings in November, January, February and March. It has heard complaints in 40 cases and in addition has expressed opinions in many other instances of irregularity. While the nature of these complaints conformed to the classification outlined in the previous report, the majority concerned the proficiency of service received. The quality of dental treatment that may be considered of an acceptable professional level is a difficult imprecise, yet essential standard to determine — especially at this time when alternate sources of dental service are being offered to the public.

On one hand there are the visible, measurable results of incorrect diagnosis and of dental treatment which are obvious to the patient, dentist and a mediator — though each may interpret them differently. Objective opinion must be qualified by the length of time that has lapsed since the end of treatment — especially in the

instances of removable treatments which cannot be expected to fit if they have not been worn for a long time. Deficiencies, inadequacies, discomfort and failure are all too apparent to the patient and form the basis of his complaint.

On the other hand, the mitigating circumstances that lead to imperfect results are almost too numerous to mention. Broken appointments, poor oral hygiene, inability to adapt, vacillating aesthetic demands, personality incompatibility, physical limitations to the operative environment, tissue response to treatment etc. all compound the problems of the dentist and limit the degree of success that accrues from a routinely acceptable technique procedure. While these factors are cited at length by the dentist in replying to complaints regarding the quality of his services, they are often not measurable, impossible to substantiate, and frequently in direct conflict with the patient's recountal.

At the point in time when the Complaints Committee seeks to assess the nature of a complaint, it

can only attempt to reconstruct the chain of events and measure the results in the light of mitigating circumstances. Since this is an imprecise procedure that is often based on highly amplified and opinionated recollections, a reasonable distribution of responsibility in many instances can only be attempted by partial financial restitution that fully satisfies no one. To the extent that there is complete failure that is not of the patient's doing, yet which requires repetition of treatment elsewhere, full restitution is generally recommended even though the dentist has expended conscientious time and effort. Such a return of fees should not be construed as "malpractice", or as an "admission of incompetence" or as "faulty", but should be seen as responsible efforts by a member of a mature profession to share the onus of dental treatment in spite of mitigating circumstances.

While the following classification is an oversimplification of the cases examined, it serves as a general grouping:

1. An inadequate or defective service was rendered.

There were 25 cases with this basic complaint. In 9 instances, the patient was completely supported with the dentist advised to return all funds or fully correct the treatment. In two of these instances, where the diagnosis was considered wrong and the remedial treatment exceeded the fee collected, the dentist was advised to reimburse the patient to the extent of the remedial treatment — though not to the great extent sought by the patient. In 6 cases, the dentist was completely supported, for the treatment was felt to have a good clinical result in light of the oral conditions and the fee was reasonable. In 7 instances, the differences were resolved on a 50:50 basis. In one instance a majority support was given to the patient and in another instance a majority support was given to the dentist. In one instance the complainant wished to remain anonymous so that the dentist was merely advised of the nature of a complaint.

2. One dentist impugns the services rendered by another.

There was one case of this type and while the Committee sympathized to a degree with the dentist that was faulted, it was unable to establish that the rampant initial and recurrent caries found in the mouths of four children shortly after the completion of treatment was properly controlled through effective early treatment. The second dentist was advised to send his account for remedial treatment to the first dentist.

3. The dentist has broken a by-law governing dental practice.

Three dentists were interviewed regarding incorrect notices or articles placed in the newspapers. One dentist was interviewed regarding the submission of a fraudulent account to the Welfare Plan and acknowledged the inaccuracies in this one instance. While he pleaded emotional duress, and acknowledged the inaccuracies in this one instance, the Committee recommended that he be brought before the Discipline Committee for further examination.

4. The patient does not understand the services rendered.

In the two instances of this type, the dentists were supported. One involved conflicting recommendations from different dentists on the number of teeth requiring fillings. In the other case, the dentist was advised to carry out minor corrective adjustments at no fee.

5. The service is too expensive.

In one instance involving an estimate, the patient was completely supported and considerable time was spent with the dentist regarding his practice management. In another instance, the dentist was fully supported. In 4 other cases, partial settlement was recommended that favoured this patient in one instance and the dentist in 3 instances.

6. **Approval was not given for treatment performed.**

In one case of this type, a surgeon removed a permanent cuspid on his own advisement to relieve crowding in the mandible of a child. As a result, orthodontic and restorative treatment will be required and he has agreed to underwrite that cost once it is determined. In another instance partial restitution to the patient was recommended.

It is hoped that the effective use of the Mediations Committees of our local societies along with the good offices of the Secretary of the Royal College of Dental Surgeons will minimize the activities of the Committee in the ensuing months.

REPORT — JUNE 1972 MEETING

Since the last meeting of the R.C.D.S. Board in April, 1972, the Complaints Committee has held a full day hearing in April, May and June with one hearing lasting 9:00 a.m. until 11:30 p.m. It heard complaints in cases which are categorized later in this report. As was expressed in previous reports, the Committee is concerned with the increased use of its facility — not only by the public directly, but also by outside agencies awaiting a technical assessment of disputed treatment before carrying on with their own proceedings.

Of concern is the machinery by which this Committee is to run in the future in light of the responsibility demanded of it by the Minister. The following must be noted:

1. As presently conducted, one full day hearing a month is minimal and it is possible that two days may be required in some future months. It may well be that a different committee membership will run the hearings with great efficiency and dispatch in future so that such time expansion will be unnecessary — however, the volume of cases handled can only increase. It is difficult to assess the impact of creating a superior lay board of appeal and of encourag-

ing dissatisfied patients in its use. Where such exists, however, it is reasonable to project several hearings for a single case.

2. Each committee member requires the previous evening to familiarize himself with the correspondence involved with a case and to determine the nature of the problem.
3. In addition to the excellent co-operation of the R.C.D.S. staff in compiling the reports and drafting the correspondence to those concerned, it is essential following a hearing, that the Committee Chairman edit all reports and correspondence to ensure that the feeling of the Committee is clearly expressed and that all recommendations are stated accurately and unambiguously. In all, this involves an additional half day of time.
4. For mechanical reasons, the Chairman should be located in or very near Toronto if the above procedures are to be conducted with reasonable efficiency. Many dentists involved in complaints phone the chairman to discuss recommendations or request clarification of correspondence.
5. It must be noted that to date no Chairman or Committee member has consented to a second term of office since the nature of the post — while gratifying at times — forces him to judge his confreres and to deal with many cantankerous patients.

While all Committees and posts of the R.C.D.S. are onerous, time consuming and responsible, the members of the Complaints Committee suggest that the Board be aware of the increased dimensions of this component, of the monthly time demands placed on its members and the possible need of adding a part-time em-

ployee. He should be versed in dental-legal procedure to conduct the business of the Committee after the day of the hearing and receive all queries from dentists and patients. Such a person could be a recording secretary and would lend continuity to this function.

The 27 cases heard during the past quarter may be classified loosely as follows:

1. There was an inadequate service rendered

18 cases were primarily of this category and some involved overlapping fees of other dentists conducting coincident treatment. Ten conclusions favoured the patient's position. Of these, 4 recommended full return of the money involved; 2 recommended 2/3 refund, and 4 recommended 1/2 refund of monies involved. Of the 8 conclusions favouring the dentist's position; 3 recommended retention of all fees, 3 recommended refund of 1/4 of the fees and 2 recommended a refund of 1/2 of the fees.

2. One dentist impugns the service of another

Two cases of this type were involved. In one instance the accused dentist was supported; in the other instance he was advised to pay for remedial treatment resulting from his inadequate diagnosis.

3. The dentist broke a By-law of the Dentistry Act

Two such instances were heard as a result of unintentional advertising or excessive use of signs.

4. The patient did not understand the services rendered

In two instances, the dentist was completely supported and an effort made to clarify the details of treatment. In one instance the dentist was supported but advised to return one half of his fee.

5. The service performed was too expensive

In the one case of this type, the patient was supported and a return of 3/4 of the fee recommended.

6. The fee exceed the estimate

In the one case of this type the patient was supported to the extent of the excess.

REPORT — NOVEMBER, 1972 MEETING

Since this will be the final report of the Complaints Committee of this Board, Dr. Burgman and I would like to thank those members of the R.C.D.S. staff who so ably prepared for these meetings and attended to the stenographical detail. In particular, we are indebted to Miss J. Deeton and Mrs. K. Shand for their able and cheerful assistance.

Over the past two years this Committee has endeavoured to hear complaints brought by the public against the profession, to reconstruct the events and to assess the results. In light of the above, this Committee then attempted in an unbiased manner, to present the complaint to the dentist on behalf of the patient, and to the patient on behalf of the dentist — hopefully to clarify misunderstandings and to bring objectivity to both. In doing so, occasionally both parties were content, sometimes only one was content and often neither party was satisfied.

In determining whether or not the dental treatment performed represented a reasonable clinical result, we attempted to apply those standards set by this College. To accept as satisfactory those standards that were significantly lower, would have been to condone a level of practice that was not in keeping with the high level of service the dental profession professes to maintain. Where mitigating circumstances unexpectedly resulted in treatment that was below the undergraduate standards, sharing of the cost was recommended.

One item in particular was out of the ordinary and worthy of comment. The Committee examined 4 patients of a dentist who had pledged to cease the practice of enamel fissure eradication. This was done in order to determine whether this pledge had been violated and ample evidence was seen to establish that such was the case. However, since enamel fissure eradication was not illegal and was being taught in the under-

graduate paedodontic programme at the U. of T., it seemed desirable to establish what constituted an acceptable practice of this procedure and to so advise the dentist concerned before referring him to a hearing of the Discipline Committee. Such guidelines would then establish the clinical limits for both the dentist and any subsequent examining committee since they would be based on the practice of this procedure by standards upheld by this licencing board. The criteria for enamel fissure eradication was thus outlined, the dentist so informed, and a recommendation made for a future random sampling of patients before proceeding further with this dentist.

MEETINGS WERE HELD DURING JUNE, SEPTEMBER AND OCTOBER WHERE 23 CASES WERE EXAMINED.

An inadequate service was performed.

There were 17 cases of this nature in which we supported the patient fully in 4 instances and the dentist fully in 4 instances. The dentist received the majority support in 7 instances, the patient in 1 instance with equal responsibility shared in 3. Several refunds were recommended, the largest being \$2,000.00 of a \$3,235.00 fee and in another instance, all of a \$1,168.00 fee. In one instance an apology was requested from the dentist for an overly expressive letter that he sent to Star Probe.

Treatment was not understood.

In the 2 cases of this nature, the dentist was fully supported in one and mostly supported in the other.

Treatment was not completed.

Two orthodontic cases were of this variety where treatment was terminated due in part to incomplete cooperation by the patient. It was suggested that the dentists concerned either complete the lengthy cases or offer some refund to permit completion elsewhere.

The three final meetings of this Complaints Committee fully occupied the days of November 3, December 1 and December 7, 1972.

Of the twenty-seven cases heard, 17 of them centred around patient dissatisfaction with the quality of dental treatment rendered. In 5 instances, the dentist was completely supported; in 2 instances the patient was completely supported; in 5 instances the responsibility was equally distributed between patient and dentist; and in 5 instances the majority of support was given the dentist.

There were three cases involving the competence of the dentist. *In one instance*, the dentist was completely supported when asymptomatic external resorption involved the possible loss of two central incisors. *In another instance*, one dentist complained of the lack of competence and professional behaviour on the part of another dentist in his community and backed his report with documented evidence. The latter dentist was examined, cautioned to upgrade his practice methods and required to advise this College of the extension courses he proposed taking. *The third case* was referred by the Department of Health and Welfare and involved the injudicious use of drugs by a dentist who was also critical of the practice methods of his confreres. This dentist was severely cautioned to amend his practice methods and professional outlook.

In 6 cases involving complaint of excessive costs, the patient was fully supported in 2 cases, half supported in 3 cases and unsupported in 1 case.

One dentist was cautioned against an incorrect use of a newspaper announcement.

DISCIPLINE COMMITTEE

R.C.D.S. Discipline Committee

l. to r. J.R. Callingham; P.R. McCutcheon; H.M. Jolley, Chairman; D.A. Cheetham; D.I. LeCocq

APRIL 1972 BOARD MEETING

1. At the direction of the Board, the Committee met on Thursday, November 11th, 1971, to inquire into the alleged "misconduct in a professional respect" of a member of the College.

All members of the Committee were present.

2. The Committee was assisted in its examination of the charge by Mr. Barry Wortsman of the firm of Shibley, Righton & McCutcheon, Counsel for the College, and Mr. R.J. Genereux, Counsel for the defendant.

3. The Committee found that "the procedure you followed left yourself open to criticism and formal complaint. Nevertheless, the explanation given and the supporting comments of other witnesses have raised a reasonable doubt in our minds".

The finding therefore was "Not Guilty".

The Committee recommends that members of the College be made aware of the following:

- (a) Any member of the College who employs methods, techniques or procedures which vary to any degree from those established and customarily accepted by the profession, must be prepared to present evidence to justify or to vindicate their use.
- (b) When treating female patients, male members of the College should exercise extreme caution to ensure that their conduct could not be interpreted as being improper in a professional respect. In this regard, office layouts, open doors, presence of other patients, presence of an accompanying friend or members of the family can all be useful. Probably, the single, most useful means to be

employed to obviate the possibility of any misunderstandings or misinterpretations of procedures — whether of a routine or emergency nature — is the presence of a female assistant.

JUNE 1972 MEETING

1. At the direction of the Executive Committee, the Discipline Committee met on Monday, April 10th, 1972, to inquire into the alleged misconduct in a professional respect of Dr. Andy Ilmar Timberg of 365 Woodroffe Avenue, Ottawa, Ontario, a member of the R.C.D.S.
2. Dr. Timberg was charged with "infamous, disgraceful or improper conduct in a professional respect in that, within the period of September 9, 1971, to date, and notwithstanding the directive of the Complaints Committee to desist from engaging in the conduct hereinafter described, you did, in the course of practising dentistry at your above-noted professional offices, represent or hold yourself out to the public by, inter alia, advertisement in the yellow and white pages of the Ottawa-Hull Telephone Directory Listings, by the sign on your office door and by your description in the directory of the building wherein your said office is located, as a specialist in the practice of Orthodontics, although you were not the holder of an unrevoked certificate of qualification in that specialty, contrary to Section 14 of Article XIV of the By-laws of the Royal College of Dental Surgeons of Ontario".
3. All the members of the Committee attended the inquiry.
4. The Committee was assisted in its deliberations by the Counsel of the College, Mr. Richard E. Shibley, Q.C.
5. Dr. Timberg pleaded guilty to the charge.
6. The Committee then directed that (1) Dr. Timberg's licence to practise dentistry be suspended for a period of three months —

the suspension to take effect in one month — on May 10th, 1972;

- (2) He was fined \$1,000.00;
- (3) He was to pay the costs of and incidental to the inquiry;
- (4) A reprimand was to be recorded on his personal record;
- (5) The suspension of his licence was to be remitted on payment of the fine and costs, provided these are paid within a period of one month from the date of the inquiry.

NOVEMBER 1972 BOARD MEETING

1. The Discipline Committee met on Wednesday, June 21, 1972, to investigate a charge against a member of the College of alleged "infamous, disgraceful or improper conduct in a professional respect" referred to it by the Complaints Committee.
2. The member of the College against whom the charge was laid was —

Dr. David James Hardie
224 Martin Street
Milton, Ontario
3. All the members of the Committee attended the hearing.
4. The Committee was assisted in its deliberations by the Counsel for the College, Mr. Richard Shibley, Q.C. and by Mr. Barry Wortzman, a member of the firm of Shibley, Righton & McCutcheon. In addition, the defendant was represented by his solicitor, Mr. Stan. Flesher.
5. Dr. Hardie was charged with "infamous, disgraceful or improper conduct in a professional respect in that you did:
 - (a) submit a fraudulent or exorbitant claim for fees to Ontario Health Services Insurance Plan (hereinafter called 'OHSIP') for performing services at the Milton District Hospital, Milton, Ontario,

with respect to your patients

(Five instances of fraudulent exorbitant claims were listed in detail over a period ranging from November 1970 to June 1971).

6. Dr. Hardie pleaded guilty to all charges. The Committee after hearing representations from both Counsel then ordered:

- "1. That your certificate of licence be suspended for a period of twelve months;
2. That you be fined the sum of One Thousand Dollars (\$1,000.00);
3. That you be reprimanded and the fact of this reprimand be recorded on your personal record;
4. That you pay to the College the costs of and incidental to the inquiry;
5. That your period of suspension commence August 1st, 1972;
6. That six months of your suspension be remitted on the production on or before January 31st, 1973, of evidence that arrangements have been made for restitution in an amount satisfactory to O.H.I.P."

1. On the evening of Wednesday, June 21st, 1972, the Discipline Committee conducted a hearing on a charge of "infamous, disgraceful or improper conduct in a professional respect" referred to it by the Complaints Committee.

2. The member of the College against whom the charge was laid was —

Dr. Arthur Herbert Rubinoff
2610 Eglinton Avenue West
Toronto, Ontario.

3. All the members of the Committee attended the hearing.

4. The Committee was assisted in its examination of the charges by Mr. Richard Shibley, Q.C., Counsel for the College, and by Mr. Austin Cooper, Q.C., Counsel for the defendant.

5. Dr. Rubinoff was charged with "infamous, disgraceful or improper conduct in a professional respect in that you did fraudulently charge fees in connection with certain dental treatment allegedly performed by you ...

- (a) you did submit a claim to the Ontario Dental Association for payment, inter alia, for your services in performing extractions on or about the 25th day of June, 1971, with respect to one of your welfare patients ... respecting which claim you represented that you had extracted a number of teeth in excess of the number which were in fact extracted by you; and

- (b) you did submit a claim to the O.D.A. for payment, inter alia, for your services in performing extractions on or about the 18th day of July, 1971, with respect to one of your welfare patients ..., respecting which claim you represented that you had extracted a number of teeth in excess of the number which were in fact extracted by you."

6. The Committee made a finding of "Guilty as charged".

7. After careful consideration of mitigating circumstances drawn to its attention by Counsel, the Committee ordered:

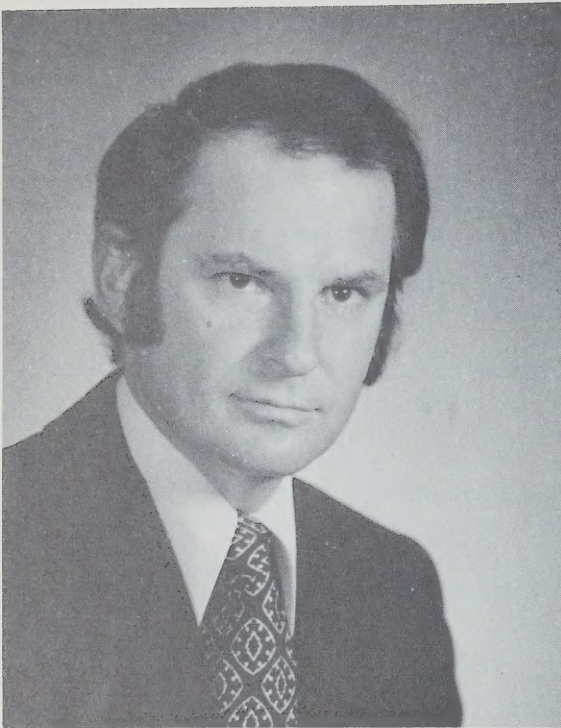

- "1. That your certificate of licence be suspended for a period of three months;

2. That you be fined the sum of One Thousand Dollars (\$1,000.00);
3. That you be reprimanded and the fact of the reprimand be recorded on your personal record;
4. That you pay to the College the costs of and incidental to the inquiry;
5. That your suspension shall commence on August 1st, 1972."

The Committee recommends that the Registrar be directed to enter into communication with the appropriate authorities of O.H.I.P. with regard to their accounting and auditing procedures in connection with dental accounts. It is hoped that assurance of unequivocal instructions as to insurable benefits, permissible claims and strict supervision will reduce the possibility of misunderstanding or the temptation to submit fraudulent claims.

EDUCATION COMMITTEE

P. ZAKAROW D.D.S.
CHAIRMAN

This past year, I believe, has been an eventful one in the field of education for the profession, in spite of major attention focused on dentistry's confrontation with the illegal dental mechanics. I am pleased to report that definite advances and progress have been made in various areas of continuing education for both the profession and its auxiliaries.

Regarding the continuing education for the presently established auxiliaries, a one-day course for Dental Hygienists was conducted at the University of Western Ontario on April 13, 1972. The topic was "The Dental Hygienists' Role in Preventive Dentistry". The course was arranged under the direction of Dr. Eastwood, with Dr. B.P. Martinello as co-ordinator, and was very well attended. The Committee is presently formulating arrangements for another course at the University of Toronto for our hygiene auxiliary.

Since dental assistants are now allowed by law to expose radiographs, the Committee was instrumental in establishing a course on Radiological Techniques at the George Brown College of Applied Arts & Technology in Toronto. The course covers a period of five weeks, with two sessions weekly. It has been oversubscribed and is

proving most successful, with sessions being already filled for the next year.

Following the initial establishment of this course in Toronto, which the Committee hopes will eventually serve Toronto and the immediate vicinity, it is proposed that a radiological course be eventually conducted in various centres of the province.

Due to our continual dependence on our auxiliary personnel, the Committee once again held a conference with the co-ordinators of Dental Assisting Programs in the Community Colleges and certain secondary schools for an exchange of ideas and information between the teachers, and dialogue with the Committee.

Some of the highlights reviewed at the conference were successful innovations or changes; problems and solutions; clinical practice; employment opportunities, for graduates and the general provincial manpower picture; the establishment of common standards for Ontario educational programs and the evaluation of the programs.

New programs were introduced and

approval given by the R.C.D.S. to Confederation College in Thunder Bay and Cambrian College, in North Bay.

The Committee, on behalf of the Board, had re-affirmed the reservations and concern regarding the proliferation of these programs and stressed to the Community College officials the need for constant communication to review the overall manpower situation of the entire province and to decide the locale of new programs.

Your Committee had the pleasure of hosting a visit by bus to the Canadian Forces Dental Services School at Base Borden. Invited guests consisted of all the co-ordinators of the Dental Assisting Courses in the Community Colleges and Secondary Schools and included our President, Vice-President, Secretary and Inspector. The tour arranged by the Base staff proved most interesting and informative for our party. The excellent school facilities and staff lectures and demonstrations indicated that the service provided, both from an educational and clinical viewpoint, were of the highest order, and it was the feeling of all who participated that the visit to the Base had been beneficial and meaningful.

Since concern has been expressed by a representative of the Ontario Dental Nurses' and Assistants Association, that some means of certification be made available for uncertified dental assistants employed in this capacity for a long period of time, it was agreed that the O.D.N. and A.A. would provide definite recommendations and proposals for the upgrading of dental assistants with a view to granting certification; and will meet in the near future with this committee to consider this matter.

It has been the considered opinion and the earnest hope of this Committee that in the field of continuing education for the profession, necessary facilities for the various programs should be available. The Board has agreed that the Committee undertake an in-depth study and submit to the Board at its April 1973 meeting concrete proposals and plans for a continuing education facility.

The unlimited two-day Memorial Lecture series of 1972, I am proud to report, was

extremely well received and considered to be a huge success by all those who attended. The series commemorated Dr. S.J. Phillips, an excellent dentist and beloved gentleman, who served both the public and his profession with extreme dedication and high distinction. Among the many accomplishments in his lifetime, one might be singled out in that he had served as President of the R.C.D.S. Board in years 1949-1951.

The course was under the direction of his son John, and the Endodontics staff of the Faculty of Dentistry, University of Toronto and was conducted at the Faculty on October 25th & 26th, 1972. The topic was the "Expanding Scope of Endodontics" and there was an enthusiastic enrolment of ninety-two dentists.

A subsequent participation course in Endodontics, limited to ten dentists, will be held during the week of May 28-June 1st, 1973, and will be under the direction of Dr. J.M. Phillips and his staff. Since there were forty applicants for the weeklong course, the ten participants were chosen by lot.

The Committee had arranged that the two-day dental seminars for the 1972-1973 sessions be conducted in the following locations; Renfrew County Dental Society, Durham-Ontario Dental Society, North Bay Dental Society and Sault Ste. Marie Dental Society.

A course in Hospital Dentistry was conducted by the Faculty of Dentistry, University of Western Ontario, in association with the R.C.D.S., and took place in the new University Hospital on Nov. 2 & 3, 1972. The course was very quickly over-subscribed and deemed to be a huge success.

The two-day lectures series consisted of fourteen lectures and was under the direction of Dr. I.D.F. Scholfield. The content included all aspects of hospital dentistry, administration and function, hospital records and their function, consultations pre-operative and post-operative routines, operating room decorum, systemic complications associated with dental problems.

The Committee expresses its appreciation to Dean Dunn and his entire staff for making the course possible.

Regarding the subject of Mandatory Continuing Education, the Committee spent considerable time in determining the mode of operation of a scheme for its implementation. However, because of the immense importance of this subject and in view of the various ramifications involved in this program, it was referred back to the Committee for further study. Some of these are that this recommendation of Government did not apply only to the dental profession and that it has been intimated that this would not be part of the legislation brought down; also that even if the R.C.D.S. attempted to enforce compulsory continuing education, problems might be encountered in making the programs available to members in the remoter parts of the province.

The question of the status of the Armed Forces Dental Auxiliaries upon entering civilian life was brought to the attention of the Committee this past year. It was requested that we grant certification to these auxiliaries on an equal status with the civilian auxiliaries on their release from the Armed Forces, thus permitting them to be employed on the same basis.

After a thorough review of the programs and the outlines of the various levels of these Armed Forces personnel, their duties, training, etc., the Committee, recommended and the Board approved that the military programs for dental hygienists (level 6-B) and for Dental Assistants (level 6-A) be approved in principle for certification, but that until such program for hygienists has been accredited, they should be asked to sit for the qualifying examination for licensure.

As reported previously, the findings concerning extramural lectures show that their continuance is favoured in their present context,

as outlined in my earlier report. Also it has been agreed by the Continuing Education Chairman of both Faculties that a curriculum vitae of the lectures will be included in the communication forwarded to the societies concerned confirming the proposed lectures.

The Chairmen asked that a minimum of one month's notice should be given by any society requesting an extramural lecture. They welcome information as to how the lectures were received, whether the topic was of interest to the members, and was the presentation considered satisfactory. The list of speakers will be reviewed with a view to up-dating it and comments would be appreciated on the topics and lectures which would interest the local societies.

The Committee welcomed the offer of assistance by the Continuing Education Chairmen of both Faculties and look forward to continuous communications and help in this particular field.

The last two years as Chairman of this committee have been indeed most interesting and highly informative because of the vast scope of topics with which the Committee had to deal.

The opportunity of having served with two very capable and co-operative members, Dr. R.P. McCutcheon and Dr. R. Mulrooney, along with our highly devoted and hard working Secretary Dr. K.F. Pownall made the Chairman's task a very easy and enjoyable one. I would also like to acknowledge the valuable assistance throughout these two years of our untiring Senior Secretary Mrs. Shand.

To all those wonderful people, I would like to convey my sincerest appreciation.

GORDON NIKIFORUK, DEAN

REPORT: JUNE 1972 MEETING

Ideas move at a meteoric rate, but implementation of the ideas and renovation of an institution often moves at a glacier pace. How to reconcile this dilemma and how to renovate an institution in administrative and educational areas, in research and in development of new programs, is the basis of this year's annual report.

EDUCATIONAL AND CURRICULAR PROGRAMS

During the current year an effort was made to implement the major recommendations of the Curriculum Review Committee. The main aspects of the report that were implemented this year are as follows:

A new course in community dentistry has

been developed extending over the four year curriculum in Dentistry;

An in-service program dealing with principles of education and pedagogical methodology was successfully instituted;

Departments have attempted as far as possible to utilize the seminar or tutorial teaching method in lieu of lectures; and, in addition, the Pass/Fail/Honours system was implemented.

The elimination of marks in the final examinations in favour of a Pass/Fail/Honours system marks a significant departure in the educational process of this Faculty. The decision to move to a Pass/Fail/Honours system was largely based on an evaluation of examination results

within this Faculty, whereby it was noted that the marks correlated poorly between different subjects. We considered this to reflect an inherent weakness in the mode of evaluation rather than inconsistency in student performance. Further, in a given class the difference in marks between the students ranked highest and lowest was often no greater than 20 to 25. Within this range an effort was made to rank 125 students. Obviously such a ranking could not be considered as an accurate index of student intelligence and learning. Also, experience by several departments offering graduate courses indicated that examination achievement, per se, did not always correlate with intellectual and emotional maturity and creativity. Finally, the staff and students of the Faculty considered that the learning/teaching situation would be improved in an environment where constant student monitoring by examination was eliminated. Our hope was that by elimination of marks from the final examinations the first step would be taken in the direction of encouraging learning for the sake of learning and not for the sake of passing examinations. While recognizing that this change is but a very small step in the direction of improving a learning situation, it has become apparent that the spin-off from the discussions relating to this new program has been very salutary.

In the clinical programs of the Faculty an effort has been made to upgrade the student involvement in the general area of physiology, pharmacology and control of pain. Dentistry has in the past led in this field as noted by the early discovery and use of anaesthesia by dentists. Since dental procedures often may result in some degree of pain and since the patient's apprehension to dental procedures is usually great, it was deemed necessary to develop clinical programs that would attempt to control these factors. In addition to developing a new course in pain control and implementing it on a clinical level, the Pharmacy Centre has been developed to complement the program. Students are now involved to a greater degree than in the past in the consideration of pharmacological agents in dental therapeutics.

STAFF

In my initial report of last year I stressed

that a recurring theme in the major studies and evaluations of the Faculty's programs and curriculum over the past ten years has been the shortage of full-time staff. The Faculty of Dentistry at this University has evolved as an institution staffed by part-time members. While this modus operandus may have had some advantages decades ago, today a larger component of full time staff is essential for the development of new educational and research programs. Thus, in a program where the total undergraduate student enrolment, including dental and dental hygiene students, numbers 600, with an additional 67 postgraduate and graduate students, and with educational programs in the hospitals, in clinics, in continuing education and with involvement in research, it is becoming increasingly apparent that such an operation cannot be effectively manned with the current 41 full-time staff component.

The recent reports of the User's Committee, the Curriculum Committee Report, and the independent study of Dr. J.B. Macdonald all underscore the need for additional full-time staff.

The Curriculum Committee of this Faculty has recommended that the current full-time staff to student ratio of 1:14, and the full-time staff to part-time staff ratio of 1:6 reflect staffing patterns that need urgent changing. The recommendation is that the Faculty seek to employ a full-time staff for undergraduate and graduate programmes of 100, for an overall staff to student ratio of 1:5.

I consider the recruitment of highly qualified full-time staff as the number one priority of this Faculty. The development of essential programs, such as graduate studies, research in prevention and educational fields, and hospital and community clinic dental programs, all await the acquisition of more staff.

The addition of new staff under the current fiscal constraints poses a major dilemma. It is obvious that new mechanisms must be developed for funding new programmes other than the current basic income unit which ties a school's fiscal support to a fixed entity (enrolment), a situation that is tantamount to being placed in a straight-jacket. This is particularly serious for a relatively young Faculty which must currently undergo a

major revision from a part-time to a full-time staffing pattern.

CHANGES IN ADMINISTRATION AND STAFF

Dr. K. Davey, who has over the past six years served as joint Chairman of the Department of Paedodontics at the Faculty and at the Hospital for Sick Children, has been granted a leave of absence in order to assume directorship of a program to train a new dental auxiliary for dental services in the Northwest Territories. This program is sponsored by the Department of National Health and Welfare and is intended to evolve a model system for the delivery of oral/dental health services for the population in the Northwest Territories. Dr. J.A. Hargreaves has been appointed as Acting Chairman of the Department of Paedodontics. Dr. Hargreaves joined the Faculty as a Professor of Paedodontics after serving as head of this specialty at the University of Edinburgh.

Dr. B. Ross has been named as the replacement for Dr. Davey in charge of the Dental Department at the Hospital for Sick Children.

Dr. J. Sandham has joined the staff of the Faculty in the Department of Preventive Dentistry. Previously Dr. Sandham was on the staff at the University of Alabama in the Dental Research institute where his major investigative efforts were in the field of fluoride metabolism, caries etiology and preventive dentistry.

Mr. A. Brown has been appointed as the first clinical pharmacist to serve the clinical areas of the Faculty of Dentistry. Mr. Brown, a former graduate of Bristol University in England, has had extensive practical background within hospital and in general pharmacy dispensing.

With rare exceptions this Faculty has seldom granted sabbatical leaves to staff. I am happy to be able to report that Dr. A.M. Hunt and Dr. A.T. Storey have been granted sabbatical leave for the 1972-73 session. Dr. A.M. Hunt will be studying the oral-dental health conditions and the delivery of dental health services in Scandinavian and other European countries. Dr. A.T. Storey will be working in the laboratories of Professor D.J. Anderson at the University of Bristol,

where he will continue his investigative work of the neural mechanisms of the portal system. We wish Drs. Hunt and Storey a very successful and rewarding leave.

GRADUATE PROGRAM

A study by a Users' Committee of this Faculty, chaired by Dr. A.M. Hunt, and an independent study by Dr. J.B. Macdonald, Chairman of the Ontario Committee of University Presidents, have both recommended that the major effort should be placed on programs to educate future dental teachers and investigators. The Users' Committee initial proposal, as spelled out in 1967, made provision to expand the graduate division from the then current 51 full-time and 7 part-time students to a total of 150 full-time and 10 part-time students in postgraduate, Master's, Ph.D. and post-doctoral programs. The expansion in student enrolment on a graduate level is to be accompanied by an adequate provision for staff and physical facilities. Because of the current University and Faculty budgetary constraints, it will be necessary to re-evaluate the graduate program and to downgrade the above projections. This is unfortunate in view of the fact that this Faculty has a responsibility to the province and to the country to ensure that an adequate number of dentists, specialists, teachers and research personnel are educated to care for the growing dental needs of our population. Since the current full-time staff seem to be spread as thinly as a molecular film, additional graduate students cannot be effectively accommodated. I am suggesting that there be a moratorium on the development of new graduate programs which are not accompanied by the addition of more full-time staff.

STUDENT AFFAIRS

Student involvement in the affairs of the Faculty continues to increase. Students are now members of most of the standing committees of the Faculty as well as the Faculty Council. Their inputs have been particularly valuable as they relate to the teaching, didactic programs and evaluation processes. The students played a paramount role in the development of the Pass/Fail/Honours system.

An important question relating to student affairs is that of admissions to the Faculty of Dentistry. During the past year over one thousand applications have been received for a total of 125 positions in the first dental year. Each year, a greater number of more highly qualified individuals are seeking admission to Dentistry. It is apparent that the selection process is a difficult one and that the current practice of deciding which students get admitted primarily on the basis of an A, B, C or D mark is proving to be an inadequate mechanism. The Faculty is engaged in an in-depth study of the admissions process — not only from a standpoint of predicting student performance at didactic and manual skills, but also from the standpoint of a prediction of the student's professional attitudes. Difficult as it is to evaluate non-intellectual attributes, a start must be made. Further, the Faculty is experimenting with a proposal to decentralize the inputs regarding admissions on a demographic basis so that communities have a voice in recommending appropriate students for entry into the professional work.

CONTINUING EDUCATION

The continuing dental education program during the academic year 1971-72 included a total of 18 individual courses covering general and specialty areas in dentistry. A total of 262 dentists enrolled for these programmes. A very highly successful course in Pharmacology and Pharmacotherapy in dentistry was developed for the Academy of General Practitioners from the Niagara Peninsula. I consider this one-week course involving inter-disciplinary teams with the proper admixture of basic science and clinical application as one of the most successful new programmes during the past year. I am hopeful that this may serve as a prototype for further development.

A philosophy of continuing education requires that graduation after a four-year term should not be viewed as a culmination of a major academic effort, but rather the beginning of a professional career of which continuing education is an integral part. We need to explore new patterns of continuing education beyond the currently fashionable two to three days intensive courses. What is required is the development of new facilities and additional staff. Further, if the most

effective learning is that which is self-discovered, then we must underscore development of programs of self-education.

THE CAPITAL DEVELOPMENT IMPROVEMENT PLAN

The Faculty of Dentistry, as a physical unit, was designed to house essentially a part-time staff. During the twelve years since the new building was constructed the pattern of staffing and education has changed dramatically. Thus, it is apparent that a change in the physical set-up of the school in the direction of accommodating more full-time staff with appropriate laboratories is of the highest priority.

In addition to providing for facilities for full-time staff, there are several new patterns of clinical training of students of Dentistry that will require changes in physical facilities. The clinical education and preparation of dental students has thus far been limited to the isolated clinical environment at 124 Edward Street. It is desirable that a portion of the student's training in clinical dentistry be in an environment which stimulates a delivery of dental health care. This may be appropriately accomplished by the development of satellite dental clinic units in teaching hospitals and in community health centres. Further, the new clinical facilities envisaged should take into account the need for dental students to receive clinic training in an environment that permits optimal utilization of auxiliaries.

DENTAL HYGIENE

Several recent studies by the Ontario Council of Health and by the Committee on Healing Arts have recommended that courses in Dental Hygiene be offered in future in the Colleges of Applied Arts and Technology. In view of these recommendations, the Faculty has reviewed its role in the training of Dental Hygienists.

The position of the Faculty, in relation to the proposed developments in the training of Dental Hygienists, is as follows:

1. Subject to the approval of the University of Toronto, the Faculty of Dentistry would phase out its current diploma den

tal hygiene program, once the CAAT colleges are in a position to offer similar programs.

2. Clearly, the provision of clinical facilities will be a major problem for CAAT colleges and for an initial period some sharing of the Faculty's clinics will be necessary (within the limitation of the Faculty's present enrolment). Transfer of responsibility for the dental hygiene programme to CAAT should not begin until acceptable cost-sharing arrangements have been made and until approval has been obtained from the University Capital Development program for the funding of clinical facilities adequate for coordinated clinical teaching.
3. Because of the many problems involved in the transfer of the Faculty's dental hygiene programme to CAAT and in the effective management of the subsequent joint training program, a committee with members from both institutions should be established to work out the necessary details and to serve as a permanent advisory council as long as there is a joint program.
4. The Faculty of Dentistry is planning a program so that the clinical training of undergraduate and postgraduate dental students, dental hygiene students and other dental auxiliaries may be integrated into a team concept of practice. The development of this program is subject to satisfactory acquisition of space and staff.
5. The Faculty of Dentistry is also planning a postgraduate B.Sc.D. degree programme for a limited number of dental hygienists in order to train these individuals for careers in teaching and in public health programs.

The Faculty wishes to underscore that the primary objectives of the Community Colleges in training Dental Hygienists should be two-fold: to increase the numbers and, hopefully, to improve their distribution throughout the province by decentralization of training sites. To achieve these

aims, it will be necessary to develop laboratory space and coordinated clinical facilities within the C.A.A.T. system in conjunction with the regional health science centres.

The above position of the Faculty was approved by the Executive Committee of the Senate. Further, the Senate Executive Committee recommended that a mechanism be developed for exploring the possibility of an integrated program between the University and the Community Colleges with particular attention to the fiscal aspects. I have appointed such a liaison committee, and the members are currently studying the ramifications of a conjoint program.

FOREIGN DENTAL GRADUATES

In the past, when attrition rates of students were high, this Faculty has been able to accommodate significant numbers of foreign graduate students who applied for admission to advanced standing to the second, third or fourth year of Dentistry. However, at present there is an unprecedented number of applicants from the Province of Ontario who have boosted the academic standards and have lowered the attrition rates. Therefore, this Faculty is able to accommodate only a very small number of the large pool of foreign graduates that are in this province and in Canada.

In 1970-71 there were sixty-two applicants for admission to advanced standing in this Faculty, of which seven were accepted for advanced standing; in 1971-72 there were seventy-nine applicants and seventeen were accepted for advanced standing. Finally, in 1972-73, of the forty applicants, only four have been accepted thus far — all into the senior year.

It is interesting that about one-third of the applicants re-apply from year to year. Thus, the Faculty is not in a position to significantly dent the problem of foreign graduates in Dentistry, nor is the mechanism of writing the National Dental Examining Board, per se, considered an effective solution. What is required is a mechanism that will permit foreign graduates in Dentistry to be effectively screened for their level of competence, a program for remedial training for selected groups and, finally, a program for

evaluation. While the Faculty and the profession at large can provide the manpower for mounting such programs, it is essential that the Government recognize its responsibility for meeting the necessary fiscal obligations if such programs are to be initiated.

RESEARCH

The vitality of both education in this Faculty and dental practice inheres in a continuous contact with currents of new knowledge and in the broadening and deepening of fundamental research directed towards diagnosis, treatment and prevention of disease and towards an understanding of oral biology.

The Burlington Orthodontic Research Centre continues to attract world-wide interest among research workers interested in the oro-facial growth and development. Dr. Frank Popovich, the director of this study, with the assistance of Dr. G. Thompson, are undertaking the monumental task of synthesizing a large amount of important new data relating to the understanding and treating of oro-facial growth problems. The processing of the epidemiological and the health survey records has been expedited by the addition of computer facilities that will interface with the large IBM 70942 at the Institute of Computer Science of the University of Toronto.

The Faculty has prepared a proposal which will be submitted to the appropriate government bodies for the initiation of a development of a Dental Research Centre for Canada. It is obvious that there will be no early solution to the dilemma of dental health, nor will governments be able to economically fund the cumulative burden of dental disease unless greater emphasis is placed on research and on prevention. The fate of this proposal remains to be seen.

RETIREMENTS

The contribution of the part-time staff to the clinical program of the Faculty is vital. Three senior part-time staff members, namely Drs. G.A.C. Adams, J.G. Chalmers and W.G. Woods, are retiring at the end of this academic year. The common denominator of each is that they have served the Faculty twenty years or over. Dr. Adams has given an unparalleled twenty-five years of service; they have played an important role in the professionalization of the student in the direction of, and improved commitment, to the public.

Miss I.A. Bumby, who joined the Faculty on October 1, 1928 in the Oral Pathology, is retiring. She holds the record for the longest number of uninterrupted years of service to the Faculty of Dentistry. Mrs. D.A. Shepherd, who joined the Faculty in the Department of Prosthodontics in 1954, is also retiring; Mrs. K. Scarlett, who has been with the Burlington Orthodontic Research Centre since its inception in 1956, is also terminating her service. Finally, Miss D. Greenfield and Mrs. S. Powell, both support staff in the Clinic area, are resigning from the Faculty. To each we express our thanks for their contribution to the Faculty.

I commend the reader of this report to the section entitled Publications and Scholarly Addresses so that he may understand the nature and scope of the academic and research undertakings of the staff of this Faculty.

I express sincere thanks to the Royal College of Dental Surgeons for an amicable and constructive dialogue during the past year. Further, the College's contribution to the Dean's Fund has provided me with a significant buffer in meeting some fiscal commitments and permitted the inclusion of the non-dental portion of the Library containing current books on the widest variety of educational matter.

UNIVERSITY OF WESTERN ONTARIO

Clinic Floor, Faculty of Dentistry, University of Western Ontario

WESLEY J. DUNN, DEAN

It is a privilege to present the eighth annual report of the Faculty of Dentistry of The University of Western Ontario to the Board of Directors of the Royal College of Dental Surgeons of Ontario.

1. Areas of Concentration

The fourth quarter elective, known as Areas of Concentration, continues to receive the attention of the Faculty. Further refinements of the regulations bearing on the Areas of Concentration quarter were approved during the year.

The following categories have been established for the program:

- (a) Non-Elective
- (b) Elective
 - (i) Clinical Program
 - (ii) Specialty Concentration
 - (iii) Research — Clinical and/or Basic Science

and that to qualify for the Elective category a student must be so designated by eight out of the eleven listed clinical divisions.

All students designated in the Elective category shall select an adviser from the full-time faculty. A student in the clinical program elective must select as his adviser a clinical department chairman or his designate who must carry out liaison with other clinical departments.

Prior to the beginning of the fourth quarter all elective students sign agreements with their advisers embodying the objectives, statement of content, and method of reporting fourth quarter activities.

The designation to the Elective category is conditional upon continued satisfactory progress in each clinical division, hence the Elective designation may be withdrawn at any time prior to the beginning of the fourth quarter.

In order to identify Elective students early, the clinical division chairmen have been asked to designate each student as Elective or as Non-elective at the end of the first, second, and third quarters and in the middle of the second and third quarters.

2. Extension to Third Year

Acting on a recommendation, from the Department of Oral Medicine, which was endorsed by the Committee on Clinical Policy, the Council gave approval to a concentrated period of Oral Diagnosis during the first two weeks of the first quarter of Third Year. In order to accomplish the desired result without an excessive interference in the teaching program, it was deemed necessary to recommend the addition of one week at the beginning of the academic year and to reduce the time normally allotted to the clinical orientation course. Accordingly, commencing with the academic year 1972-1973, there will be 39 weeks of instruction for the third year instead of the present 38 weeks. Within the 18 half days available in the two-week period, five of these will be devoted to clinical orientation and thirteen of the half days to the exclusive purpose of the oral diagnosis of assigned patients.

3. First Year Class Size

Council gave approval to a modest increase in the number of students to be accepted into first year. The rated class size is 52. In September 1972, 54 students will be enrolled, this number to increase to 55 in 1973 and 56 in 1974.

The purpose of the slightly increased enrolment in first year is to attempt to maintain the two clinical years at as close to full enrolment as possible. There is an expectation that students who are enrolled in first year will graduate. But, realistically, some students withdraw from the program, some experience health difficulties, and a few suffer some form of academic malaise.

It should be emphasized that the increased class size has not been authorized for the purpose of creating a surplus of dental students from whom the less academically/clinically endowed would be designated as expendable. To completely irradicate any such illusory interpretation, it should be stated that the present Faculty standards and the principles embodied therein and related to student progression, opportunities for supplemental examinations, and repetition of the year's work shall remain inviolate.

4. Admissions — 1971-1972

The number of applications for admission to the first year, 1971-1972, maintained the pattern of increasing numbers. The following is a statistical report on the applications:

Number of applications — 465 (17 ineligible)
(16 withdrew)

Number Admitted — 52 (5 women, 47 men)

Qualification of Admitted Applicants:

- (a) at least a "B" average in the year immediately preceding admission — 51
- (b) at least two years of "B" standing in "pre-dental" including Grade XIII — 46.

Average for year preceding admission:

- (a) Mean — 76.6%
- (b) Range — 71.6% — 83.6%

Number with degrees — 35 (24 B.Sc., 11 B.A.).
(4 have the M.Sc.)

Married — 13

Age:

- (a) Mean — 23
- (b) Range — 19-31

Home Towns Represented:

34-28 Ontario (7 from London)
2 Quebec
2 U.S.A.

Universities previously attended: 13 (29 from UWO)

Acting on a recommendation from the Admissions Committee, Council approved a notation being placed in the applicable section of the *Calendar* of the Faculty of Dentistry, commencing with the 1972 edition, to indicate that priority consideration is normally first given to Canadian citizens and landed immigrants whose home residence is in the Province of Ontario and then to Canadian citizens and landed immigrants normally residing outside the Province of Ontario.

5. Academic Performance of Students — 1972

The following are the reports, from each of the four years, on student performance in the program:

(a) FOURTH YEAR

Number of students	— 31
Number with Honours	— 2
Number passed	— 29 (including 1 posthumously)

Awards:

1. The University of Western Ontario Gold Medal — Gary C. Cooper
2. London and District Dental Society Award — T.A. Summers
3. Dental Sciences Research Award — Gary C. Cooper
4. American Association of Endodontists Award — J. Cipolla
5. The American Academy of Oral Medicine Award — D.S. Sweet
6. The American Association of Orthodontists Award in Oral-Facial Growth — E.T. Chomicki
7. Canadian Society of Dentistry for Children Award — Gary C. Cooper
8. Clinical Paedodontic Award — T.A. Summers
9. The American Academy of Periodontology Award — D.J. Charters
10. Canadian Academy of Periodontology Award — D.J. Charters
11. The American Academy of Dental Radiology Award — L. Boksmann
12. The Senior Award in Oral Surgery — Gary C. Cooper
13. The Canadian Society of Oral Surgeons Award — D.S. Sweet
14. The Removable Prosthodontics Award — D.F. Saunders
15. The Fixed Prosthodontics Award — D.F. Saunders

16. Pro Liberis Prize — T.A. Summers

17. The Senior Award in Oral Biology — J.S.P. Wallace

(b) THIRD YEAR

Number of students	— 35
Number with Honours	— 2
Number without conditions	— 30
Number with conditions	— 3
Number failed	— 0

Honours:

Robertson, F.A. and Mochizuki, K.G.

Awards:

1. International College of Dentists Award — D.K. Russell
2. Centennial Paediatric Dentistry Award — K.G. Mochizuki
3. Oral Surgery Award — F.A. Robertson
4. Restorative Dentistry Award — R.M. Hateley
5. Social Dentistry (Book Award) — F.A. Robertson

(c) SECOND YEAR

Number of students	— 54
Number without conditions	— 35
Number with conditions	— 10
Number failed	— 2

Awards:

1. RCDS Scholarship — P.M. Neilson
2. Hamilton Academy of Dentistry Award in Oral Medicine — B.D. Hamilton
3. RCDS Award in Oral Biology — B.J. Williams
4. Mosby Book Awards:
 - Oral Pathology — P.M. Neilson
 - Restorative Dentistry — F.W. Haldenby

(d) FIRST YEAR

Number of students	— 52
Number without conditions	— 37
Number with conditions	— 9
Number failed	— 2

Awards:

1. RCDS Scholarship — R.J. Schur

2. Mosby Book Awards:

- | | |
|--------------|--------------------|
| - Anatomy | - G.E. Desaulniers |
| - Physiology | - R.J. Schur |
| - Occlusion | - H.C. Rydell |

6. Appraisal of Department of Oral Medicine

As a consequence of Dr. Moore's voluntary retirement from the chairmanship of the Department of Oral Medicine, it was felt by the Faculty to be a useful precedent to establish to reappraise the department prior to the appointment of a new chairman. Accordingly, an ad hoc committee was established which presented five main recommendations bearing on the department, such recommendations being concurred in by the Executive Committee and later by the Council. The recommendations are as follows:

1. That the Department of Oral Medicine consist of the Divisions of Oral Diagnosis, Dental Radiology, and Periodontics.
2. That there be cross-appointments between members of the Division of Oral Pathology and members of the Department of Oral Medicine as appropriate, with fiscal responsibility for Oral Pathology remaining with the Department of Pathology and that this recommendation be further discussed by the Department of Oral Medicine and the Department of Pathology on the arrival of the new chairman of the Department of Oral Medicine (in the summer of 1972).
3. That the Emergency Clinic be transferred to the Department of Oral Medicine and placed under the Division of Oral Diagnosis and that this service be available to the public five days per week on a twelve month basis.
4. That the expressed need and willingness for close teaching co-operation between Oral Diagnosis, Oral Pathology, Social Dentistry, and others be implemented, where possible.

5. That the Division of Oral Diagnosis arrange with the other clinical divisions a mutually-acceptable format for routine oral diagnosis and treatment-planning of patients.

7. Oral Biology

The ad hoc Committee established to appraise the Department of Oral Medicine was also asked to give some attention to an administrative structure review for the total Faculty. The recommendation made by the committee, apart from its recommendations bearing on the Department of Oral Medicine, was as follows:

"That a Department of Oral Biology be immediately established with a full-time Chairman whose responsibility will be (a) the co-ordination of all basic science teaching with that of the clinical sciences (i.e. applied basic science), and (b) the management of all interdisciplinary teaching throughout the four years of the undergraduate program with the exception of the teaching program in Occlusion."

This recommendation, after being received by the Executive Committee, was distributed to all departments, to the Committee on Undergraduate Dental Curriculum, and to The University of Western Ontario Dental Students' Society so that the academic merit of the proposal could be scrutinized. At the same time, an ad hoc committee was established for the purpose of looking into the administrative feasibility of the proposal to establish a Department of Oral Biology.

As a result of the comments and recommendations received it was apparent that the consensus was against the proposal. It was agreed, however, that a co-ordinator of oral biology should be appointed. Such a co-ordinator would be an ex officio member of the Committee on Undergraduate Dental Curriculum and would have the right to make whatever recommendations bearing on the curriculum of studies as are appropriate to the policy-recommending role of the CUDC.

It is proposed that the co-ordinator shall administer the approved policies and programs of Oral

Biology and interdepartmental teaching as outlined in the present *Calendar*. The co-ordinator, too, through CUDC, would be responsible for clarifying the intended interdepartmental nature and organization of the remaining programs in the present *Calendar* which are identified as interdepartmental teaching. It is anticipated that he would attend a majority of interdepartmental teaching sessions and, whenever possible, participate and that he would become involved in clinical teaching sessions as much as possible.

It would be expected that the co-ordinator, on receipt of all dental course outlines, would identify areas related to Oral Biology and would prepare a review of the on-going programs in basic and clinical dentistry as they relate to Oral Biology. He would thus identify the most suitable order of presentation of content and the areas most suited to an interdisciplinary approach.

It would be expected, too, that the co-ordinator would actively encourage the development of research in the field of Oral Biology within all participating departments and would investigate the possibility of an eventual MRC Group Award.

Budgetary restraints are such that the implementation of this recommendation is not possible in the 1972-1973 academic year but efforts will be made to work toward the proposal in the ensuing year.

8. Conjoint Teaching

Since the establishment of the first year program in the Faculty of Dentistry in 1966, a significant proportion of both the first and second year basic science programs have been taken on a conjoint basis with students in the Faculty of Medicine. However, in the fall of 1973, the Faculty of Medicine will be moving toward a new curriculum which will employ the "systems" approach to medical education. Thus it was necessary for the Faculty of Dentistry to consider the problems affecting conjoint teaching which may arise from the new medical curriculum.

Representatives of the Faculty of Medicine's Curriculum Implementation Committee met with representatives of the Committee on Undergraduate Dental Curriculum of the Faculty of

Dentistry. The group agreed — and this was subsequently ratified by the Executive Committee of the Council of the Faculty of Dentistry — that rigid adherence to the concept of conjoint teaching, albeit desirable in some cases, could become a major deterrent to the development of curricula in either Faculty. The members reached a consensus that the teaching programs of each Faculty should be allowed to develop independently and that conjoint teaching be considered only when common educational objectives and feasibility of timetabling make it desirable.

9. Advisory Committee

The fourth annual meeting of the Advisory Committee to the Faculty of Dentistry was held on 3 November 1971 with sixteen members present. Dr. Harvey W. Reid was again elected to serve as Chairman.

The committee employed last year's Annual Report as its resource document. The following were the specific recommendations made and the Faculty's response to them:

- (a) *That in addition to the three types of activity recognized as appropriate within the Areas of Concentration Quarter, consideration be given to the inclusion of a fourth — clinical science research.*

The Faculty responded positively to this recommendation. Accordingly, clinical science research now joins basic science research as one of four types of activity appropriate to the Areas of Concentration Quarter.

- (b) *That the Advisory Committee to the Faculty of Dentistry respectfully recommends that the appropriate committee give consideration to an investigation of the desirability and feasibility of establishing, at Western, a three-year undergraduate program in dentistry.*

This recommendation was referred to the Committee on Undergraduate Dental Curriculum.

After giving the matter careful consideration, the Committee replied, as follows:

"The matter of a three-year curriculum presents certain problems. The Faculty of Dentistry is an integral part of a Health Sciences Centre and many courses, therefore, are conjoint with Medicine. It would be difficult, therefore, to make unilateral changes in curriculum design.

Also, a three-year curriculum presupposes certain "pre-dental" requirements which are inclusive of disciplines now mounted within Departments found within the Faculties of Medicine and Dentistry. These departments are financially undergirded through the formula-financing mechanism which assigns certain basic income units to dental and medical students such BIUs being different from those applicable to students registered in a Faculty of Science.

At least in the reasonably foreseeable future, this Faculty does not believe that it would be feasible to implement a three-year curriculum."

The Faculty is grateful to the members of the Advisory Committee for their interest and effective involvement in our educational programs.

10. "In Course" Baccalaureate

The Council of the Faculty gave approval, in principle, to the development of regulations which would enable students who have successfully completed, at The University of Western Ontario, the "pre-professional" requirements for admission to the Faculty of Dentistry — such requirements constituting a partial credit toward the acquisition of a Bachelor's degree — to obtain the necessary further credits for a Bachelor's degree by successfully completing the appropriate courses in the dental school. Negotiations are underway with the Faculty of Science and with the Senate Committee on Admissions and Academic Programs Policy in the hope of being able to implement the proposal.

11. Terms of Reference of Standing Committees

In December 1971, the Council, after carefully reviewing the policy-recommending structure of the Faculty, approved terms of reference for the twelve standing committees of the Council. It is confidently anticipated that these committees will be able to function more effectively now that overlapping jurisdictions have been eliminated and that membership complements and duties have been more clearly delineated. The Standing Committees of Council are:

- Admissions
- Advanced Training in Dentistry
- Clinical Departments' Space Utilization
- Clinical Policy
- Continuing Education
- Hospital Services
- Nominating
- Scholarships and Awards
- Staff-Student Liaison
- Undergraduate Dental Curriculum
- Undergraduate Research Students' Selection
- Visiting Professors.

12. Committee on Health Sciences' Education

The Faculty agreed that there is an on-going need to consider theoretical aspects of health science education in an interdisciplinary way and that any improvement in mutual understanding among health science faculties will make it easier to educate students to practise effectively together in the community. Accordingly, it was agreed to co-operate with the other Faculties in the Health Sciences Centre in the establishment of a Health Sciences' Education Committee with the following terms of reference:

1. To present courses and/or workshops aimed at teacher training.
2. To disseminate information regarding courses presented elsewhere in Health Sciences' Education.
3. To identify innovations in Health Sciences' Education, to consider Health Sciences' Education Research and to make appropriate recommendations to the separate Health Science Faculties.

Dr. G.Z. Wright is the representative of the Faculty of Dentistry on the Committee.

13. Teaching Conference — September 1971

A most successful Teaching Conference was held on September 1st and 2nd, 1971 at the University of Waterloo. The Conference was organized by an ad hoc committee whose chairman was Dr. G.Z. Wright with the other members being Drs. B.P. Squires and B.J. Zulqar-nain.

The Conference leader was Dr. Milton I. Houpt, Chairman of the Department of Pedodontics of the College of Medicine and Dentistry of New Jersey. Dr. Houpt's three main addresses were "Teaching for Mastery", "Evaluation of Student Performance", and "Evaluation Techniques". The Conference employed the workshop method and addressed itself to the subject material introduced by the speaker.

Thirty-one members of the academic staff of the Faculty of Dentistry participated. The Faculty was privileged to have as its guest, as the representative of its sister institution in Toronto, Dr. A. Bruce Hord, Assistant Dean for Student Affairs.

The Conference was made possible by a generous grant from the Canadian Fund for Dental Education.

The first Conference being so successful, a second one is being planned for late June of 1972.

14. Course in Dentistry Applicable to Nurses Working in the North

St. Joseph's Hospital, London, undertook to sponsor a comprehensive preparatory program for some registered nurses working in the far north to permit them to acquire knowledge and skills in areas not normally indigenous to the practice of nursing. The Faculty of Dentistry is co-operating in the program and hopes to enable the nurses in course to acquire knowledge and develop skills necessary to supervise the dental health of the populace in isolated northern communities. The Faculty of Dentistry's involvement is being co-ordinated by Dr. A.G. Parnell, Professor and Chairman of the Department of Oral Surgery, and

Chief of Dentistry at St. Joseph's Hospital.

15. Graduate Program in Orthodontics

The proposal for the graduate program in orthodontics has been approved, on academic grounds, by the Faculty of Graduate Studies and has been approved, as well, by the London Health Sciences Co-ordinating Committee. It is hoped that appropriate funding to launch the program may soon be forthcoming.

16. Second Year RCDS Award in Oral Biology

The Council clarified the terms of the Second Year RCDS Award in Oral Biology. It was agreed that it be awarded to the most successful candidate in the combined first year course of Neuroanatomy and the second year course of Neurophysiology until future curriculum arrangements will allow a more ideal integration.

17. Senior Award in Oral Biology Established

Through the kindness of Dr. K. Hoshino, formerly Professor of Anatomy at The University of Western Ontario, and now Professor in the Department of Anatomy of the Faculty of Dentistry and the Faculty of Medicine of the University of Manitoba, the Senior Award in Oral Biology was established.

The award has the value of \$100.00 plus a certificate and is presented annually on the recommendation of the Interdepartmental Teaching Sub-Committee of the Committee on Undergraduate Dental Curriculum to a fourth year student who achieves a high degree of excellence in the subject of Oral Biology.

18. Hospital Privileges — Minister's Committee of Enquiry

The Faculty presented a Brief to the Minister's Committee of Enquiry into Hospital Privileges in Ontario. Dr. W.H. Feasby, Acting Chief of Dentistry of Victoria Hospital, Dr. A.G. Parnell, Chief of Dentistry of St. Joseph's Hospital, and the Dean appeared before the Committee of Enquiry on Tuesday, 28 September 1971. The first portion of the presentation consisted of rea-

sons why the terms of reference of the committee were sufficiently encompassing to justify the reception of a "dental" Brief. Following this presentation, the Committee of Enquiry withdrew for approximately ten minutes to consider the arguments advanced. When the committee returned the deputation was informed that this Faculty's Brief would be received but that the committee was reserving its judgement in respect of including dentists and dental services in its report to the Minister.

The deputation was given the opportunity of highlighting the Brief and it then submitted itself to reasonably probing questions.

The Brief was reasonably extensive and covered the following major areas:

The Role of Dentistry in Hospitals
The Appointment of Dental Staff
The Privileges of Dental Staff.

The following recommendations were advanced for the consideration of the Minister's Committee of Enquiry:

1. That provision be made within all public general hospitals of Ontario for meaningful dental services.
2. That the policy of "delineation of privileges" of the Department of Dentistry of St. Joseph's Hospital, London, Ontario, be recommended for use as a set of "model privileges" for the integration of dentistry within the public general hospitals of Ontario.
3. That general practitioner dentists appointed to the active staffs of public general hospitals have their privileges defined as "those services normally rendered in the general practice of dentistry including those privileges listed in Category "C" of the Delineation of Privileges document."
4. That (a) certified orthodontists, or (b) paedodontists, or (c) periodon-

tists appointed to the active staffs of public general hospitals have their privileges defined as those (a) orthodontic, or (b) paedodontic, or (c) periodontic services normally rendered in the practice of the said specialty in Ontario.

5. That certified oral surgeons be appointed to the active staffs of public general hospitals and be accorded privileges commensurate with their training, experience and competence, and

That the categories "B" and "C" of the Delineation of Privileges document be the basis for the delineation of privileges generally granted to certified oral surgeons upon application for appointment to the active staff, and

That for senior certified oral surgeons they be granted such category "A" privileges as they can show they have the training, experience and competency to perform, and

That by following the usual channels of the Credentials and Privileges Committees certified oral surgeons who have been appointed with less than full privileges to the active staffs of public general hospitals upon demonstrated competence and on the recommendation of the Chief of Dentistry, supported by the Chief of Surgery, be granted such privileges in Category "A" as are appropriate.

Unfortunately, in the published report of the Committee of Enquiry, the committee did not choose to interpret that dentists and dental services resided within their terms of reference.

19. Task Force on Dental Technicians

The Faculty of Dentistry prepared a Brief and

presented it to the Task Force on Dental Technicians, such Task Force having been appointed by the Committee on Human Resources of the Ontario Council of Health. The Brief was written by Dr. J.E. Ryan, Associate Professor and Chairman of the Division of Removable Prosthodontics, and by the Dean and they, together, presented the Brief to the Task Force during one of its closed meeting sessions in Toronto.

The faculty subsequently received a letter from the Executive Secretary of the Ontario Council of Health in which appreciation was expressed for the interest taken and for the assistance provided.

20. Grouping of Specialties

During the year, the Faculty received a letter from the Committee on Specialists and Specialization of the CDA Council on Education requesting the views of the Faculty relating to the grouping of specialists. The topic was assigned to the Committee on Advanced Training in Dentistry, which committee reported early in 1972. The Faculty, in its response to the Canadian Dental Association, recognized that a grouping of specialties on common academic bases would be a very desirable procedure to follow for the establishment of graduate specialty programs in dentistry within The University of Western Ontario. This response, in company with the report prepared by the Committee on Advanced Training in Dentistry, was forwarded to the CDA Council on Education.

21. Seventh Biennial Canadian Conference on Dental Research and Education

The Faculty participated in the Seventh Biennial Canadian Conference on Dental Research and Education which, under the sponsorship of the Association of Canadian Faculties of Dentistry and the Canadian Dental Association was held at Geneva Park, Ontario on 12-13-14 June 1972. The Conference received its financial undergirding from the Canadian Fund for Dental Education and the Medical Research Council of Canada.

Dr. A.J. Gwinnett of the Departments of Anatomy and Restorative Dentistry was the Conference Chairman for the Research component of the program. Others from the Faculty

who participated were Dr. W.S. Hunter, Dr. P.G. Dellow, Dr. George Goto, and Dr. B.P. Martinello.

22. Research Protocol Review

The Faculty of Dentistry has established an internal review mechanism to be available to faculty members who wish, when making applications for research grants, to avail themselves of it.

The panel, which is representative of most departments, is primarily intended for the clinical departments in the Faculty. Participation is voluntary but every encouragement is given to assure that the review mechanism is employed prior to the submission of research grant applications.

Through the employment of internal review it is hoped that the best possible applications will accrue in order that the likelihood of receiving appropriate funding will be enhanced.

23. MRC Visiting Professor

The Faculty was privileged to have as its MRC Visiting Professor, Dr. Antony H. Melcher, Professor of Oral Biology, of the Faculty of Dentistry of the University of Toronto. His visitation extended from the 28th of February to the 3rd of March with the active participation of all interested departments.

The Annual Public Lecture was delivered by Dr. Melcher on Wednesday, 1 March, the subject being "Does Dentistry Have a Responsibility to Science?"

The Faculty expressed its gratitude to the Medical Research Council for making it possible for the Faculty to benefit so significantly from the contributions of such a distinguished visitor.

24. Toronto Chapter, IADR Meets at Western

For the first time, the Toronto Chapter of the International Association for Dental Research met in an all-day session at Western on 17 February 1972. Approximately twenty-seven members from Toronto and twenty-five from Western attended as well as third and fourth year Western students. The arrangements for the Research

Symposium were made by Dr. P.G. Dellow, Associate Professor of Physiology.

During the business portion of the meeting a proposal was advanced to change the name of the Chapter from Toronto to Ontario in order, more closely, to designate the geographical affiliation of its members. In April 1972, this Faculty was pleased to learn that the IADR (Toronto Section) had been redesignated IADR (Ontario Section) of the North American Division of the IADR. The Faculty was pleased to observe, as well, that Dr. P.G. Dellow had been elected as Secretary of the Section and Dr. R.E. Jordan, Professor and Chairman of the Department of Restorative Dentistry, had been elected Councillor.

25. Medical Research Council — University Consultation Committee

Dr. A.J. Gwinnett, Associate Professor of Anatomy and Associate Professor of Restorative Dentistry, was elected by Council to succeed Dr. K. Hoshino as the representative of the Faculty of Dentistry of The University of Western Ontario to the MRC — University Consultation Committee.

26. MRC Summer Student Scholarships

There were twelve applications from first and second year for MRC Summer Student Scholarships. From these the following seven were selected:

From Second Year:

Donald Cronin, Pharmacology

David J. McAulay, Paediatric Dentistry

Michael McKeough, Restorative Dentistry
(Dental Materials Science)

Peter Neilson, Physiology

From First Year:

G. Edward Desaulniers, Biochemistry

Sumner Ling, Oral Medicine

Catherine Vearncombe, Anatomy.

27. ADA Dental Students' Research Conference

The Faculty was represented at the 12-14 April 1972 ADA Eighth Annual Dental Students' Research Conference in Boston, Massachusetts by

Mr. David J. McAulay of Second Year. Mr. McAulay has been an outstanding student who has exhibited particular competences in basic science disciplines.

28. Canadian Dental Association Re-Survey

The first CDA Council on Education Accreditation Survey was conducted at a time when the clinical program of the Faculty was in its very early stages of development. Although the undergraduate dental program was approved, without qualification, it was deemed appropriate that a re-survey be sought for the year 1972. Accordingly, The Faculty invited the Council on Education to re-survey the undergraduate dental program in the fall of 1972 and preparations are now being made to develop resource material required by the Survey Team.

29. Dents' Wives Junior Patient Fund

Through the generosity of the Dental Wives Club, the membership of which comprises the wives of dental students, a "Dents' Wives Junior Patient Fund" was established as a means of providing financial assistance to patients eighteen years of age and under. The administration of the resources in the fund is the responsibility of the Director of Clinics. The fund will assist in permitting recommended treatment plans for selected patients to be carried to their conclusion where, without such assistance, certain phases would have to be curtailed. Possible examples are orthodontic treatment, extensive endodontic and restorative cases resulting from traumatic injuries, and extensive operative cases where even at the modest fees of the school's clinic the family is unable to assume full financial responsibility.

The fund was launched by a donation from Dents' Wives in the amount of \$180.00.

The Faculty expresses its gratitude to the Club for its selfless and generous act.

30. New Chairman — Department of Oral Medicine

On 5 October 1971, Dr. D.S. Moore submitted his resignation from the chairmanship of the Department of Oral Medicine effective 1 May 1972. A

Selection Committee was established, consistent with procedures adopted by Senate, and from its deliberations Dr. Ralph I. Brooke, Senior Lecturer and Head, Department of Oral Medicine and Oral Pathology, Leeds University Dental School and Hospital, was appointed Chairman effective 1 August 1972. Dr. B.J. Zulgar-nain, Chairman of the Division of Periodontics, was appointed Acting Chairman from 1 May through 30 July.

31. Dr. W.H. Feasby — President, Royal College of Dentists of Canada

The Faculty learned with considerable pleasure of the election of Dr. W.H. Feasby, Professor and Chairman of the Department of Paediatric Dentistry, to the Presidency of the Royal College of Dentists of Canada for the 1971-1972 College year.

32. Dr. D.G. Gardner Appointed to Ontario Task Force

The Faculty was pleased with the appointment of Dr. D.G. Gardner, Associate Professor and Chairman of the Division of Oral Pathology, to the chairmanship of the Ontario Department of Health's Task Force organized to look into the dental needs of the mentally retarded both in the community and in the facilities for the retarded operated by the Mental Retardation Services Branch of the Department.

33. Dr. H.C. Parrott Elected to Ontario Legislature

The Faculty had the pleasure of extending congratulations to Dr. Harry C. Parrott, a clinical lecturer on leave of absence from the Department of Paediatric Dentistry, on his election to the Ontario Legislature as the representative of Oxford riding.

34. Dr. L.C. Munoz Visits Western

Dr. L.C. Munoz, University of Antioquia, Colombia, was a visitor within the Faculty for most of the months of March and April 1972. His purpose in visiting was to examine the health sciences at Western and to talk to the members of the academic staff about the possibility of a Faculty and Student Exchange between his university and UWO. Dr. Munoz has held the

appointment of Assistant Professor of Preventive and Social Dentistry at the University of Antioquia since February 1968 and his visit to Canada was under the aegis of the Director of the Office of International Education and was sponsored, in part, by the Canadian International Development Agency.

A strong possibility exists that a representative of Western may visit the University of Antioquia in the near future.

35. In Memoriam

The Faculty records with deep regret the deaths of the following:

23 July 1971

Dr. J.A.F. Stevenson,
Professor of Physiology and Dean of the Faculty of Graduate Studies.

13 January 1972

Dr. J.C. Paterson,
Professor of Pathology.

11 February 1972

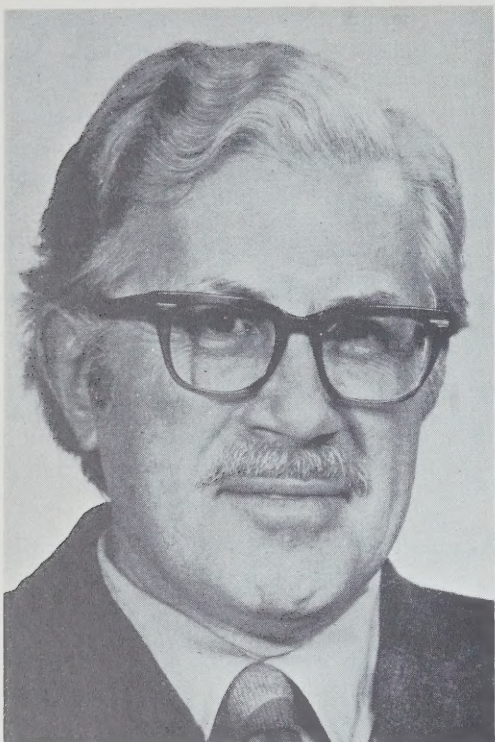

Dr. G. Edward Hall,
President and Vice-Chancellor of The University of Western Ontario at the time of the establishment of the Faculty of Dentistry.

17 April 1972

Dr. Un-bok Choung,
A senior dental student who had been admitted to the second year of the program in September 1970 on the basis of his graduation in dentistry from Seoul National University in Korea.

36. Appreciation

The Faculty of Dentistry of The University of Western Ontario expresses its deep and sincere appreciation to the Board of Directors of the Royal College of Dental Surgeons of Ontario for its continuing, participating interest in and concern for our profession's educational institutions in this province. The various grants generously made by the Board are received with gratitude and are employed to recognize and support deserving students and to enhance the academic offerings of the Faculty through support of activities complementary to the program.

FINANCE AND PROPERTY COMMITTEE

D.A. CHEETHAM, D.D.S.
CHAIRMAN

1. I wish to thank the members of the Committee, Dr. George Burgman and Dr. Peter Zakarow, and our Registrar-Secretary, Dr. K.F. Pownall for their valued assistance.

I want to mention particularly the interest and concern of our President, Dr. Nyle Diefenbacher in the activities of each committee of the R.C.D.S. His leadership during this very difficult year has been outstanding.

2. The deed to the property at 230 St. George Street, Toronto, has been transferred to the Ontario Dental Association. However, the management of the building remains in the hands of the College and I am pleased to report that the property is in excellent condition and is fully utilized.
3. A brief explanation of the Budget for 1973 (which follows this report) —

(a) *Receipts*

1. Fees are based on the number of Dentists and Hygienists we anticipate will be licensed in 1973.
2. Interest varies and is based on the current rate.
3. Property Revenue — The rents payable by the organizations are based on the space occupied — utilization, etc.
4. Sundry — this consists of sale of lists of members.

(b) *Expenditures*

1. Salaries — The salaries of the staff were reviewed by the Committee and the President and where appropriate adjustments were recommended by this Committee to the R.C.D.S. Board.
2. Legal and Audit Fees — Legal fees

are based on a "Fee for Service" arrangement. An increase in fees is expected because of additional legislative activity and enforcement of the Act.

3. Insurance — When mandatory malpractice insurance is instituted on

January 1, 1973, a reserve fund will be required to carry out the "self-insured" portion of this arrangement.

4. Grants — Grants to the O.D.A. are on a per capita basis and accordingly there is an increase.

BUDGET 1973

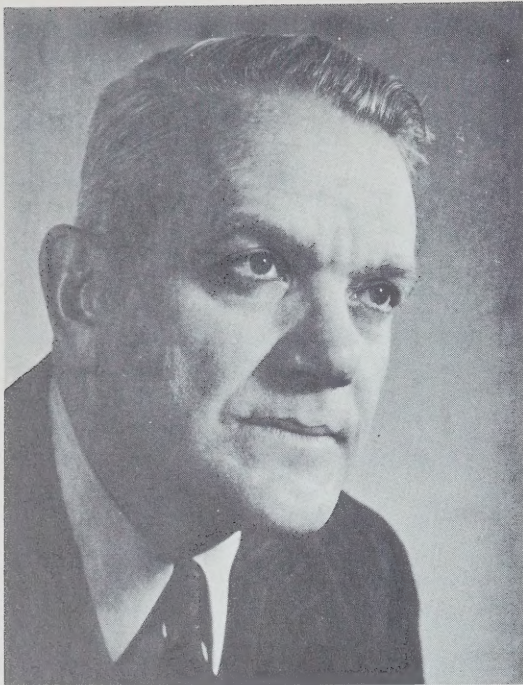

RECEIPTS	ACTUAL 71	BUDGET 72	ESTIMATE 72	BUDGET 73
FEES: Licence, Registration & Examination fees — Dentists	427,645	745,700	748,000	778,000

REGISTRATION AND LICENSURE COMMITTEE

J.R. CALLINGHAM, D.D.S.
CHAIRMAN

APRIL 1972 BOARD MEETING

1. Oral Surgery Programs at Hospitals in the University of Toronto Area

The discussion of this program, particularly the status of Doctor's Hospital, was again brought before the Board. This apparently has been finalized because of the following recommendation of the Council of the Faculty of Dentistry, University of Toronto:

- (a) That four students be admitted annually to the Faculty of Dentistry's program in Oral Surgery and Anaesthesia;
- (b) A number of internships and residencies appropriate for this admitting of four students must be assured by O.H.S.C. before the program is extended to the Doctors' Hospital;
- (c) That entry to, and regulations for, the program in Oral Surgery and Anaesthesia be governed by the Faculty of Dentistry through the Postgraduate Dental Education Committee;
- (d) That all students admitted to the program in Oral Surgery and Anaesthesia follow the prescribed course as required by the Faculty of Dentistry;
- (e) That the academic and clinical program in Oral Surgery and Anaesthesia, including the assignment of interns and residents, be under the direction of the Postgraduate Dental Education Committee through the chairman of the Department of Oral Surgery;
- (f) That the students follow rotating programs set up by the Department of Oral Surgery and the Postgraduate Dental Education Committee, through the training areas of the Faculty of Dentistry, the Toronto General Hospital, the Doctors' Hospital and other hospitals which may be approved for training purposes in the future.
- (g) That the hospital staff engaged in the teaching of the Oral Surgery program be approved by the Faculty of Dentistry.

- (h) That the Dean, or his representative, be on the Selection Committee for those hospital staff who will be engaged in the teaching of the program in the hospital and that new appointments to the Oral Surgery hospital teaching staff be approved by the Faculty of Dentistry, and be granted appointments in the Faculty.
- (i) That the use of hospital dental service facilities be arranged through the head of the appropriate hospital dental department.
- (j) That the heads of the hospital dental departments be involved in the preliminary selection of Oral Surgery and Anaesthesia course candidates.

As of July 1st, this program came under the aegis of the University of Toronto.

2. Applications for Certification — Approved by Board:

Orthodontics — Dr. A Ronald Banack
 Dr. Ronnie Wei-Ming Chan
 Dr. Edmund A. O'Neill
 Dr. Roy E. Schweizer
 Dr. Ronald V. Teitler

Dental Public Health — Dr. Birty Williams

JUNE 1972 BOARD MEETING

1. Specialty Recognition:

- (a) Endodontics:
 Following a submission by Dr. J.M. Phillips on the subject, the Board approved that Endodontics be recognized as a certifiable specialty in Ontario.
- (b) Oral Pathology:
 The Board approved that Oral Pathology be recognized as a certifiable specialty in Ontario.

fiability specialty in Ontario.

2. Applications for Certification — Approved by Board:

Oral Surgery — Dr. Sidney J. Levitz
 Dr. Edgar W. Scrivener
 Dr. Timothy W. Johnson
 Dr. Norman W. Aurlick

Orthodontics— Dr. Aaron G. Weisblatt

Paedodontics— Dr. Bryan D. Tompson

NOVEMBER 1972 BOARD MEETING

1. Specialty Certification - Endodontics and Oral Pathology:

Regulations for certification as a specialist in Endodontics and as a specialist in Oral Pathology were established by the R.C.D.S. Board.

2. Applications for Certification — Approved by Board:

Orthodontics— Dr. Subhash C. Marwaha
 Dr. Walter Swiston

Periodontics — Dr. Percy Segal
 Dr. Frank M. Eggert

Paedodontics— Dr. Kenneth Hune

We wish to thank our specialty consultants for their services which have been invaluable to the Board.

As Chairman, I would like to thank my Committee members, Dr. D.I. LeCocq and Dr. P. Zakarow for their assistance throughout the year; also my special thanks to our President, Dr. Nyle Diefenbacher and our Registrar, Dr. K.F. Pownall and his staff. It has been a pleasure working with them.

NATIONAL DENTAL EXAMINING BOARD

J.D. PURVES, D.D.S.
R.C.D.S. REPRESENTATIVE

REPORT OF THE NDEB

1. The 1972 Annual Meeting of the NDEB was held May 26, 27, at the Chateau Laurier Hotel, Ottawa.
2. A brief resume of salient issues is as follows:
 - (a) Dr. Roger Coulombe, Montreal, was appointed Examiner-in-Chief of the Foreign Dentist Examinations, to be held at the University of McGill in May 1973.
 - (b) The report of the 1972 Foreign Dentist Examinations was accepted. 18 failures in the written examination of the 44 candidates who wrote, were recorded. The minimum recorded computer marking was 340. As compared to the North American candidates for the same examination, the minimum accepted mark was 336.

This represents a failure rate of 18 in the Foreign dentists, plus one failure in one candidate who tried one exam. Eight candidates in the Foreign dentist examination, failed to attain a passing standard in the preclinical examination, thus leaving 18 candidates out of 44, to proceed to the clinical exams. These were joined by a candidate who failed the clinical exams last year (1971). Twenty-seven thus took the clinical exams, with 9 successful. Four candidates failed their clinical for the second time, and have been advised by a Board decision, that they must seek and qualify in some further clinical study before being allowed to try the clinical again.

- (c) The Canadian Students Conference requested membership on the NDEB Board. The request was denied, pending discussing with

each Provincial Board, with the realization that the present Charter does not allow for Student membership.

- (d) The students request for deferred payment of a NDEB certificate was denied.

- (e) With one abstention (Quebec) the NDEB were instructed to pursue the liberalizing of their Charter to include specialty programs, now recognized by CDA, with the co-operative participation of the RCD (C) and based upon the following categories:

- (i) graduates of Approved Canadian Specialty Programs — accepted without further examinations.

- (ii) practicing specialists certified presently within their provincial jurisdictions — by the taking of a written examination.

- (iii) graduates of approved American Specialty Programs having reciprocity with the CDA — by the taking of a written examination.

- (iv) foreign dentists, graduate of specialty programs — by the taking of a written and a practical exam.

- (v) negotiable — present *Fellows* of the RCD (C).

This Program would of course be subject to the amendment of the present NDEB Charter.

- (f) In a like manner, the NDEB initiate national certification programs to include all allied dental personnel whose programs are presently surveyed by the CDA —

viz dental hygienists and dental assistants. Also it is proposed to hold the scope open to involve dental technicians and any other auxiliary group which may in the future, evolve.

- (g) The NDEB support the principle involved to upgrade foreign dental graduates, but consider themselves to be an examining agency only, with no intention of becoming involved in a training program.

- (h) The fee for supplemental exams has been increased to \$30.00 per paper, from the present \$10.00.

- (i) Dr. John Spëck was re-appointed Chairman of the Committee of Examiners.

- (j) The per diem allowance of Board members has been increased to \$150.00 per day — this to include all accommodation and meals.

- (k) The NDEB are refunding in full, all grants so kindly lent by the various provincial Boards during the 1968-1969 crisis.

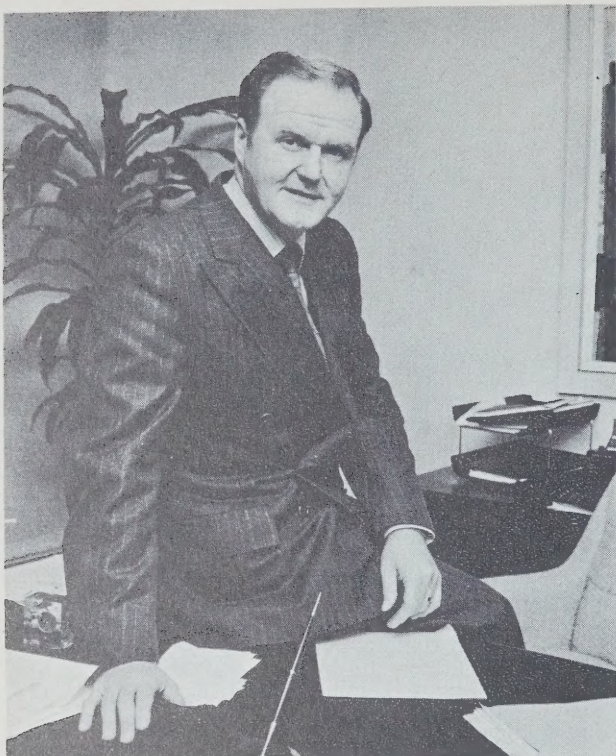

- (l) The yearly grant to the CDA to assist in the accreditation procedures, has been increased from \$4,000.00 to \$6,000.00 for 1973.

- (m) A \$500.00 grant has been authorized for 1973 to the Fund For Dental Education.

- (n) The fee for the NDEB certificate has been set at \$175.00, such fee to be reviewed annually.

- (o) Dr. James D. Purves has been appointed as an NDEB representative to the Council on Education, for a full term.

- (p) The Budgets for the past two, and the coming year, have been approved.

TREASURER'S REPORT

K.F. POWNALL, D.D.S.

1. Financial Statements

1. The Auditors' Report, the Balance Sheet and List of Investments for the R.C.D.S. as of December 31st, 1971, are attached as Appendix A.
2. The statement of Receipts and Expenditures as of the same date — attached as Appendix B.
3. The Auditors' Report and Balance Sheet for the Harry R. Abbott Memorial Library Fund are attached as Appendix C.

2. Receipts

The increase in revenue for licensing reflects the increased number of licensed dentists. The actual number of new registrations was down from 1970. The slight decrease in revenue from hygienists is caused by fewer applicants for examination. Accordingly, the income from examinations is less. Property rent is

increased because of the large addition to the building in 1971.

3. Expenditures

Expenditures increased in 1971. Honoraria and Board expenses were higher than expected due to the increased activity of the Board and the need for special meetings. This extra activity is also reflected in higher legal and audit fees. Equipment purchases were less this year. However, stationery and supplies were slightly higher.

4. Excess of Expenditures over Revenue

It should be noted that we spent \$863.00 more than we received this year. This should not continue because of the increase in licence fees in 1972.

5. The Harry R. Abbott Memorial Library Fund

This fund continues to assist the library at

the Faculty of Dentistry, University of Toronto. The source of funding is from the estate of the late Miss Dorinda Tully, set up as an annual trust bequest in 1924.

6. Note of Appreciation

Annually I like to bring to your attention the fact that the office staff of the College deserves commendation for their loyalty and devotion to duty.

AUDITORS' REPORT

APPENDIX A

To the Directors of the
Royal College of Dental Surgeons of Ontario

We have examined the balance sheet of the General Account of the Royal College of Dental Surgeons of Ontario as at December 31, 1971 and the statement of revenue and expenses for the year then ended. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion these financial statements present fairly the financial position of the General Account of the College as at December 31, 1971 and the results of its operations for the year then ended, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

AUDITORS' REPORT

APPENDIX C

To the Directors of the
Royal College of Dental Surgeons of Ontario

We have examined the balance sheet of the Harry R. Abbott Memorial Library Fund of the Royal College of Dental Surgeons of Ontario as at December 31, 1971. Our examination for the year ended December 31, 1971 included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion the accompanying balance sheet presents fairly the financial position of the Harry R. Abbott Memorial Library Fund of the College as at December 31, 1971 in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

Balance at end of year	<u>\$1,761</u>	<u>\$1,758</u>

AD-HOC COMMITTEE ON DENTIST-ANAESTHETIST RELATIONSHIPS

DR. GEORGE E. BURGMAN (CHAIRMAN)
DR. JOHN R. CALLINGHAM
DR. R. PAUL McCUTCHEON

At the Board meeting held on April 26-28, 1971, a Committee was struck to consider whether there was a need to establish a By-Law to govern the use of general anaesthetics by dentists.

A questionnaire was sent to several practitioners in order to assist the Committee in its deliberations. Information derived from the answers indicated among other things, that nitrous oxide oxygen analgesia (sedation) was in greater use than previously realized. Even though the Committee knew that this type of sedation alters normal physiology less than a general anaesthesia never the less, it was felt that there were dangers.

In general the information obtained by the Committee indicated that those dentists using general anaesthesia have had formal hospital training, accordingly, the Committee recommended that no By-Laws were required on this matter at this time.

The advantages and disadvantages of nitrous oxide oxygen analgesia were considered by the Committee. After due consideration they made the following recommendations that were accepted by the Board at the November 1972 meeting:

1. Pursuant to Section 21(6) of the Dentistry Act, all courses in anaesthesia administration and nitrous oxide oxygen analgesia other than those mounted by the

Faculties of Dentistry in Ontario must have prior approval by the Registrar. He will be guided by the general principle that courses should be held in recognized institutions and given by recognized teachers.

2. (i) Any dentist using nitrous oxide sedation who has not had formal training in general anaesthesia at the graduate level must use a fail safe machine defined as follows:
 - (a) It must have a minimum flow of oxygen equal to that of atmospheric air.
 - (b) It will not allow the machine to function unless oxygen is in the system.
- (ii) The dealer or installer should check installation prior to the equipment being used and certify in writing that the installation has met the manufacturer's specifications.

I wish to thank my Committee for their assistance with the work of this Committee and particularly I would like to thank the teaching staff of the Faculty of Dentistry of the University of Western Ontario and the University of Toronto.

STATISTICAL REPORT

YEAR-ENDING DECEMBER 31, 1972

Licensed Dentists Deceased — 1972
